Atlanta Regional Commission • 40 Courtland Street NE, Atlanta, Georgia 30303 • ph: 404.463.3100 • fax: 404.463.3105 • www.atlantaregional.com

DATE: March 12, 2014

ARC REVIEW CODE: R1403121

TO: Chairman Tim Lee
ATTN TO: John Pederson, Zoning Division Manager
FROM: Douglas R. Hooker, Executive Director
RE: Development of Regional Impact Review

The Atlanta Regional Commission (ARC) has completed a preliminary regional review of the following Development of Regional Impact (DRI). ARC reviewed the DRI with regard to conflicts to regional plans, goals, and policies and impacts it might have on the activities, plans, goals, and policies of other local jurisdictions as well as state, federal, and other agencies. The preliminary report does not address whether the DRI is or is not in the best interest of the local government.

Name of Proposal: Interstate North

Review Type: DRI

Submitting Local Government: Cobb County

Date Opened: March 12, 2014

Deadline for Comments: March 27, 2014

Date to Close: April 1, 2014

Description: The proposed Interstate North development is located in south Cobb County on Interstate West Parkway and will include 576,000 square feet of warehouse/distribution space.

PRELIMINARY COMMENTS:

Regional Context:

According to the ARC Unified Growth Policy Map (UGPM) and the Regional Development Guide (RDG), the proposed Interstate North development is within an area designated as Developing Suburbs and is also located within an Industrial/Logistics area.

The RDG states that Developing Suburbs are areas in the region where suburban development has occurred and the conventional development pattern is present but not set. These areas are characterized by limited commercial and residential development. These areas represent the extent of the urban service area, and the region's first attempts at suburban smart growth can be found in these areas. The region should strive to develop these areas in a more sustainable way than the existing development model. To this end, there is a need for additional preservation of critical environmental locations, as well as agricultural and forest uses adjacent to rural areas.

Limited existing infrastructure in these areas will constrain the amount of additional growth that is possible. Some transportation improvements may be needed within these developing suburbs, but care should be taken not to spur unwanted growth.

The RDG states that Industrial and Logistics Areas represent the major intermodal freight facilities and major logistics centers of the region. As a strategic economic sector, the region should strive to protect these areas and ensure they are well served by the regional transportation network.

Comments:

The proposed development is located in an area that is rapidly changing and is becoming dominated by industrial and warehouse uses. It is important to promote compatible uses where possible, as well as identify and mitigate potential land use conflicts as the area continues to develop.

The property is in the Sweetwater Creek Water Supply Watershed, a large (greater than 100 square mile) watershed as defined by State of Georgia's Part 5 Environmental Planning Criteria for water supply watersheds.

As withdrawals are drawn directly from the Sweetwater Creek and not from a reservoir, the only Part 5 Water Supply Watershed criteria that apply in the Sweetwater Creek watershed are restrictions on the handling and storage of hazardous materials within 7 miles upstream of the intake. (East Point's Sparks Reservoir is located in the basin of a tributary to Sweetwater Creek and receives no direct flow from Sweetwater Creek or the rest of the Sweetwater watershed).

The submitted site plan shows an unnamed tributary to Sweetwater Creek on the project property. The site plans shows the 50-foot County buffer, but the headwaters of the stream are under the proposed building and parking area as shown on the plan. This stream is also subject to the State 25-foot Sedimentation and Erosion Control Buffer, which is not shown on the plan. No other streams are shown on the plans and the USGS coverage for the project area shows no blue line streams on the project site. Any other waters of the state on this property will also be subject to the State buffer requirements.

DEVELOPMENT OF REGIONAL IMPACT REQUEST FOR COMMENTS

Instructions: The project described below has been submitted to this Regional Development Center for review as a Development of Regional Impact (DRI). A DRI is a development of sufficient project of sufficient scale or importance that it is likely to have impacts beyond the jurisdiction in which the project is actually located, such as adjoining cities or neighboring counties. We would like to consider your comments on this proposed development in our DRI review process. Therefore, please review the information about the project included on this form and give us your comments in the space provided. The completed form should be returned to the RDC on or before the specified return deadline.

