Atlanta Regional Commission • 40 Courtland Street NE, Atlanta, Georgia 30303 • ph: 404.463.3100 • fax: 404.463.3105 • www.atlantaregional.com

DATE: Aug 24 2012

ARC REVIEW CODE: R1208241

TO: Mayor Kasim Reed
ATTN TO: Joshua Mellow, Assistant Director
FROM: Doug Hooker, Executive Director

The Atlanta Regional Commission (ARC) has completed a preliminary regional review of the following Development of Regional Impact (DRI). ARC reviewed the DRI with regard to conflicts to regional plans, goals, and policies and impacts it might have on the activities, plans, goals, and policies of other local jurisdictions as well as state, federal, and other agencies. The preliminary report does not address whether the DRI is or is not in the best interest of the local government.

Name of Proposal: Camden Paces

Review Type: DRI

Submitting Local Government: City of Atlanta

Date Opened: Aug 24 2012

Deadline for Comments: Sep 8 2012 **Date to Close:** Sep 13 2012

Description: This project, located in the City of Atlanta, is a proposed mixed use project with 114,000 square feet of office space, 117,000 square feet of commercial space and 390 residential units. This DRI review will also include an adjacent project by the same developer and name (Camden Paces, DRI #2281) which was not reviewed as a DRI previously due to it being below DRI thresholds. That development included 392 residential units. Including both developments, this DRI review will include 114,000 square feet of office space and 117,000 square feet of commercial space and 782 residential units. The project is located at 77 East Andrews Drive in the City of Atlanta.

DRI Checklist Preliminary Summary:

Regional Consistency Assessment (50%): 100%

Overall Weighted Score: 96%

Local Impacts Assessment (30%): 95%

Quality Development Assessment (20%): 90%

PRELIMINARY COMMENTS: Regional Context:

According to the ARC Unified Growth Policy Map (UGPM) and Regional Development Guide (RDG), the proposed development is within an area designated as Maturing Neighborhoods. A portion of the development is also within a Regional Center. The UGPM and RDG state that Maturing Neighborhoods "are areas in the region characterized by older neighborhoods that include both single- and multifamily development, as well as commercial and office uses at connected key locations. Though commercial and office buildings are aging, they nonetheless are often incorporated into neighborhoods, providing an active mix of uses and amenities. Maturing neighborhoods are denser than established suburbs and the development pattern is more similar to that of pre-1970s urban development. These areas represent the part of the region that is facing infill and redevelopment pressures. In many cases, the infrastructure is in place to handle the additional growth, however in some areas, infrastructure is built out with limited ability to expand. This may constrain the amount of additional growth possible in certain areas. Many arterial streets in this area are congested due to their use as a regional route for commuters. Limited premium transit service is available in these areas.

The demand for infill development, redevelopment and adaptive reuse of existing buildings in this area should be balanced with the preservation of existing single family neighborhoods. Consideration should be given to the need for additional usable parks and greenspace close to residents, as well as developing and maintaining pedestrian-friendly amenities such as trails and sidewalks. Maturing Neighborhoods are areas where people are aging in place. These areas should integrate Lifelong Communities principles to ensure options for housing and transportation in the community that support older adults that want to remain in their communities for a lifetime.

The UGPM and RDG state that Regional Centers “have 10,000 jobs or more in approximately four square miles. People travel from around the region to these centers for employment, shopping and entertainment. These centers should be connected to the regional transportation network with existing or planned high capacity transit service. In most cases, these centers have a jobs–housing imbalance, so housing options should be expanded within their boundaries, especially around existing or planned transit. Some Regional Centers could also be considered “Edge Cities,” developed in a suburban, auto–oriented way. They have limited multi modal transportation options and are challenged by increasing congestion. Local plans and policies should support efforts to transform these areas into highly accessible mixed–use urban hubs. Some Regional Centers may have high concentrations of logistics or industrial uses. The retention of these uses is a key regional strategy. While some housing and other uses can be added, special attention should be given to reducing the impacts these will have on the existing logistics/industrial uses.

Additionally, the Camden Paces development is located within the Buckhead Livable Centers Initiative (LCI) study area. This LCI was completed in 2002 with several follow–up studies completed since the plan was adopted.

