Atlanta Regional Commission 229 Peachtree Street NE, Suite 100 Atlanta, Georgia 30303

RE: Comprehensive Plan Update Submittal

The City of Suwanee has completed an update of its comprehensive plan and is submitting it with this letter for review by the Atlanta Regional Commission and the Department of Community Affairs.

I certify that we have held the required public hearings and have involved the public in development of the plan in a manner appropriate to our community's dynamics and resources. Evidence of this has been included with our submittal.

I certify that appropriate staff and decision-makers have reviewed both the Regional Water Plan covering our area and the Rules for Environmental Planning Criteria (O.C.G.A. 12-2-8) and taken them into consideration in formulating our plan.

If you have any questions concerning our submittal, please contact Alyssa Durden at 770-904-2271 / adurden@suwanee.com.

Sincerely,

James M. Burnette, Jr., Mayor

City of Suwanee

# **EXECUTIVE SUMMARY**

20 years ago, Suwanee's first Comprehensive Plan laid out a vision for Suwanee to evolve from a suburban bedroom community into a sustainable place by managing growth. The City's land use policies embraced smart growth and pedestrian-oriented development principles. Marked by a change in development patterns from separated land uses to more walkable, connected, mixed-use neighborhoods, Suwanee became a leader for this type of development and is known for its sense of place.

It seems unbelievable, but when the last Comprehensive Plan was completed, Town Center was far from complete. The park was completed, the Shadowbrook neighborhood was built, and some of the mixed-use buildings were under construction. Since then Town Center has been fully built-out with a modern City Hall at the center of what has become Suwanee's center of activity as it was envisioned. Town Center hosts over 40 events every year and truly functions as Suwanee's living room where residents congregate for weekly running clubs, corn hole leagues and seasonal farmers markets.

The long range vision is a thriving downtown surrounding Town Center Park and preservation of established single family neighborhoods to enhance quality of life for Suwanee's residents. Looking forward to the next 20 years, Suwanee is ready to progress - expanding Town Center across Buford Highway with a new park west of the railroad tracks and reconstructing Buford Highway to be the very important seam that will bind the two sides together making downtown Suwanee a cohesive place. After years of planning, Buford Highway reconstruction is underway. The highway, once completed, will transform into the main street of downtown Suwanee. The purpose of the project is to keep Buford Highway as a two lane road and enhance it with elements like, on-street parking, street trees, wide sidewalks, and bike lanes, so that it becomes a pedestrian friendly seam to the two sides of downtown instead of a divider as would likely occur if converted to four lanes. Buford Highway will extend Town Center style development down Buford Highway to a roundabout at Russell Street that will improve traffic and create a gateway into both Old Town and Town Center. The expansion of Town Center west of the railroad tracks with the development of a new park will further unify the two sides and complete the physical connection of Town Center and historic Old Town.

Another catalyst is the extension of Town Center down Buford Highway with a new mixed-use project south of Town Center. This project will bring more vitality and residents to Town Center, more restaurants and night life to Buford Highway, and accomplish a long-term goal of the City, which is to bring new life to Old Town, Suwanee's original center. These projects are expected to increase interest in Old Town and development along Buford Highway. The growth strategies outlined in the 2040 Plan anticipate these changes and thoughtfully outline how and where Suwanee should grow over the next 20 years.

The needs and opportunities assessment for the 2040 Plan analyzed existing conditions, demographic and market trends, and community input through focus group interviews, an online survey, three public open houses, and a series of steering committee meetings. This process identified several issues that became a focus of the plan and its recommendations. These issues include the need for more people to support more unique restaurants and entertainment venues, the desire for compact walkable communities that preserve open space, a strong desire and need for medium to high-rise office in Suwanee Gateway, and acknowledgement of changes to the retail market and the effect that has on potential development and land use.

These needs align with Suwanee's maturity level as a city. There are few large tracks of land left for more low density, single family detached neighborhoods. Undeveloped land and redevelopment opportunities are in locations with high land values. The plan calls for most future development in Suwanee to be infill medium density housing other than a few strategic locations designated for future multifamily. Market demand for medium density housing combined with the characteristics of developable land are factors that contributed to an increase in townhome construction in Suwanee. There is now a desire and need for other forms of medium density housing, particularly types that can better accommodate Suwanee's growing empty nester and senior population.

While the residential market has recovered well and Suwanee continues to be an attractive place for residential development due to the quality of life that comes with high performing schools, an abundance of parks and open space, walkability, sense of place, and a unique community identity, the market for retail is limited to services or lifestyle centers that provide an experience beyond shopping. The result is commercial that is more of an amenity. The strategy for 2040 is to: 1) focus commercial at key intersections where it will likely be more successful and 2) allow arterial corridors to develop with less intense uses, such as office-industrial or medium density residential.

The 2040 Vision Statement paints the picture of what Suwanee should be in the year 2040. It was very intentionally crafted by the 2040 Plan participants and vetted in public open houses throughout the planning process.

The City is divided into 11 character areas, where existing and desired development are similar. Building on the overall Vision for the City, the goals and specific growth strategies for each character area are specifically defined in the character areas section of the plan.

The Community Work Program lists specific action items to accomplish these goals. The work program is updated annually by City Council as action items are accomplished.

Suwanee 2040 Plan EXECUTIVE SUMMARY

# **COMMUNITY VISION**

Vision Statement Character Areas Future Land Use

# **VISION STATEMENT**

Suwanee 2040 will be a safe, fun, attractive, inclusive, evolving city with a unique, vibrant downtown that is well-connected to established neighborhoods and commercial/employment opportunities. Neighborhoods farther from downtown will be largely suburban, while development types closer to downtown will be taller, denser and highly walkable. Town Center will be the city's economic, social, and cultural hub. Historic Old Town will be characterized by a mixture of old and new quaint smaller scale development integrated into the existing traditional fabric. Suwanee Gateway will serve local and regional commercial and employment needs. Established neighborhoods will continue to be an essential source of quality homes attractive to families. Art, parks, greenways and open space will be important elements for recreation and identity. Suwanee will continue to grow in a deliberate manner that enhances the city's varied communities and quality of life.

### **CHARACTER AREAS**

Character areas were established in the 2020 Comprehensive Plan as areas where traditional neighborhood development, including mixed-use centers and mixed-use villages, would be encouraged as focal points for growth in Suwanee. The 2030 Comprehensive Plan expanded this concept by dividing the entire city into character areas based on areas that were similar in character. These character areas included areas that were intended to change to absorb growth as well as areas that should be preserved. Developing growth and preservation goals and strategies tailored to each area has allowed the City to strengthen the unique character of areas like Old Town, channel commercial growth into mixed-use centers like Town Center, and preserve existing neighborhoods. The 2040 Comprehensive Plan has 11 distinct character areas. Each of these character areas and the corresponding vision and goals are described within this chapter. Notable changes to character areas from the 2030 Comprehensive Plan are highlighted below.

### **Town Center Character Area:**

The Town Center boundary was expanded to the northwest due to the planned expansion of Town Center Park on the west side of the railroad tracks. The new boundary incorporates the proposed park along with land around it that has potential for compatible higher density mixed-use development within walking distance. This includes a large tract of vacant land adjacent to Kroger that was previously in the PIB Character Area.

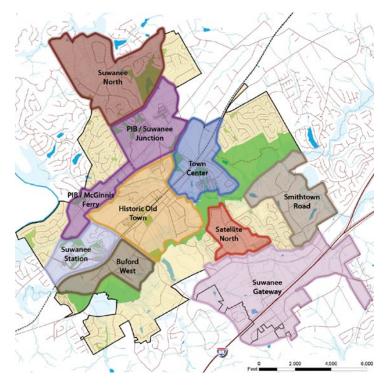

FIG. 1 2030 COMPREHENSIVE PLAN CHARACTER AREA MAP

### **Brogdon Road Character Area:**

A new character area was carved out of the original Town Center Character Area. This small, successful industrial area along Brogdon Road contributes to the economic base for the City and should be preserved. The industrial nature of this area is not compatible with Town Center, nor directly connected to Town Center. The remaining underdeveloped parcels in this area are more suited to industrial uses than mixed-use.

### **Buford Highway Subarea:**

The reconstruction of Buford Highway as a city street is identified as a catalyst project in the 2015 Downtown Suwanee Master Plan. The plan calls for the mixed-use character of Town Center to continue south down Buford Highway to the future roundabout at Russell Street. However, there was an intentional decision during the planning process to maintain the boundary between the Town Center Character Area and the Old Town Character Area. Buford Highway should not belong to either but be the connector that ties the two areas together.