Preliminary Findings of the RDC: **Interstate North** *See the Preliminary Report.*

Date to Close: April 1, 2014

Response:

- 1) ☐ Proposal is CONSISTENT with the following regional development guide listed in the comment section.
- 2) ☐ While neither specifically consistent nor inconsistent, the proposal relates to the following regional development guide listed in the comment section.
- 3) ☐ While neither specifically consistent nor inconsistent, the proposal relates to the following regional development guide listed in the comment section.
- 4) ☐ The proposal is INCONSISTENT with the following regional development guide listed in the comment section.
- 5) ☐ The proposal does NOT relate to any development guide for which this division is responsible.
- 6) ☐ Staff wishes to confer with the applicant for the reasons listed in the comment section.

COMMENTS:

MEMORANDUM

TO: Jon Tuley, Land Use Division

FROM: Marshall Willis, Transportation Access and Mobility Division

DATE: March 11th, 2014

SUBJECT: **Transportation Division Review of DRI # 2393**
Project: Interstate North Warehouse/Distribution
County: Cobb
Location: Interstate West Pkwy, near 6 Flags Rd & Thornton Road
Analysis: Expedited ☒
Non-Expedited ☐

cc: David Haynes
TAMD

The following input is provided for the Infrastructure section of the DRI Report. The applicant proposes to construct a 576,000 square foot warehouse building/light industrial on 42.3 acres (33.2 acres of which are disturbed) in Cobb County. No rezoning is required. The site is south of I-20, east of Thornton Road, and fronts Interstate West Pkwy on the northwestern edge of the site, as well as Factory Shoals Rd to the east of the site. Due to limited trip generation (less than 1,000) this project qualifies under expedited review. Construction is proposed to begin the summer of 2014, lasting approximately 8 months.

INFRASTRUCTURE

Transportation

How many site access points will be associated with the proposed development? What are their locations?

Site access will be served via two locations. The connection to Interstate West Pkwy, on the northwest border of the property, serves as the primary access point and is expected to carry 90% of site ingress/egress. Secondary access will be provided on Factory Shoals Rd on the eastern border of the site and it expected to carry 10% of site ingress/egress with right in/right out and a deceleration lane.

How much average daily traffic will be generated by the proposed project?

The preliminary figures suggest approximately 968 daily trips. This number is broken out with a total truck volume of 370, and total personal vehicle trips of 598. Trip generation figures are taken from 9th edition of the *ITE Trip Generation* manual, using Land Use Code 152. Approximately 60% of personal vehicles and 75% of trucks are expected to travel north on Thornton Road from the site.

List the transportation improvements that would affect or be affected by the proposed project.

PLAN 2040 RTP (Long Range Projects)*

ARC Number	Route and Description	Type of Improvement	Scheduled Construction Year
DO-295	The SR 6 corridor experiences heavy truck traffic (14%) throughout the day as it serves freight traffic between I-20 and the Whitaker Intermodal Terminal along Garrett Road. Project elements include: 1) overhead signage for navigation to I-20, 2) nearside signal heads on the right side of the intersection to improve visibility of signals, 3) modification of medians to extend left turn lanes at Bankhead Highway, Maxham Road, and Skyview Drive, which experience high truck volumes and queues extending beyond the turning lane limits causing congestion, 4) signal system communications upgrades to provide fiber optic interconnect from Bankhead Highway to Garrett Road, Ethernet cards for communication, and uninterrupted power supply systems to signal controllers, 5) CCTV Cameras at I-20, Maxham Road, and Bankhead Highway for traffic monitoring, and 6) truck rollover warning system at the intersection of SR 6 at Garrett Road, for freight traffic departing the Whitaker Intermodal Terminal. The need for this project was identified in the Connect 6 study, a corridor level study jointly funded by ARC, Douglas County, and Cobb County, and in the Douglas County Comprehensive Transportation Plan. The project is being funded under the Freight Operations and Safety Program, a regional program defined in PLAN 2040 to improve mobility and safety for freight operators and other roadway users along a defined regional truck route network (ASTRoMaP) and at rail crossings, as well as enhancing accessibility to, from and within industrial areas located along or near that network. SR 6 is included on the ASTRoMaP system network, as well as being designated a Regional Thoroughfare critical to general cross-regional mobility.	Roadway / Operations & Safety	2015
DO-299	This project will implement truck friendly lanes along SR 6 (Thornton Road). The project will begin at I-20 West in Douglas County and terminate at the SR 6 Spur (Garrett Road) in Cobb County.	Roadway / Operations & Safety	2020 - 2030