Observations:

The Camden Paces DRI review includes the newest proposal of 114,000 square feet of office space, 117,000 square feet of commercial space and 390 residential units as well as an adjacent project by the same developer and name (Camden Paces, DRI #2281) which was not reviewed as a DRI previously due to it being below DRI thresholds. That development included 392 residential units. Including both developments, this DRI review will include 114,000 square feet of office space and 117,000 square feet of commercial space and 782 residential units.

The development proposal includes several good features and design elements including buildings facing and being brought up to the street, parking placed behind or beside buildings and screened from view, internal connectivity and public access through the site, bicycle and pedestrian facilities, and a mix of uses that may encourage residents, employees, and visitors to the development to walk rather than drive between the various uses.

However, the portion of Camden Paces that was not reviewed and has already been zoned includes multiple gates which restrict movement through the site, without having to exit the property and use an external street. It was indicated during the pre–review meeting that the gates have already been moved from a previously proposed location.

Recommendations:

While the new placement of the gates allows for additional access into and through the site, the developer should consider using gates only at the entrances to the residential parking area. Doing this would allow multiple connections between the various development pods and uses proposed for the site.

Additionally, the development proposal should be consistent with any recommendations included in the original LCI plan or any follow–up study.

DEVELOPMENT OF REGIONAL IMPACT REQUEST FOR COMMENTS

Instructions: The project described below has been submitted to this Regional Development Center for review as a Development of Regional Impact (DRI). A DRI is a development of sufficient project of sufficient scale or importance that it is likely to have impacts beyond the jurisdiction in which the project is actually located, such as adjoining cities or neighboring counties. We would like to consider your comments on this proposed development in our DRI review process. Therefore, please review the information about the project included on this form and give us your comments in the space provided. The completed form should be returned to the RDC on or before the specified return deadline.

Preliminary Findings of the RDC: **Camden Paces** *See the Preliminary Report.*

MEMORANDUM

TO: Jon Tuley, Land Use Division

FROM: Nathan Soldat, Transportation Planning Division

DATE: August 20th, 2012

SUBJECT: **Transportation Division Review of DRI # 2291**
Project: Camden Pace
County: Fulton
Location: East Andrews Drive Northwest, Atlanta, GA 30305
Analysis:
Expedited ☐
Non-Expedited ☒

cc: David Haynes
TD

The following input is provided for the Infrastructure section of the DRI Report. This DRI proposal is being considered for review under the Georgia Regional Transportation Authority Non-expedited Review Process. The Camden Paces development is proposed to be located between West Paces Ferry Road and Roswell Road. The development is comprised of 114,000 square feet of office space, 47,500 square feet of restaurant space, 69,500 square feet of retail space, 376 town homes and 390 apartments.

INFRASTRUCTURE **Transportation**

How many site access points will be associated with the proposed development? What are their locations?

Site access is proposed to be provided for the site via four full access driveways on East Andrews Drive, one full access driveway on Roswell Road, one right-in/right-out driveway on Roswell Road and one right-in/right-out driveway on West Paces Ferry Road. It should be noted that during the pre-application meeting, Joshua Mello with the City of Atlanta stated that the City does not support having two driveways on Roswell Road, does not support the western most driveway on East Andrews Drive and would like the driveway on West Paces Ferry Road to be a full access driveway.

How much average daily traffic will be generated by the proposed project?

The applicant is still working with GRTA to solidify the proposed methodology for the traffic study at this time. Once a methodology has been proposed and GRTA has issued a Memorandum of Understanding, ARC staff will verify.

List the transportation improvements that would affect or be affected by the proposed project.

PLAN 2040 RTP (Long Range Projects)*

ARC Number	<u>Route</u>	Type of Improvement	Scheduled Completion Year
AT-246	SR 237 (Piedmont Road) Widening	Roadway/General Purpose Capacity	Long Range 2018-2030

**The ARC Board adopted the PLAN 2040 RTP and FY 2012-2017 TIP on July 27th, 2011.*

Is the site served by transit? If so, describe type and level of service and how it will enhance or be enhanced by the presence of transit? Are there plans to provide or expand transit service in the vicinity of the proposed project?

The site is not directly served by transit. The nearest corridor that is served by MARTA is Peachtree Road, bus route 110.

What transportation demand management strategies does the developer propose (carpool, flex-time, transit subsidy, etc.)?

None proposed.

What are the numbers of crashes adjacent to the proposed project?