### Suwanee Station Influence Area:

The Buford West Character Area is a successful industrial area that should be preserved as industrial. The portion of the Buford West Character Area that is adjacent to the Suwanee Station Character Area should remain industrial. However, when commuter rail or other transit comes to Suwanee Station in the future and the station area is developed, it would be logical for this portion of the Buford West Character Area to be developed as a higher density Mixed-Use Center to add residential and commercial uses conducive to supporting transit. The Suwanee Station Influence Area acknowledges that the City intends for this to be part of the larger transit oriented development, but not until transit is progressing in Suwanee Station.

### Satellite Boulevard Character Area:

The Satellite Boulevard Character Area replaces the Satellite North Character Area. It includes the primarily office/industrial area along Lawrenceville-Suwanee Road that was in the Satellite North Character Area and adds parcels that front Satellite Boulevard and were previously included in the Suwanee Gateway Character Area. These parcels are mostly developed with office, warehouse, and light industrial uses. They contribute to the industrial base of the City's economy. This corridor should be preserved as industrial. Commercial should be limited to key intersections where it can be successful. This change helps clarify and strengthen the strategy for the Suwanee Gateway Character Area as a primarily commercial area intended for higher intensity commercial and office uses.

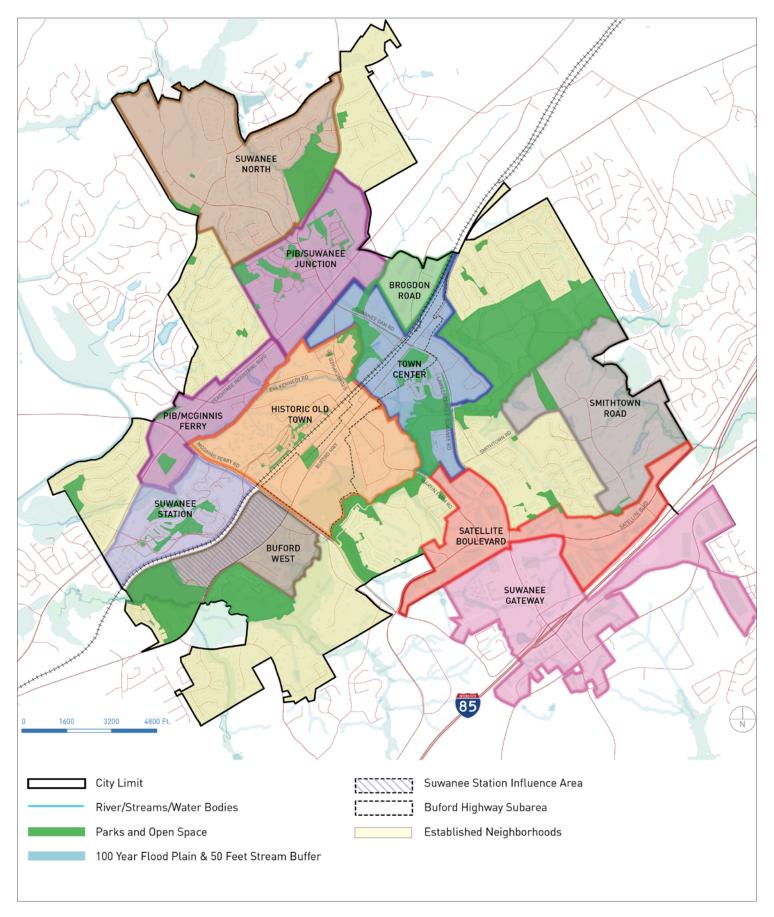

FIG. 2 UPDATED CHARACTER AREA MAP FOR 2040 PLAN

### FRAMEWORK PLAN

A framework plan was created as a part of the process for developing the 2040 Plan. The framework plan highlights tracts that are likely to be developed or redeveloped within the planning horizon. It then designates appropriate uses and residential densities for all identified development opportunities based on the goals and development strategies for each character area. These density designations were established through a series of workshops with the steering committee determining desired growth levels for different parts of the City and appropriate locations for low, medium, and high density. The framework plan shows desired future connections that tie the different character areas together.

Potential development and redevelopment opportunities are located mostly in the downtown core around Town Center and along major corridors including Buford Highway and the node at Peachtree Industrial Boulevard and Suwanee Dam Road. In Suwanee Gateway there are development opportunities for high density office as well as large redevelopment opportunities that will require more land assemblage and creative, high intensity, master planned development.

Uses designated include residential, mixed-use, commercial, parks, industrial, and special development. Special development designation identifies redevelopment or adaptive reuse opportunities that may require creative solutions or be triggered by special users. The framework plan recommends appropriate densities for mixed-use/residential parcels.

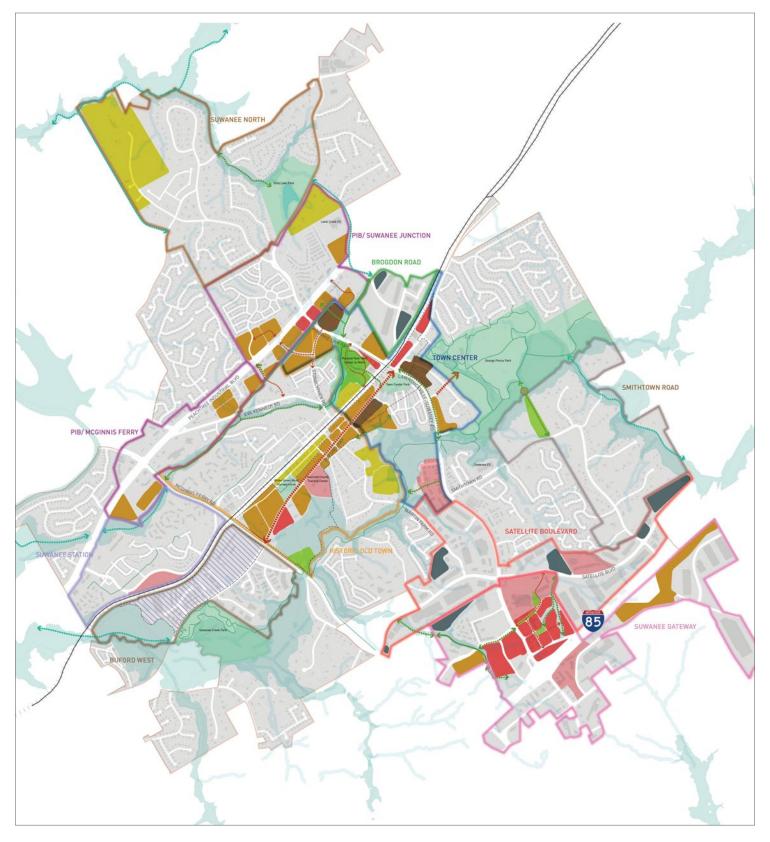

FIG. 3 FRAMEWORK PLAN

### **TOWN CENTER CHARACTER AREA**

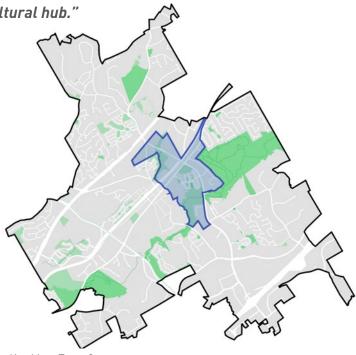

"Town Center will be the city's economic, social, and cultural hub."

Town Center exceeded expectations of creating a sense of place and community identity for Suwanee. Anchored by Town Center Park, City Hall, and development with mixed-use buildings with residential above retail, Town Center emerged as the civic heart of the City where numerous local and regional events are held every month. It continues to function as a catalyst for additional mixed-use development in the surrounding area.

Town Center is characterized by high quality multi-story mixeduse buildings fronting public spaces with neighborhoods of medium density, small lot single family homes and townhomes. Adjacent uses are connected by a network of local streets lined with sidewalks and street trees that create a series of small blocks.

- The original 23 acre Town Center development should be the model for future development within the Town Center character area.
- New mixed-use development across Lawrenceville-Suwanee Road and down Buford Highway toward Russell Street should be similar in nature to that flanking City Hall.
- Buildings should be tall near Town Center and step down to medium density farther from Town Center.
- Extend Suwanee Avenue into George Pierce Park.
- Investigate opportunities to provide affordable housing in Town Center.
- Consider opportunities to link Town Center Park to more remote neighborhoods and other activity centers.