*The ARC Board adopted the PLAN 2040 RTP and FY 2012-2017 TIP on July 27th, 2011.

Is the site served by transit? If so, describe type and level of service and how it will enhance or be enhanced by the presence of transit? Are there plans to provide or expand transit service in the vicinity of the proposed project?

The site is not directly served by transit.

What other issues should be considered during the traffic study or in general for the proposed development?

The developer should review design guidelines related to ARC's Policy and Investment Networks. The proposed development is located along or near the following:

- National Highway System: I-20
- National Highway System: SR 6 (Thornton Road)
- Regional Thoroughfare Network: SR 6 (Thornton Road)
- Regional Freight Network: SR 6 (Thornton Road)

**INTERSTATE NORTH DRI
Cobb County
Natural Resources Division Review Comments**

March 7, 2014

Water Supply Watershed and Stream Buffer Protection

The property is in the Sweetwater Creek Water Supply Watershed, a large (greater than 100 square mile) watershed as defined by State of Georgia's Part 5 Environmental Planning Criteria for water supply watersheds. As withdrawals are drawn directly from the Sweetwater Creek and not from a reservoir, the only Part 5 Water Supply Watershed criteria that apply in the Sweetwater Creek watershed are restrictions on the handling and storage of hazardous materials within 7 miles upstream of the intake. (East Point's Sparks Reservoir is located in the basin of a tributary to Sweetwater Creek and receives no direct flow from Sweetwater Creek or the rest of the Sweetwater watershed).

The submitted site plan shows an unnamed tributary to Sweetwater Creek on the project property. The site plans shows the 50-foot County buffer, but the headwaters of the stream are under the proposed building and parking area as shown on the plan. This stream is also subject to the State 25-foot Sedimentation and Erosion Control Buffer, which is not shown on the plan. No other streams are shown on the plans and the USGS coverage for the project area shows no blue line streams on the project site. Any other waters of the state on this property will also be subject to the State buffer requirements.

Storm Water/Water Quality

The project should adequately address the impacts of the proposed development on stormwater runoff and downstream water quality. During construction, the project should conform to the relevant state and federal erosion and sedimentation control requirements. After construction, water quality will be impacted due to polluted stormwater runoff. ARC has estimated the amount of pollutants produced after the construction of the entire proposed project as presented on the submitted site plan. These estimates are based on some simplifying assumptions for typical pollutant loading factors (lbs/ac/yr). The loading factors are based on the results of regional storm water monitoring data from the Atlanta Region with impervious areas based on estimated averages for land uses in the Atlanta Region. Actual pollutant loads will vary with the actual impervious area and percentage. The following tables summarize the results of the analysis:

Estimated Pounds of Pollutants per Year

Land Use	Land Area (ac)	Total Phosphorus	Total Nitrogen	BOD	TSS	Zinc	Lead
Heavy Industrial	42.26	61.27	812.99	5408.64	33592.73	70.14	8.87
TOTAL	42.26	61.27	812.99	5408.64	33592.73	70.14	8.87

Total Percent Impervious: 80%

In order to address post-construction stormwater runoff quality, the project should implement stormwater management controls (structural and/or nonstructural) as found in the Georgia Stormwater Management Manual (www.georgiastormwater.com) and meet the stormwater management quantity and quality criteria outlined in the Manual. Where possible, the project should utilize the stormwater better site design concepts included in the Manual.