The Georgia Department of Transportation shows for the last three years:

- 9 crashes (no fatalities) at or north of the intersection of Roswell Road and East Andrews Dr.
- 3 crashes (no fatalities) at or near the intersection of Cains Hill Pl and East Andrews Dr.
- 3 crashes (no fatalities) at or near the intersection of Paces Ferry Pl and East Andrews Dr.
- 4 crashes (no fatalities) at or near the intersection of East Andrews Dr. and W. Paces Ferry Rd.
- 4 crashes (no fatalities) at or near the intersection of W. Paces Ferry Rd. and Paces Ferry Pl

What other issues should be considered during the traffic study or in general for the proposed development?

- The developer should review design guidelines related to ARC's Policy and Investment Networks. The proposed development is located in an employment/activity center and LCI area. Roswell Road is on Strategic Truck Route Network, Regional Thoroughfare Network and Bicycle and Pedestrian Network.
- Inner-site connectivity and internal circulation is of concern. Privacy gates preventing movement from one end of the site to the other through the middle of the site require users to leave the site and travel via East Andrews Dr. Safe facilities for all modes of travel should be provided on East Andrews Dr.
- Please refer to GDOT's "Regulations for Driveway and Encroachment Control" manual as an additional resource regarding access points to the site.

CAMDEN PACES DRI
City of Atlanta
Environmental Planning Division Review Comments
August 21, 2012

Watershed Protection and Stream Buffers

The proposed project is located on a previously developed property in the Nancy Creek basin of the Peachtree Creek watershed. Peachtree Creek is a tributary to the Chattahoochee River that enters the River below the water supply watershed portion of the basin. While the USGS coverage for the project area shows no streams on or near the project property, the project plans show three streams with both the State 25-foot and City 75-foot buffers shown. The plans show development over portions of the streams and their buffers. However, it appears from aerial photo evidence that more of the streams were covered under the original development. Work within the State and City stream buffers are subject to all applicable buffer requirements and may require variances from the City and State.

Stormwater / Water Quality

The project should adequately address the impacts of the proposed development on stormwater runoff and downstream water quality. During construction, the project should conform to the relevant state and federal erosion and sedimentation control requirements. After construction, water quality will be impacted due to polluted stormwater runoff. The amount of pollutants that will be produced after construction of the proposed development has been estimated by ARC. These are based on some simplifying assumptions for typical pollutant loading factors (lbs/ac/yr) from typical land uses in the Atlanta Region. The loading factors are based on regional storm water monitoring data from the Atlanta Region with impervious areas based on estimated averages for land uses in the Atlanta Region. If actual impervious percentages are higher or lower than the estimate, the pollutant loads will differ accordingly. The following table summarizes the results of the analysis:

Estimated Pounds of Pollutants Per Year

Land Use	Land Area (ac)	Total Phosphorus	Total Nitrogen	BOD	TSS	Zinc	Lead
Commercial	16.50	28.22	287.10	1782.00	16219.50	20.30	3.63
Townhouse/Apartment	13.62	14.30	145.87	912.54	8240.10	10.35	1.91
TOTAL	30.12	42.52	432.97	2694.54	24459.60	30.65	5.54

Total Impervious = 68%

If new or upgraded on-site detention is required, the design should include stormwater management controls (structural and/or nonstructural) as found in the Georgia Stormwater Management Manual (www.georgiastormwater.com) and meet the stormwater management quantity and quality criteria outlined in the Manual. Where possible, the project should utilize the stormwater better site design concepts included in the Manual.

DEVELOPMENT OF REGIONAL IMPACT Initial DRI Information

This form is to be completed by the city or county government to provide basic project information that will allow the RDC to determine if the project appears to meet or exceed applicable DRI thresholds. Refer to both the [Rules for the DRI Process](#) and the [DRI Tiers and Thresholds](#) for more information.

Local Government Information

Submitting Local Government:	Atlanta
Individual completing form:	Joshuah Mello
Telephone:	404-330-6785
E-mail:	jdmello@atlantaga.gov

*Note: The local government representative completing this form is responsible for the accuracy of the information contained herein. If a project is to be located in more than one jurisdiction and, in total, the project meets or exceeds a DRI threshold, the local government in which the largest portion of the project is to be located is responsible for initiating the DRI review process.

Proposed Project Information

Name of Proposed Project:	Camden Paces
Location (Street Address, GPS Coordinates, or Legal Land Lot Description):	77 East Andrews Drive
Brief Description of Project:	Mixed-use project located on two parcels of land. Development to include 363,474SF of commercial and 348,654SF of residential.