Key Map: Town Center

Urban-style mixed use/residential development

Mix of urban and traditional style residential condo/townhomes

Small lot and cottage-style residential

Corner market and sidewalk cafe/restaurant

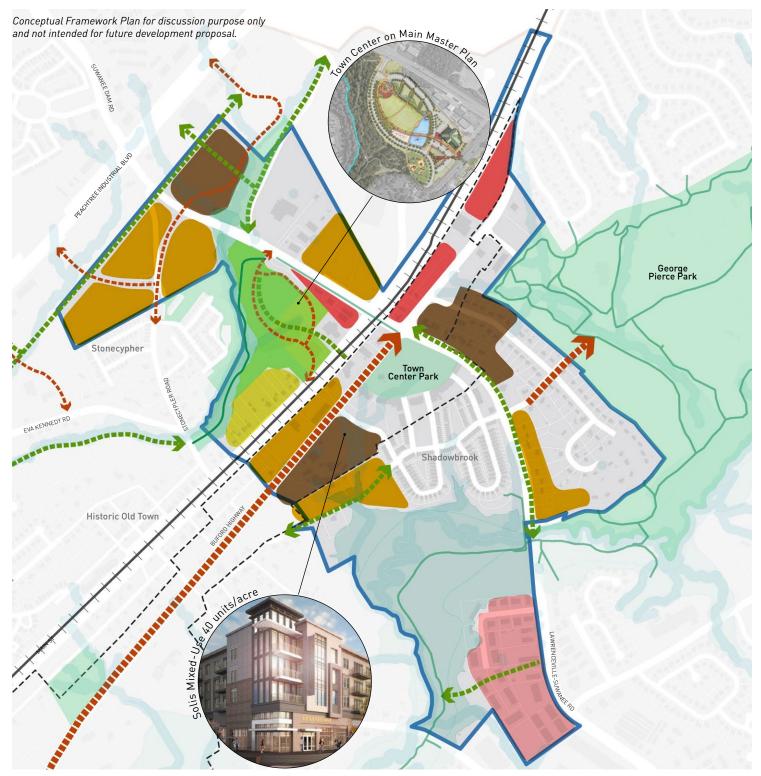

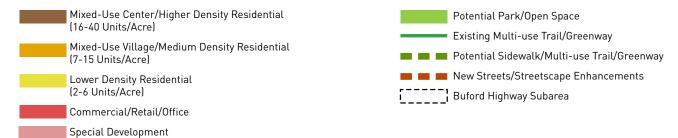

FIG. 4 TOWN CENTER CHARACTER AREA DEVELOPMENT FRAMEWORK

### **Town Center Future Development**

Town Center is the appropriate place for any new high density residential uses. It is well suited to accommodate density because of the concentration of passive open space, pedestrian and bicycle facilities, and retail and restaurants. Multi-family will be developed in mixed-use environments similar to Town Center reducing the need for car trips by locating services, restaurants and jobs near higher density residential often in the same building. Increasing the number of residents in Town Center will enhance the chances of successful commercial uses in Town Center. However, the city should be prepared to take steps to mitigate market challenges that prevent the downtown area from successfully attracting uses that contribute to vibrancy.

Planned roundabout at Buford Highway and Russell Street

The 2030 Comprehensive Plan and the 2015 Downtown Suwanee Master Plan called for the style of development surrounding Town Center Park to be extended to the north, west and south along Buford Highway. Buford Highway is undergoing reconstruction that will transform and further define Town Center. The new Buford Highway will be a city street with wide sidewalks, street trees, pedestrian lighting, on-street parking, and bike lanes.

The development underway south of Town Center will help implement the goal of expanding Town Center to the south along the east side of Buford Highway. It will extend almost to a planned roundabout at Russell Street serving as the gateway for Town Center and Old Town. This mixed-use project with four-story building is an example of the expectation for new development or redevelopment along Buford Highway between Lawrenceville-Suwanee Road and Russell Street. Buildings should sit close to the sidewalk with ground floor residential units providing entrances connected directly to the Buford Highway sidewalk. Parking should be located behind buildings.

Buildings along Buford Highway should create an engaging street wall adding interest and vitality to the pedestrian environment. Where buildings front an internal greenspace,

Planned mixed-use development along Buford Highway south of Town Center

such as a mews, the edge of that greenspace should provide that same engaging edge with walls of high quality materials, low walls for sitting, or steps into the greenspace. Buildings may setback from the sidewalk to make space for sidewalk cafes, plazas or small park spaces along the sidewalk.

Planned senior living facility along Suwanee Dam Road

City and County facilities currently occupy the west side of Buford Highway across from Town Center. As City and County needs outgrow existing facilities, some of these facilities could relocate. These would present opportunities to adaptively reuse buildings. Restaurants, breweries or other similar entertainment or cultural establishments that would bring more night life to Town Center are encouraged. As with other urban areas, land is at a premium, so shared parking strategies are encouraged between adjacent uses that experience peak usage at different times of the day. Redevelopment is encouraged to create infill buildings, small pocket parks, or plazas between existing buildings and the new Buford Highway sidewalk to create a more engaging pedestrian experience along these properties.

Across from Town Center, on Lawrenceville-Suwanee Road there are a few small commercial buildings, a convenience store with gas pumps, and some single family ranch houses dating roughly from the 1950s and 60s that present an opportunity for redevelopment. Development on this corner should be similar in nature to the buildings flanking City Hall but set back from the right-of-way to allow for a plaza that mirrors the hardscaped edge of Town Center Park. Streets in this area should be extended to connect to George Pierce Park as appropriate.

Illustrative plan from 2015 Downtown Suwanee Master Plan

The Town Center Character Area includes Main Street from Stonecypher Road to Suwanee Dam Road. This section of Main Street is characterized by a mixture of small cottages and some larger homes. Many of these lots have multiple accessory buildings per lot arranged in a rural or organic pattern as these properties have been improved over time. The character of this area should be preserved as it is reminiscent of Suwanee's history as an agrarian railroad town. Infill development should reinforce this historic character and development pattern.

A new park is planned on approximately 20 acres the City acquired as part of the Open Space Initiative in 2002. This park will expand Town Center to the west side of the railroad tracks and incorporate three existing community assets: Playtown Suwanee, a unique playground built by volunteer efforts of residents; the Suwanee branch of Gwinnett County Public Library, which will become a focal point of the new park much like City Hall is a focal point of Town Center; and the newly constructed Brushy Creek Trail, which will remain

in the natural wooded edge of the park. Main Street will be realigned to curve into and through the new park making a safer connection with Suwanee Dam Road at an existing traffic signal. The pedestrian tunnel beneath the railroad tracks will exit into a plaza on both sides making a physically safer and visually stronger connection between the two sides of Town Center. The connection will be strengthened by the redesign of City Hall Park between Buford Highway and the pedestrian tunnel.

Master plan for new park

The area northwest of the planned park belongs in the Town Center Character Area due to the impending development of the park. The park will likely attract development and redevelopment interest on the land that surrounds it. Restaurants or other entertainment venues or retail would be appropriate uses adjacent to the park as they would bring vitality to the park just as the same uses do to Town Center Park. Several buildings along the park edge could be adaptively reused to create unique commercial locations taking advantage of park frontage. Medium density residential or mixed-use buildings with residential over commercial would be appropriate as well. Development in this area should be of high quality reflective of the significant investment the City is making in the park, and it should be compatible with urban design and development patterns found in Town Center. New residential development adjacent to Old Town should consider its context and transition down in density.

### PEACHTREE INDUSTRIAL BOULEVARD CORRIDOR

The Peachtree Industrial Boulevard Corridor (PIB) Character Area includes most of the length of the corridor within the City limits. It generally runs one parcel deep, but widens to follow a power easement roughly parallel with Peachtree Industrial Boulevard. The character area expands at the two primary intersections, McGinnis Ferry Road and Suwanee Dam Road, to include the commercial at these nodes as well as the planned mixed-use developments of Village Grove and Three Bridges at Suwanee Dam and Suwanee Walk at McGinnis Ferry Road. Village Grove and Three Bridges demonstrate the desired horizontal mixed-use pattern that is intended for the area. This type of development locates neighborhood services in proximity to adjacent office and/or residential and links them with sidewalks.

Development within the corridor is well connected via interparcel connectivity with the goal of reducing the number of curb cuts on Peachtree Industrial Boulevard and allowing travel from one parcel to another without using the arterial. This makes local trips more efficient and reduces traffic on Peachtree Industrial Boulevard. While older commercial development along the corridor is auto-oriented with individual curb cuts for each development, new commercial is focused at the two primary intersections as commercial has been less successful further away from the intersections.

### Peachtree Industrial Boulevard Goals

- Convert vacant and underutilized commercial property along the corridor or behind existing commercial to medium-density residential and/or mixed-use with neighborhood retail and direct more intensive commercial uses into the nodal areas surrounding the intersections at McGinnis Ferry and Suwanee Dam Road.
- New residential should be developed using traditional neighborhood design principles and a diversity of housing types. Development should take into account adjacent development similar to Village Grove.
- Explore creating a new multi-use trail paralleling the corridor along the power easement.
- Promote interparcel connectivity between adjacent development.
- New development should include streets that improve mobility and connectivity between Stonecypher and Eva Kennedy Road to Peachtree Industrial Boulevard and Suwanee Dam Road. New streets should be designed to encourage low vehicular speeds and make use of traffic calming measures.
- Study the possibility of adding signalized intersections around the Suwanee Dam commercial node to facilitate safer and more frequent pedestrian crossing.