Department of Transportation

Review Date: 2-20 -14 Time: 9:00
Project Name: Interstate W, Lot M CONCEPT
Street Name: Interstate West
Developer: Realticorp

LDP Number: SPR-2014-00054
Zoning Case:
Land Lot/District: 680/18
Engineer: Urban

The following comments are based on office review of plans:

- 1) Any drive, access, sidewalk/shoulder **Cross-Slope, in the R/W**, is to match the Std 1/4" per LF (2%, Per ADA). Show and add note
- 2) Note on plans any zoning or variance case numbers, type, date of approval, and all conditions. Include requirements on plans.
- 3) Factory Shoals is classified as a Major Collector in the adopted Cobb County Major Thoroughfare Plan which specifies a minimum R/W width of 40' from the street centerline. Also provide legal description and plat. Corporate seal must be affixed to all documents. R/W to be 10' from BOC min.
- 4) Curb, gutter and sidewalk the entire property frontage. Show dimension 12' lane width. Provide handicap ramps (12:1 slope) at all intersections, driveways, and curb encroachment locations. Show on plans and include detail.
- 5) Provide typical cross section (Detail 401A), of road improvements and pavement specifications for areas in the RW. Roadway signing and marking plans are required. All striping to be thermoplastic. ADD NOTE TO PLANS.
- 6) Show/state driveway radius as 30' min. Show proper widths of all driveways: Two-way access (24' minimum, 30'maximum). One-way access (14' minimum, 18'maximum), as measured from face of curb to face of curb. Provide 20' separation from property line.
- 7) Minimum Intersection Sight Distance (ISD) requirements must be satisfied in each direction of any proposed access, driveway, or intersection. Provide plan view per Std. Detail #401B. Provide ISD profiles for conditions at the actual line if sight.
- 8) Plans are not eligible for "One-Stop" plan approval.

It shall be the responsibility of the developer/engineer to research and incorporate any and all stipulations and/or covenants made in the zoning process. Failure to do so shall result in termination of this department's approval. PLANS MAY BE APPROVED VIA "ONESTOP," IF ELIGIBLE. IF NOT, PLEASE SCHEDULE AN APPOINTMENT AT 770-528-1666, Development Review Section.

Email: LBeall@GRTA.org

Dear Laura,

Reference: Expedited DRI Review Request for Interstate North, Cobb County, GA

I am requesting an Expedited Review for the Interstate North Development of Regional Impact (DRI) to be located in southern Cobb County on behalf of IDI (770-866-1117 GMinor@idi.com) and Cobb County (770-528-2035 john.pederson@cobbcounty.org),. The 37-acre site is located on the south side of the Interstate West Parkway and northwest of Factory Shoals Road Stalwart Drive, east of SR 6, Thornton Road, and south of I-20. The development is to consist of a 576,000 square foot single-story warehouse distribution center with driveway accesses on both roadways, although the majority of the new trips are expected on Interstate West Parkway. Most of the other land uses in the vicinity are warehousing/distribution uses.

Based on the *ITE Trip Generation Manual*, 9th Edition, 2012 data for Land Use Code 152, the site when entirely built-out will generate 968 vehicular trips daily, of which 370 will be trucks. Approximately 55 new morning and 94 new evening peak hour of the adjacent street vehicular trips entering and exiting the site will be generated (69% AM entering and PM exiting, approximately 24-30% trucks.) The proposed land use is appropriate to the ARC UGPM and RDG and the local jurisdiction supports regionally adopted policies with appropriate development codes and standards.

Based on this, the Article 3, Section 3-102 subsection B-1 of the Procedures and Principles for GRTA DRI Review subsection B-1 criteria for an Expedited Review indicating total gross daily trips less than 1,000 is met for this project.

Please advise me if any additional information is required to justify an Expedited Review of this DRI.

Regards,

Stantec Consulting Services Inc.