DEVELOPMENT OF REGIONAL IMPACT Additional DRI Information

This form is to be completed by the city or county government to provide information needed by the RDC for its review of the proposed DRI. Refer to both the [Rules for the DRI Process](#) and the [DRI Tiers and Thresholds](#) for more information.

Local Government Information

Submitting Local Government: City of Atlanta

Individual completing form: _____

Telephone: _____

Email: _____

Project Information

Name of Proposed Project: Camden Paces

DRI ID Number: 2291

Developer/Applicant: Camden USA Inc.

Telephone: (813) 286-5161

Email(s): cweaver@camdenliving.com

Additional Information Requested

Has the RDC identified any additional information required in order to proceed with the official regional review process? (If no, proceed to Economic Impacts.)

☐ (not selected) ☒ Yes ☐ No

If yes, has that additional information been provided to your RDC and, if applicable, GRTA?

☐ (not selected) ☐ Yes ☐ No

If no, the official review process can not start until this additional information is provided.

Economic Development

Estimated Value at Build-Out:

\$150,000,000

Estimated annual local tax revenues (i.e., property tax, sales tax) likely to be generated by the proposed development:

\$2,666,000

Is the regional work force sufficient to fill the demand created by the proposed project?

☐ (not selected) ☒ Yes ☐ No

Will this development displace any existing uses?

☐ (not selected) ☐ Yes ☒ No

If yes, please describe (including number of units, square feet, etc):

Water Supply

Name of water supply provider for this site:

City of Atlanta

What is the estimated water supply demand to be generated by the project, measured in Millions of Gallons Per Day (MGD)?

0.37

Is sufficient water supply capacity available to serve the proposed project?

☐ (not selected) ☒ Yes ☐ No

If no, describe any plans to expand the existing water supply capacity:

Is a water line extension required to serve this project?

☐ (not selected) ☐ Yes ☒ No

If yes, how much additional line (in miles) will be required?

Wastewater Disposal

Name of wastewater treatment provider for this site:

City of Atlanta Nancy Creek

What is the estimated sewage flow to be generated by the project, measured in Millions of Gallons Per Day (MGD)?

0.32

Is sufficient wastewater treatment capacity available to serve this proposed project?

☐ (not selected) ☒ Yes ☐ No

If no, describe any plans to expand existing wastewater treatment capacity:

Is a sewer line extension required to serve this project?

☐ (not selected) ☐ Yes ☒ No

If yes, how much additional line (in miles) will be required?

Land Transportation

How much traffic volume is expected to be generated by the proposed development, in peak hour vehicle trips per day? (If only an alternative measure of volume is available, please provide.)

A preliminary trip generation shows the development will generate 1,200 AM peak trips and 1,112 PM peak trips. Final trip calculations will be included in the DPR report.

Has a traffic study been performed to determine whether or not transportation or access improvements will be needed to serve this project?

☐ (not selected) ☐ Yes ☒ No

Are transportation improvements needed to serve this project?

☐ (not selected) ☐ Yes ☒ No

If yes, please describe below:

A full DRI report will be prepared and submitted for the proposed development after meeting with ARC and GRTA

Solid Waste Disposal

How much solid waste is the project expected to generate annually (in tons)?

75,074

Is sufficient landfill capacity available to serve this proposed project?

☐ (not selected) ☒ Yes ☐ No

If no, describe any plans to expand existing landfill capacity:

Will any hazardous waste be generated by the development?

☐ (not selected) ☐ Yes ☒ No

If yes, please explain:

Stormwater Management

What percentage of the site is projected to be impervious surface once the proposed development has been constructed?

74%

Describe any measures proposed (such as buffers, detention or retention ponds, pervious parking areas) to mitigate the project's impacts on stormwater management:

Natural buffers, infiltration water quality, channel protection and detention

Environmental Quality

Is the development located within, or likely to affect any of the following:

- | | |
|---|--|
| 1. Water supply watersheds? | <input type="radio"/> (not selected) <input type="radio"/> Yes <input checked="" type="radio"/> No |
| 2. Significant groundwater recharge areas? | <input type="radio"/> (not selected) <input type="radio"/> Yes <input checked="" type="radio"/> No |
| 3. Wetlands? | <input type="radio"/> (not selected) <input type="radio"/> Yes <input checked="" type="radio"/> No |
| 4. Protected mountains? | <input type="radio"/> (not selected) <input type="radio"/> Yes <input checked="" type="radio"/> No |