### **Future Development**

The Peachtree Industrial Boulevard/Suwanee Junction node at Suwanee Dam Road extends to the city limits to the north at Tench Road including an undeveloped parcel at the corner of Tench Road. 48 acres of undeveloped land is located near the southeast corner of the PIB/Suwanee Dam Road intersection. Part of this land is within the character area. These undeveloped tracts should be developed as mixed-use villages similar to Village Grove and Three Bridges with commercial uses closer to the intersection and transitioning to residential uses adjacent to existing residential. Development should incorporate new streets to connect to adjacent parcels and existing roads.

During the last comprehensive plan update in 2007, just before the bubble burst, Peachtree Industrial Boulevard was expected to continue to grow as a retail and office spine. With nodes at key intersections developing into regional retail destinations. The post-recession economy presents less opportunity for retail and office uses in general because retail and office uses are looking to locate in lifestyle centers. With the option of online shopping, many people are choosing to shop only when and where there is a unique environment or experience other than just shopping. As a result, commercial uses that are locating in local centers tend to be more service oriented such as restaurants, salons, and medical offices.

Future development should encourage commercial near the two key intersections and discourage spotty commercial in between these nodes where it is less likely to be successful. The Kroger site could be intensified using excess parking areas to bring more commercial to the Suwanee Dam commercial node. These nodes are appropriate for larger-footprint

Urban-style mixed use/commercial/retail

Mix of urban and traditional style residential/condo/townhomes

Small lot, accessary units and cottage-style residential

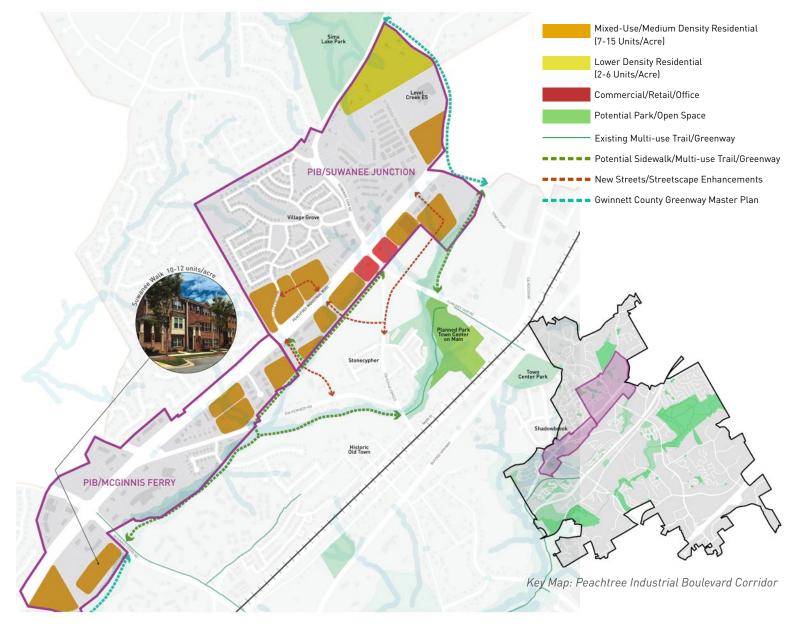

FIG. 5 PIB/SUWANEE JUNCTION AND PIB/MCGINNIS FERRY CHARACTER AREAS DEVELOPMENT FRAMEWORK

commercial buildings, however these should be arranged in a series of blocks in a network of pedestrian friendly streets.

Existing underutilized commercial property between the two nodes should be considered for redevelopment with less intense uses such as medium density residential or office with or without limited neighborhood serving retail. New residential is also appropriate behind existing commercial fronting Peachtree Industrial Boulevard. Development should have diverse housing options as appropriate to the adjacent context, including small lot single family detached homes, townhouses, and small buildings with stacked flats. Residential development should be well connected to the commercial property.

New development and redevelopment should design smaller, more dispersed parking; landscaped pedestrian walkways with intermittent plazas and pocket parks; a mix of uses or housing types, and buildings with quality materials and architectural detailing. Every attempt should be made to promote interparcel connectivity, both pedestrian and automotive, along the entire corridor, whether as part of new construction or retrofitted to existing development.

The framework plans for the PIB Corridor character area in Figure 5 as well as the framework plan from the 2030 Comprehensive Plan in Figure 6 illustrate the concept for the node at Peachtree Industrial Boulevard and Suwanee Dam Road. More intense commercial should be focused at the intersection where it will be more successful. Surrounding uses further from the intersection should be mixed-use or residential.

Figure 7 illustrates how the node at Suwanee Dam Road and Peachtree Industrial Boulevard could be developed in a manner consistent with the goals of the PIB Corridor. This node is adjacent to Suwanee's planned expansion of Town Center Park. The area illustrated overlaps these two character areas, Peachtree Industrial Boulevard Corridor and Town Center, and shows desired connections between the two including the realignment of Stonecypher Road to intersect with Suwanee Dam Road at an existing median break.

FIG. 6 PIB TARGET AREA DEVELOPMENT FRAMEWORK (2030 COMPREHENSIVE PLAN)

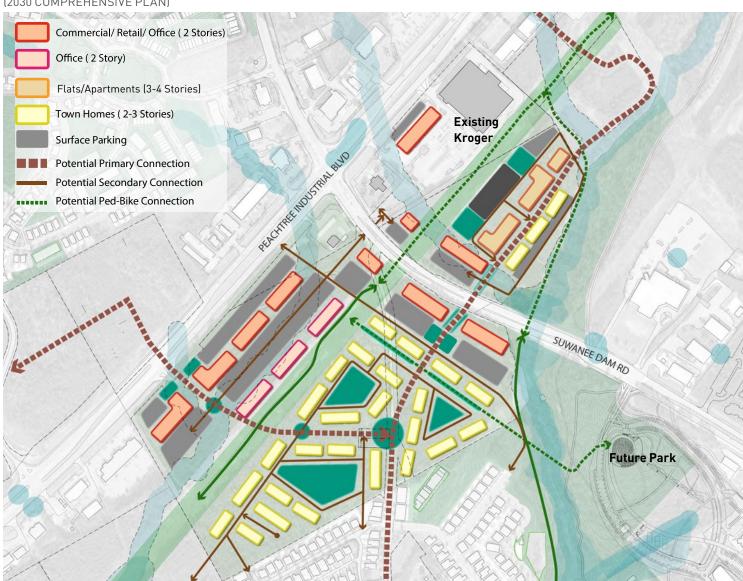

FIG. 7 PIB TARGET AREA DEVELOPMENT FRAMEWORK

Figure 8 shows approximately 300,000 square feet of commercial within two-story commercial buildings along Peachtree Industrial Boulevard and Suwanee Dam Road including some potential liner commercial buildings at the edges of Kroger's parking lot. A higher density mixed-use center is illustrated on the northeast corner. This includes approximately 250 multifamily units within a four story building behind commercial with pedestrian connectivity to the adjacent Kroger site. The southeast corner shows an approximately 200 unit horizontal mixed-use village neighborhood. This medium density residential development should function similarly to Three Bridges and Village Grove with a variety of housing types behind office and commercial.

Traditional neighborhood design principles should be used to create a series of walkable blocks and tree and sidewalk lined streets to allow residents to walk to the commercial node at Peachtree Industrial Boulevard and Suwanee Dam Road. New development should connect to surrounding neighborhoods making the commercial node accessible to Old Town residents as well. The street network of each of these corners should connect to both Suwanee Dam Road and Peachtree Industrial Boulevard. If feasible, a direct connection should be made to the new park as well.

FIG. 8 POTENTIAL FUTURE DEVELOPMENT

### HISTORIC OLD TOWN CHARACTER AREA

"Historic Old Town will be characterized by a mixture of old and new quaint smaller scale development integrated into the existing traditional fabric."

The Old Town Character Area is the historic downtown for the City. Old Town has a quaint character that serves as the foundation for Suwanee's identity and is valued as a cultural resource. The character area is bisected by Buford Highway, which serves as a seam between the east and west sides of Old Town and the connection to Town Center. Together Town Center and Old Town comprise Suwanee's downtown.

In 2013, Suwanee's historic district was listed in the National Register of Historic Places with 40 contributing buildings. Suwanee's historic district includes Main Street, Stonecypher Road, Scales Road, Russell Street, and White Street. Being on the National Register of Historic Places does not require the preservation of historic structures within the district or limit renovation, however it can assist property owners in the restoration of Suwanee's historic structures by making them eligible for historic tax credits.

The character of historic Old Town has evolved from a century of small town growth. The historic heart of the City is along Main Street, originally the site of the 1871 Georgia Air Line railroad depot and the line of adjacent storehouses that burned in a fire in 1881. Today the depot is gone and the storehouse sites contain small commercial buildings including retail and office space. The blocks surrounding the Main Street commercial area continue the quaint feel with historic churches and homes on roads lined by hedgerows and fences. There is an out of character metal industrial building at the end of Main Street along the railroad that houses a business that opened in the 1970's. Old Town is also home to White Street Park, which includes Harvest Farm, Suwanee's community garden, and an orchard.