Randall Parker, PE PTOE PTP AICP

Is the regional work force sufficient to fill the demand created by the proposed project?	<input type="radio"/> (not selected) <input checked="" type="radio"/> Yes <input type="radio"/> No
Will this development displace any existing uses?	<input type="radio"/> (not selected) <input type="radio"/> Yes <input checked="" type="radio"/> No

If yes, please describe (including number of units, square feet, etc):

Water Supply

DRI Additional Information Form

Name of water supply provider for this site:	Cobb County Water System
What is the estimated water supply demand to be generated by the project, measured in Millions of Gallons Per Day (MGD)?	0.01 MGD
Is sufficient water supply capacity available to serve the proposed project?	<input type="radio"/> (not selected) <input checked="" type="radio"/> Yes <input type="radio"/> No
If no, describe any plans to expand the existing water supply capacity:	
Is a water line extension required to serve this project?	<input type="radio"/> (not selected) <input type="radio"/> Yes <input checked="" type="radio"/> No
If yes, how much additional line (in miles) will be required?	
Wastewater Disposal	
Name of wastewater treatment provider for this site:	Cobb County Water System
What is the estimated sewage flow to be generated by the project, measured in Millions of Gallons Per Day (MGD)?	0.01 MGD
Is sufficient wastewater treatment capacity available to serve this proposed project?	<input type="radio"/> (not selected) <input checked="" type="radio"/> Yes <input type="radio"/> No
If no, describe any plans to expand existing wastewater treatment capacity:	
Is a sewer line extension required to serve this project?	<input type="radio"/> (not selected) <input type="radio"/> Yes <input checked="" type="radio"/> No
If yes, how much additional line (in miles) will be required?	
Land Transportation	
How much traffic volume is expected to be generated by the proposed development, in peak hour vehicle trips per day? (If only an alternative measure of volume is available, please provide.)	71 peak hour trips (PM-in and out); 968 trips per day (in and out).
Has a traffic study been performed to determine whether or not transportation or access improvements will be needed to serve this project?	<input type="radio"/> (not selected) <input type="radio"/> Yes <input checked="" type="radio"/> No
Are transportation improvements needed to serve this project?	<input type="radio"/> (not selected) <input type="radio"/> Yes <input checked="" type="radio"/> No
If yes, please describe below:	
Solid Waste Disposal	
How much solid waste is the project expected to generate annually (in tons)?	35 tons
Is sufficient landfill capacity available to serve this proposed project?	<input type="radio"/> (not selected) <input checked="" type="radio"/> Yes <input type="radio"/> No
If no, describe any plans to expand existing landfill capacity:	
Will any hazardous waste be generated by the development?	<input type="radio"/> (not selected) <input type="radio"/> Yes <input checked="" type="radio"/> No
If yes, please explain:	
Stormwater Management	
What percentage of the site is projected to be impervious surface once the proposed development has been constructed?	62%

Describe any measures proposed (such as buffers, detention or retention ponds, pervious parking areas) to mitigate the project's impacts on stormwater management: There will be a detention pond on site.

Environmental Quality

Is the development located within, or likely to affect any of the following:

1. Water supply watersheds?	<input type="radio"/> (not selected) <input type="radio"/> Yes <input checked="" type="radio"/> No
2. Significant groundwater recharge areas?	<input type="radio"/> (not selected) <input type="radio"/> Yes <input checked="" type="radio"/> No
3. Wetlands?	<input type="radio"/> (not selected) <input checked="" type="radio"/> Yes <input type="radio"/> No
4. Protected mountains?	<input type="radio"/> (not selected) <input type="radio"/> Yes <input type="radio"/> No
5. Protected river corridors?	<input type="radio"/> (not selected) <input type="radio"/> Yes <input checked="" type="radio"/> No
6. Floodplains?	<input type="radio"/> (not selected) <input type="radio"/> Yes <input checked="" type="radio"/> No
7. Historic resources?	<input type="radio"/> (not selected) <input type="radio"/> Yes <input checked="" type="radio"/> No
8. Other environmentally sensitive resources?	<input type="radio"/> (not selected) <input checked="" type="radio"/> Yes <input type="radio"/> No

If you answered yes to any question above, describe how the identified resource(s) may be affected:
Wetlands and stream buffers will be covered under NWP 39.
