

PETITION

TO: The County Commissioners of Forsyth County

Date: 10/31/04

The undersigned residents of Forsyth County, GA oppose the requested rezoning of a 14 acre parcel by CW Mathews Contracting Company, Inc. from Agricultural (AG) with a Special Use permit to Heavy Industrial (HI). This parcel is located within the quarry operated by Vulcan Materials, Inc. located at 4426 Hightower Road (Highway 369), Ball Ground GA 30107, in Cherokee County. However, the Vulcan Materials property is located in both Cherokee and Forsyth Counties.

The proposed rezoning to Heavy Industrial will have a negative impact upon the quality of life of both Cherokee and Forsyth County residents. The attempt to spot zone this parcel will lead to further improper rezoning of an area, which is designated for residential and agricultural uses. In 1988 Vulcan Materials agreed it would not locate an asphalt plant on this property in order to obtain its Special Use Permit for the quarry. If granted, this rezoning will negatively impact the surrounding areas with respect to:

1. Environmental considerations including air and water pollution
2. Increased heavy hauling traffic on an already dangerous highway 369, and
3. Serious decreases in property values to nearby residents and thus reduced tax revenues to local governments.

Further, the undersigned request that the Forsyth County Board of Commissioners exercise whatever means within its powers in support of our opposition to this rezoning request.

TO: The County Commissioners of Forsyth County

Date: 10/31/04

The undersigned residents of Forsyth County, GA oppose the requested rezoning of a 14 acre parcel by CW Mathews Contracting Company, Inc. from Agricultural (AG) with a Special Use permit to Heavy Industrial (HI). This parcel is located within the quarry operated by Vulcan Materials, Inc. located at 4426 Hightower Road (Highway 369), Ball Ground GA 30107, in Cherokee County. However, the Vulcan Materials property is located in both Cherokee and Forsyth Counties.

The proposed rezoning to Heavy Industrial will have a negative impact upon the quality of life of both Cherokee and Forsyth County residents. The attempt to spot zone this parcel will lead to further improper rezoning of an area, which is designated for residential and agricultural uses. In 1988 Vulcan Materials agreed it would not locate an asphalt plant on this property in order to obtain its Special Use Permit for the quarry. If granted, this rezoning will negatively impact the surrounding areas with respect to:

1. Environmental considerations including air and water pollution
2. Increased heavy hauling traffic on an already dangerous highway 369, and
3. Serious decreases in property values to nearby residents and thus reduced tax revenues to local governments.

Further, the undersigned request that the Forsyth County Board of Commissioners exercise whatever means within its powers in support of our opposition to this rezoning request.

2. Increased heavy hauling traffic on an already dangerous highway 369, and
3. Serious decreases in property values to nearby residents and thus reduced tax revenues to local governments.

Further, the undersigned request that the Forsyth County Board of Commissioners exercise whatever means within its powers in support of our opposition to this rezoning request.

PETITION

TO: The County Commissioners of Forsyth County

Date: 10/22/04

The undersigned residents of Forsyth County, GA oppose the requested rezoning of a 14 acre parcel by CW Mathews Contracting Company, Inc. from Agricultural (AG) with a Special Use permit to Heavy Industrial (HI). This parcel is located within the quarry operated by Vulcan Materials, Inc. located at 4426 Hightower Road (Highway 369), Ball Ground GA 30107, in Cherokee County. However, the Vulcan Materials property is located in both Cherokee and Forsyth Counties.

The proposed rezoning to Heavy Industrial will have a negative impact upon the quality of life of both Cherokee and Forsyth County residents. The attempt to spot zone this parcel will lead to further improper rezoning of an area, which is designated for residential and agricultural uses. In 1988 Vulcan Materials agreed it would not locate an asphalt plant on this property in order to obtain its Special Use Permit for the quarry. If granted, this rezoning will negatively impact the surrounding areas with respect to:

1. Environmental considerations including air and water pollution
2. Increased heavy hauling traffic on an already dangerous highway 369, and
3. Serious decreases in property values to nearby residents and thus reduced tax revenues to local governments.

Further, the undersigned request that the Forsyth County Board of Commissioners exercise whatever means within its powers in support of our opposition to this rezoning request.

2. Increased heavy hauling traffic on an already dangerous highway 369, and
3. Serious decreases in property values to nearby residents and thus reduced tax revenues to local governments.

Further, the undersigned request that the Forsyth County Board of Commissioners exercise whatever means within its powers in support of our opposition to this rezoning request.

PETITION

TO: The County Commissioners of Forsyth County

Date: 10/31/04

The undersigned residents of Forsyth County, GA oppose the requested rezoning of a 14 acre parcel by CW Mathews Contracting Company, Inc. from Agricultural (AG) with a Special Use permit to Heavy Industrial (HI). This parcel is located within the quarry operated by Vulcan Materials, Inc. located at 4426 Hightower Road (Highway 369), Ball Ground GA 30107, in Cherokee County. However, the Vulcan Materials property is located in both Cherokee and Forsyth Counties.

The proposed rezoning to Heavy Industrial will have a negative impact upon the quality of life of both Cherokee and Forsyth County residents. The attempt to spot zone this parcel will lead to further improper rezoning of an area, which is designated for residential and agricultural uses. In 1988 Vulcan Materials agreed it would not locate an asphalt plant on this property in order to obtain its Special Use Permit for the quarry. If granted, this rezoning will negatively impact the surrounding areas with respect to:

1. Environmental considerations including air and water pollution
2. Increased heavy hauling traffic on an already dangerous highway 369, and
3. Serious decreases in property values to nearby residents and thus reduced tax revenues to local governments.

Further, the undersigned request that the Forsyth County Board of Commissioners exercise whatever means within its powers in support of our opposition to this rezoning request.