The rest of the west side of Old Town is primarily made up of historic homes and a mixture of homes built in the 60s, 70s, and 80s on large treed lots. These large lots and small roads throughout Old Town contribute to the area's small town feel and keep traffic in the area calmed. Many lots have accessory buildings including barns, garden sheds, or accessory dwelling units. Stone embankments, picket fences, and small gardens add to the character. The east side of Old Town has a few historic homes closer to Buford Highway and a mixture of homes from the 60s, 70s and 80s on medium sized lots.

There are four contemporary neighborhoods within Old Town: Stonecypher, Old Suwanee, and Brushy Creek on the west side, and Suwanee Green on east side off of Martin Farm Road. A fifth neighborhood is under development off White Street. With the exception of Brushy Creek, these neighborhoods were all planned developments that incorporate pedestrian-oriented

design with small lots, usable front porches, sidewalks, street trees, and a mix of housing types for multi-generational living. These neighborhoods are examples for future development that might occur in Old Town.

Old Town also includes a large garden style apartment complex accessed from Scales and McGinnis Ferry roads that is not consistent with the character of Old Town but is connected to the street network of Old Town and within walking distance to the Old Town commercial area.

### **Future Development**

Old Town is experiencing a period of reinvestment. Empty nesters and young families are attracted to the walkability and unique character that Old Town offers. Many are also attracted to affordability that some of the older, smaller houses provide.

Commercial is also beginning to blossom in Old Town. Main Street commercial is fully occupied with local businesses, and three historic buildings have recently been renovated for new businesses. In 2014, the Rhodes House on Russell Street, which was once a railroad hotel and boarding house, was restored by an internationally acclaimed violin maker. Currently, two of Suwanee's oldest landmarks are being renovated along Main Street. The City purchased Pierce's Corner in 2005 to preserve one of Suwanee's oldest buildings. The City is currently renovating the building to sell to a restaurateur. The building behind Pierce's Corner, Suwanee's old post office, was recently renovated to be used as a law office. These public and private investments will add vibrancy to Old Town while preserving historic resources.

Development in Old town requires sensitivity to existing residents. Although there is a desire to increase residential

### Urban-style mixed use/commercial/retail

Mix of urban and traditional style residential condo/townhomes

# Small lot and cottage-style residential

opportunities in the area, there are no large tracts of land available that would accommodate new neighborhoods. The growth strategy for Old Town should be carefully-crafted, creative infill responding to and enhancing the historic scale and unique small town character of Old Town. Overall preservation of historic structures and landscapes is encouraged. Infill residential within the historic district needs to be well designed and constructed and is encouraged to be compatible with the Old Town Design Guidelines established in 2002 to complement existing architectural styles. The area around Main Street should be reinforced with compact and compatible development.

Land use in Old Town should remain predominantly single family. However, multiple residential structures on one lot should be permitted and encouraged. Adding accessory dwelling units can create housing opportunities in Old Town without compromising and if done well even enhancing the character. New homes could be added to the rear of larger lots with shared driveways.

Subdivisions of larger parcels or assemblage of lots for redevelopment are acceptable at certain locations, but should be accomplished in a way that is sensitive to the area and enhances the existing character rather than replacing it. New development should preserve the random spacing of existing lot frontages, a key aspect of the area's character. This could be accomplished by placing new units toward the rear of lots behind existing homes and using shared drives to minimize building density along Suwanee's older historic roads. New development should also aspire to save significant old growth trees and be sensitive to the scale of adjacent buildings and roads.

Development in Old Town should encourage mobility and walkability with new sidewalks where needed and road improvements or extensions to provide street network connectivity to adjacent character areas and increase the local street network to disperse traffic.

There are challenges to infill development in Old Town. Some lots could be subdivided to create infill opportunities, except that this type of development requires sewer and most of Old Town is still not served by sewer. The cost to extend county sewer lines is usually not practical for only a few lots. Opportunities to extend sewer into unserved areas of Old Town should be explored. This includes allowing contextually sensitive infill developments that would extend sewer into the area.

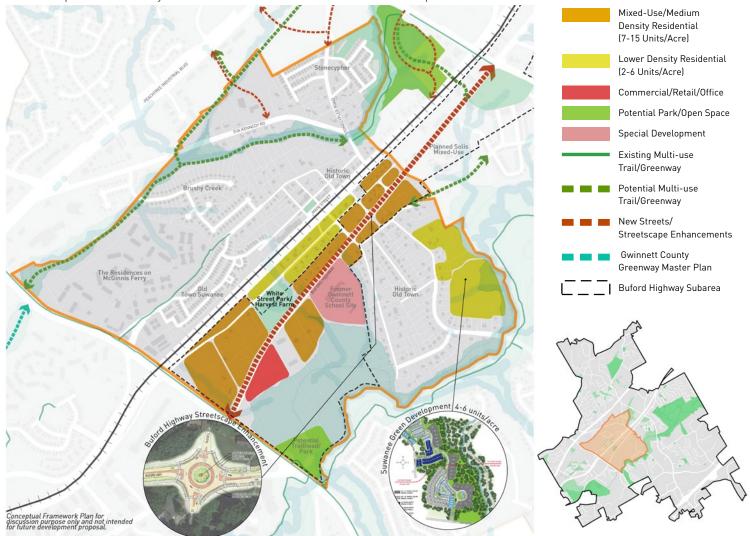

FIG. 9 HISTORIC OLD TOWN CHARACTER AREA DEVELOPMENT FRAMEWORK

Key Map: Historic Old Town

### Historic Old Town Goals

- Create a gateway into Old Town from Buford Highway at Russell Street around the planned roundabout with medium density mixeduse development.
- The parcels adjacent to Buford Highway from Town Center to McGinnis Ferry Road should allow for medium density residential and mixed-use development to capitalize on the City's planned investment in the Buford Highway multimodal and streetscape improvements. This area is called the Buford Highway Subarea.
- New development beyond the Buford Highway Subarea should be limited to infill development that preserves the existing quaint character of the City's historic core.
- New development should be sensitive to existing lot character, tree cover, and proportions and scale of adjacent buildings and roads.
- Evaluate the provision of senior housing in the Old Town area and identify potential locations/ strategies for increasing opportunities if needed.
- Encourage mobility and walkability with new sidewalks or multiuse trails where needed and road improvements or extensions to provide street network connectivity to adjacent character areas.

### **BUFORD HIGHWAY SUBAREA**

The Buford Highway Subarea includes all the parcels that front Buford Highway from Lawrenceville-Suwanee Road to McGinnis Ferry Road. The subarea overlaps the Town Center and Old Town Character Areas.

# **Future Development**

The reconstruction of Buford Highway as a city street is expected to be a catalyst for redevelopment along Buford Highway. Parcels fronting Buford Highway should be developed with primarily medium density residential/mixed-use development that engages the new wide sidewalk and contributes to a vibrant downtown. Where parcels are too small to accommodate a mix of uses, high quality medium density residential should be allowed.

The Buford Highway reconstruction includes a roundabout at the intersection with Russell Street. This roundabout should be surrounded by mixed-use development that will serve Old Town and act as a gateway into Old Town.

The Buford Highway Subarea acknowledges that development along Buford Highway will be different than that which is prescribed for the rest of Old Town. Although still a part of the Old Town Character Area, buildings along Buford Highway should create an engaging street wall that adds interest and sense of vitality to the pedestrian environment. Ground floor residential units should provide entrances connected directly to the Buford Highway sidewalk. Where buildings front an internal greenspace such as a mews, the edge of that greenspace should provide that same engaging edge with walls of high quality materials, low walls for sitting and/or steps into the greenspace. Buildings may setback from the sidewalk to provide sidewalk cafes or plazas along the sidewalk. Parking should be located behind buildings.

### SATELLITE BOULEVARD CHARACTER AREA

The Satellite Boulevard Character Area includes the primarily office-industrial area along Lawrenceville-Suwanee Road and the parcels that front Satellite Boulevard. These parcels are mostly developed with office, warehouse, and light industrial uses, which are operating successfully and providing a good industrial base for the City's economy. A fully developed commercial node anchors the corners of the intersection of Lawrenceville-Suwanee Road and Satellite Boulevard.

### **Future Development**

This corridor should be preserved as office-industrial and commercial should be limited to key intersections where it can be more successful.

There is an existing multistory commercial building along Satellite Boulevard further from the intersection that has not been a successful commercial project. It continues to have high vacancy rates and is currently occupied by non-commercial uses such as religious institutions. This tract is labeled as a special development because the site needs a creative use that can adaptively reuse the building and site.

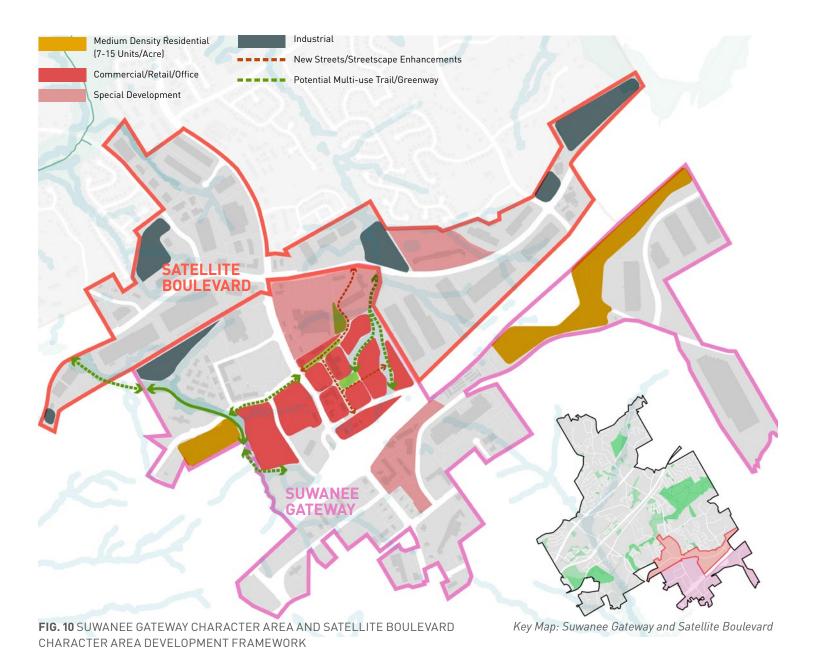

# **SUWANEE GATEWAY CHARACTER AREA**

"Suwanee Gateway will serve local and regional commercial and employment needs."

The Suwanee Gateway Character Area includes the four quadrants of the I-85 interchange including the recently developed Terraces at Suwanee Gateway and the land that parallels I-85 on the east side of the interstate. Suwanee Gateway contains numerous obsolete and antiquated building types and forms particularly older generation motels that are eyesores and frequent locations for crime. These existing uses stunt the redevelopment potential of the area.

The Terraces at Suwanee Gateway is a mixed-use center in the southwest quadrant of the Gateway that includes a five story office building, commercial, retail, restaurants, multifamily, single family attached homes, an entertainment venue, open space, and a physical rehabilitation facility. The development includes a network of new blocks and streets that tie all the

uses together via tree and sidewalk lined roads that access Lawrenceville-Suwanee Road and McGinnis Ferry Road. The road between these two arterials also serves as a local alternative to other north-south arterials in the City. This is an example of a well planned mixed-use development although the expectation is for redevelopment in the future to be more intense and more pedestrian oriented.

# **Future Development**

Suwanee Gateway continues to be a target area for redevelopment. Redevelopment in this area presents an opportunity to visually improve Suwanee's front door. New development should create a strong, positive image of the City that is forward looking and progressive. It is anticipated that the most intensive non-residential growth and development

in the City will occur within the Gateway. The goal of major redevelopment in the Gateway is economic development that increases and diversifies employment opportunities over time.

Suwanee Gateway is the appropriate location for high density office and mid to high-rise buildings within the City. Proximity of the I-85 interchange and other major roadways make this node is a regional activity center that can accommodate uses that have both a local and regional draw. Future land use should be dominated by office and commercial mixed-use with retail and hospitality capitalizing on the improvements as complementary high quality amenities to office and commercial. The Terraces at Suwanee Gateway has undeveloped tracts that are already zoned for mid-rise office. These should be preserved for future office opportunities.

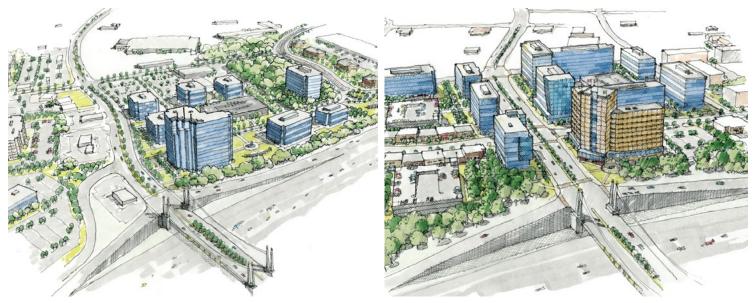

FIG. 11 ILLUSTRATIVE GATEWAY DEVELOPMENT (2030 COMPREHENSIVE PLAN)

**FIG. 12** POTENTIAL TARGET AREA REDEVELOPMENT PLANS FOR THE NORTHWEST QUADRANT SHOWING NEW STREET NETWORKS

### **Suwanee Gateway Goals**

- Present a strong, positive, forward-looking and progressive image of the City.
- Be a regional hub.
- Future land use should be dominated by corporate and professional office supported by commercial mixed-use, retail, and hospitality.
- New residential should be part of a larger mixed-use development similar to the Terraces at Suwanee Gateway and should eliminate uses that present barriers to residential uses.
- Allow higher intensity and mid-rise development and redevelopment projects.
- Incorporate new parks and plazas in future development.
- Create new local street networks as part of development and redevelopment.

Potential Development Character

The northwest quadrant of the Gateway is a major redevelopment opportunity that could potentially become the future home of a medical, educational or corporate campus. The area is made up of many parcels primarily occupied by older hotels, gas stations, strip centers, fast food restaurants, and vacant land. Developing the area as a planned mixed-use center would eliminate eyesores and present an opportunity to create a new sense of place. Redevelopment should replicate the type of connectivity found in the Terraces of Suwanee Gateway and incorporate retail, restaurants and commercial uses that serve local and regional users. This redevelopment could extend as far as Satellite Boulevard and incorporate struggling retail properties along Satellite Boulevard and Walmart to further connect to existing arterials. These tracts are labeled as

special development in the framework plan because there are a multitude of mixture of uses that could be considered in place of the struggling and aging uses in place at this time. Medium density residential could be appropriate in the Gateway to support other uses if it is part of such a mixed-use master planned project that eliminates some of the existing barriers to residential being successful in the area, such as older generation hotels that are attractions for crime.

The illustration below shows potential redevelopment of the northwest quadrant of Suwanee Gateway including over 2 million square feet of commercial, approximately 400 multifamily units, and a series of parks tied together with a trail system that makes use of the streams that run through the property. This trail system also ties into the street network creating pedestrian connectivity throughout the project. This desired street network includes two internal "main streets" that intersect, one aligning with Northolt Parkway and the other parallel to Lawrenceville-Suwanee Road. These streets should be lined with storefronts and sidewalks. Development should be focused along these internal streets and Sawmill Drive instead of Lawrenceville-Suwanee Road in an effort to create a pedestrian oriented development, however special attention should be given to the corner of Lawrenceville-Suwanee Road and Sawmill Drive and the intersection of Lawrenceville-Suwanee Road and the "main street" aligning with Northolt Parkway to create signature buildings that contribute to a positive impression at Suwanee's front door.

FIG. 13 POTENTIAL REDEVELOPMENT OF THE NORTHWEST QUADRANT SHOWING A MIX OF USES, AN INTERNAL "MAIN STREET", PARKS, AND PEDESTRIAN CONNECTIVITY

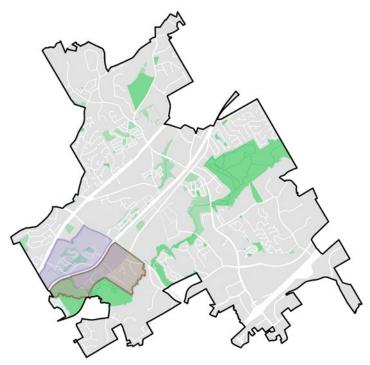

### **SUWANEE STATION CHARACTER AREA**

In anticipation of a commuter rail station, Suwanee Station was master planned as a mixed-use transit-oriented development (TOD) in the early 2000s. The plan included 1186 housing units, and commercial and office uses. Today 1107 housing units have been built including 2 multifamily developments, attached townhomes, and detached single family homes on small lots. Commercial uses have also been built along the edge of the character area fronting PIB, but no substantial commercial has been built within the TOD.

The Suwanee Station Character Area is characterized by relatively dense residential development, a mix of housing types and uses, and a connected, walkable street network.

# **Future Development**

The City owns the last undeveloped tract of land in the area. This 12-acre site along the Norfolk Southern railroad is reserved for a commuter rail station. When this station comes to Suwanee, this area will be developed as a mixed-use area with primarily non-resisdential uses.

Key Map: Suwanee Station and Buford West

Potential Development Character for Suwanee Station and Buford west

### Suwanee Station Goals

- Encourage a commuter rail line and station along the existing tracks.
- Provide a mix of land uses to capitalize on the proximity to the potential rail station.
- When a definite plan for a transit stop at Suwanee Station is known, the Suwanee Station Influence Area should be re-evaluated and master planned with the station area to determine the direction of future growth, which should then include medium and high density residential, office and mixed-use to support and maximize the benefit of transit for the most people and a connection either above or under the tracks.
- The City-owned land reserved for a future rail station should be developed with mixed-use buildings including office, residential, and supporting retail.
- Provide an opportunity for live-work units.
- Integrate green space into new developments.
- Create pedestrian and bicycle connections to surrounding development and multi-purpose trails to connect Suwanee Station to other areas of the City.

**FIG. 14** SUWANEE STATION AND BUFORD WEST CHARACTER AREAS DEVELOPMENT FRAMEWORK

### **BUFORD WEST CHARACTER REA**

As the name suggests, this character area lies on the west side of the City. Buford Highway runs through its center. The area is bound by the railroad tracks on the north, Suwanee Creek and Suwanee Creek Park on the south and west, and McGinnis Ferry Road to the east. This area is dominated by older light industrial uses including a large tract of land used by Southeastern Freight trucking. Non-industrial uses include some retail and commercial fronting Buford Highway, Suwanee Sports Academy, a church occupying a warehouse building, and a gas station.

### **Future Development**

There are no substantial vacant parcels within the area. Many industrial buildings in the area are aging and becoming inconsistent with industrial trends because of their small floor areas. These buildings may be adapted for other uses. However, industrial uses are performing well and serve as a good economic base for the City, so industrial use should be preserved as long as it is viable.

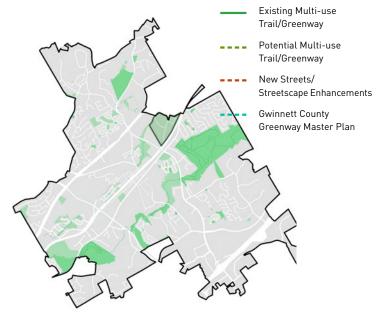

The southeast corner of Buford Highway and McGinnis Ferry Road was recently rezoned to allow for an assisted living facility. Construction on the facility has not started. If the project is not ever constructed, the land could be suitable for commercial uses.

### Goals

- Existing industrial land uses should be maintained and intensified as an essential part of the economic base for the City.
- Commercial should be limited to the intersection of Buford Highway and McGinnis Ferry Road.
- If the area begins to decline as a result of aging industrial buildings, then the City should explore redevelopment options for the future.
- When a definite plan for a transit stop at Suwanee Station is known, the Suwanee Station Influence Area should be re-evaluated and studied with the station area to determine the direction of future growth. Growth should then include medium and high density residential, office and mixed-use to support and maximize the benefit of transit for the most people and a connection either above or under the tracks to connect the two sides.
- Cooperate with Gwinnett County to extend the Suwanee Creek Greenway to other similar pedestrain facilities outside the city.
- Promote inter-parcel connectivity.

# **BROGDON ROAD CHARACTER AREA**

The Brogdon Road Character Area is comprised of parcels along Brogdon Road and Tench Road with good access to Peachtree Industrial Boulevard. This small cluster of successful light industrial facilities contribute to the City's economic base in a location that is tucked away just outside Town Center with little or no negative impact on downtown Suwanee.

Key Map: Brogdon Road

FIG. 16 BROGDON ROAD CHARACTER AREA DEVELOPMENT **FRAMEWORK** 

# **Brogdon Road Goals**

 Existing industrial land should be maintained, and vacant parcels should be developed with industrial uses that contribute to the economic base for the City.

# **Future Development**

The area is not likely to see redevelopment in the near future. Industrial in this area is successful and should be preserved. Vacant parcels should be developed with similar uses.

Brogdon Road currently aligns with Main Street at Suwanee Dam Road near the Norfolk Southern railroad tracks. Turns at this non-signalized intersection are difficult and dangerous. When the new park is constructed and Main Street is realigned with the signalized intersection further west, the Suwanee Dam Road median should be closed allowing only right turns to and from Brogdon Road.

# SMITHTOWN ROAD CHARACTER AREA

The Smithtown Road Character Area is characterized by large lot suburban single family detached residential development primarily built in the 1970s and 1980s. The north and east portions of this area are dominated by suburban homes primarily built in and before the 1980's on large lots served by septic tanks. Traditional suburban residential subdivisions developed in the 1990s are located to the southwest of the area where the lots are about half an acre in size and are serviced by sanitary sewer. The non-uniformity in construction materials and techniques imparts a special character and feel to these neighborhoods.

A newly constructed sidewalk from Lawrenceville-Suwanee Road to Satellite Boulevard connects the area to Suwanee Elementary School, George Pierce Park, and commercial development along Lawrenceville-Suwanee Road.

# **Future Development**

Future development in this area should be limited and should reinforce the existing suburban residential character. New residential lots should not be dramatically different than those already in the area. There is a tree farm located at the bend in Smithtown Road where it turns souths toward the interstate. This property is a possible candidate for development in the future. This should be developed as a detached single family residential neighborhood that is complimentary to the surrounding area. Development along Moore Road is a model for evolution and growth in this area.

### Smithtown Road Goals

- Maintain the suburban residential and institutional nature of the area.
- Transition smaller homes on larger lots to estate homes.
- Create new multi-use trails to connect to George Pierce Park, and Suwanee Creek Greenway.
- Promote inter-parcel connectivity.
- Develop as a safe residential haven with limited and slow traffic moving through the neighborhoods.

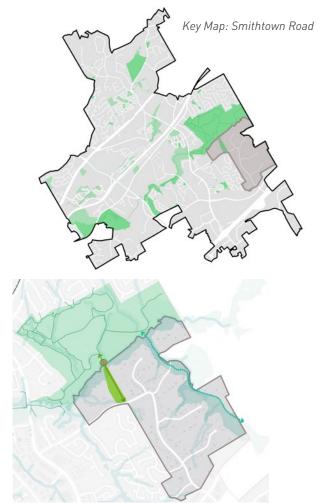

FIG. 15 SMITHTOWN ROAD CHARACTER AREA DEVELOPMENT **FRAMEWORK** 

### **SUWANEE NORTH CHARACTER AREA**

Suwanee North is located in the northern most portion of the City. Moore Road, Settles Bridge, and Meadowbrook Circle are the principal roads in this area. The area is dominated by low density, large lot, single family detached homes. Most homes are well-constructed, high-end homes built in the 1980s and 1990s with some built in the 70s. Sims Lake Park anchors the area along Suwanee Dam Road.

# **Future Development**

New development in this established residential area should adhere to the existing character of the area and remain low density single family detached residential. There is one remaining large tract of land. If the 100+ acre horse farm/ estate located at the northwest corner of the character area is developed, it should be developed as low density residential compatible with surrounding neighborhoods or as a conservation subdivision that concentrates single family detached development in clusters and preserves significant open space.

### **Suwanee North Goals**

- Maintain as a low density residential area.
- Most of the vacant and redevelopable land should adhere to the existing character of the character area and be developed as single family detached residential or compatible uses.
- Increase pedestrian connectivity with sidewalks as needed.

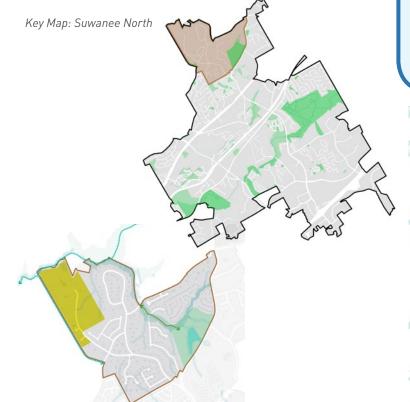

FIG. 17 SUWANEE NORTH CHARACTER AREA DEVELOPMENT FRAMEWORK

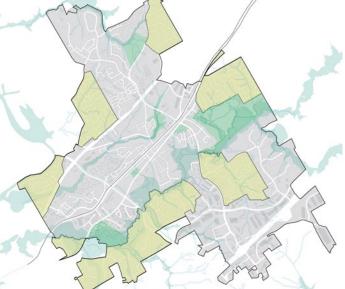

### **ESTABLISHED NEIGHBORHOODS**

The Established Neighborhoods Character Area consists of established residential areas throughout the City. It is not defined by its location. The neighborhoods included in this character area include: Bayswater Commons, Abbey Hill, Dollar Acres, Park Point, Ruby Forest, Morningside, Avonlea Crossing, Pierce Point, Martin's Farm, The Estates at Martin's Farm, McGinnis Reserve, Mill Creek, Mill Creek Run, Rising Fawn, Hitching Post Lane, Bend Creek Trail, Maple Ridge, Idlewild, Baxley Point, Chattahoochee Run, Chattahoochee Point, Lansfaire, Forest Plantation, Stoneridge, and Lansdowne. As the name suggests, these neighborhoods are established residential areas and should be preserved as such.

These neighborhoods are characterized by low-density, single family detached homes built over a number of decades. They vary in lot size. The older homes are built on larger rural type lots served by septic tanks, and the newer homes, served by sanitary sewer, are built on smaller more dense lots. The houses are primarily two stories tall, vary in architectural style, and are built with a variety of building materials. Most of these neighborhoods have curvilinear streets, cul-de-sacs and private amenities. The newer developments include sidewalks on at least one side of the road, while the older ones may lack sidewalks altogether. Most of these neighborhoods do not have large open spaces. Instead, residents make use of community facilities provided by the City or the neighborhood amenity area.

# **Established Neighborhood Goals**

- Established residential areas should be preserved.
- Pedestrian connections to the larger pedestrian network should be enhanced.
- Multi-use trails should be encouraged to connect these neighborhoods to the rest of the City.

Key Map: Established Neighborhoods

### **2040 FUTURE LAND USE PLAN:**

Since 2000, the City has encouraged mixed-use development where appropriate and pedestrian mobility throughout the City. This land use policy is still true today and is evident in the 2040 Future Land Use Map.

The future land use plan reflects existing or planned development and the growth strategies for each character area focused on parcels that are underutilized or vacant. Growth strategies include recommendations from the 2015 Downtown Suwanee Master Plan for the downtown area, concentration of high intensity office near the I-85 interchange, preservation of office-industrial uses along Satellite Boulevard, and preservation of industrial uses along Brogdon Road and Buford Highway south of McGinnis Ferry Road.

The Future Land Use Map calls for a substantial portion of the development or redevelopment opportunities identified in the framework plan to be developed as Mixed-Use Villages or Mixed-Use Centers. With the adoption of the Comprehensive Plan in 2000, the City embraced traditional neighborhood design principals in mixed-use areas. These principals have been implemented in many developments over the last 20 years gradually making Suwanee the more walkable place that it is today. As such, the City will continue to encourage developments that include a mix of uses and/or housing types. These mixed-use villages and centers should be well designed with quality architecture, have unique identities, provide inviting public spaces, and connect to surrounding properties and roads.

The City's land use policy is that development should be designed such that the layout and arrangement of land uses encourages and facilitates civic engagement and provides the infrastructure to allow people to walk between residences, jobs, recreation, retail, dining, and health care facilities.

Following this principle, the 2040 Future Land Use Plan designates many parcels along Buford Highway and Peachtree Industrial Boulevard as Mixed-Use-Village, which is intended for primarily residential medium density development within walking distance to commercial, because they are located along major corridors where more intense development is appropriate and are in walking distance to existing or future commercial nodes.

# **FUTURE LAND USE DEFINITIONS:**

### Single Family

Residences consisting of attached and detached houses, usually on separate or fee simple lots. They can be located individually or grouped together within subdivisions or other planned developments.

### **Multi-family**

Residences containing two or more dwelling units, such as duplexes, triplexes, condominiums and apartments.

### Mixed-Use Village

Residential developments that include a variety of medium density housing types, both single-family and/or multifamily, and/or limited, small-scale nonresidential uses such as a church, corner market or other neighborhood-oriented service uses. Residential developments may contain live-work units with an office or store on the ground level and residential on the upper floors or entirely residential but located within walking distance of existing commercial development.

Village Grove, Three Bridges, Stonecypher, and Old Suwanee are examples of the Mixed-Use Village category. These developments are characterized by predominantly residential uses (single family attached and detached) with limited non-residential uses.

### **Mixed-Use Center**

Developments that include a variety of retail, commercial and/or office uses as well as residences. Residences may be located in the same buildings as stores and offices or may be developed in clusters in and around the non-residential uses. Mixed-Use Centers allow more intensive residential and commercial development than a Mixed-Use Village.

Suwanee Station, Town Center, and the Terraces at Suwanee Gateway are examples of this type of development.

### Commercial / Retail

Commercial developments predominantly occupied by establishments that offer goods or merchandise for sale or rent, and other commercial uses that do not operate in "office" settings. Such uses include stores, shopping centers, hotels, restaurants, gasoline stations, physical fitness centers, and markets.

### **Low Density Office**

Smaller scale 1-4 story non-residential developments predominantly occupied by establishments that primarily provide a service as opposed to the sale of goods or merchandise. Examples include professional offices, medical or engineering offices, real estate offices, insurance agencies and corporate headquarters.

### **High Density Office**

Mid-rise and high-rise non-residential developments predominantly occupied by establishments that primarily provide a service as opposed to the sale of goods or merchandise. Examples include professional offices, medical or engineering offices, real estate offices, insurance agencies and corporate headquarters.

### Office - Industrial

Land dedicated to manufacturing facilities, processing plants, factories, warehousing, and wholesale trade facilities that also have office functions.

# Industrial

Land dedicated to manufacturing facilities, processing plants, factories, warehousing, and wholesale trade facilities.

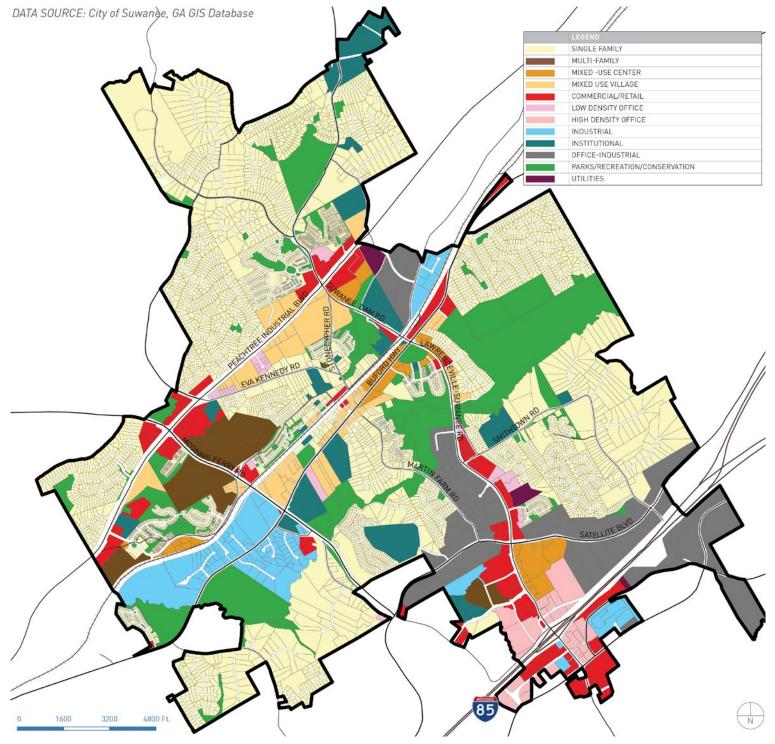

FIG. 18 2040 FUTURE LAND USE PLAN

# Institutional

State, federal or local government uses, and quasi-public institutions. Governmental uses include City Hall, fire stations, police stations, court buildings, libraries, post offices, and public schools (but not parks). Institutional uses include medical uses, places of worship, cemeteries, and other private non-profit uses.

# Parks / Recreation / Preservation

Land dedicated to active or passive recreational uses. These lands may be either publicly or privately owned and may include playgrounds, public parks, nature preserves, wildlife management areas, national forests, golf courses, recreation centers, etc.

# **Utilities**

Land owned and occupied by utilities.

# **WORK PROGRAM**

# **5-YEAR ACTION PLAN**

The 5-Year Action Plan lays out the specific activities the City plans to undertake during the next five years to address the priority Needs and Opportunities identified in the 2040 Plan as well as actions, initiatives, programs, ordinances or administrative systems that will lead to implementation of the 2040 Plan including future land use, actualizing the vision statement, and accomplishing the specific goals of each character area.

This 5-Year Action Plan is updated every year by the City Council to verify items were accomplished and evaluate if new items need to be added for the current 5-year time period.

<b>Suwanee Gateway:</b> Undertake targeted blight removal projects in Suwanee Gateway.	Action Item				Ongoing				City Others	TBD	Local TBD	Research potential projects; evaluate feasibility and costs; present to Council for consideration.
Suwanee Gateway Code Enforcement: Enhance attention and efforts in Suwanee Gateway.	Action Item				Ongoing				City	Staff Time; TBD	Local	Staff will take a concerted, proactive approach to code enforcement in the Suwanee Gateway, i.e. TEE program (Total Elimination of Eyesores).
Water System Infrastructure Improvements: Complete projects identified by Water System Master Plan.	Action Item				Ongoing				City	Varies	Local	The infrastructure is well-maintained.
Water System Strategy: Monitor short- and long-term strategies and opportunities to ensure a viable water system.	Action Item				Ongoing				City	Varies	Local; Water Fund	Montior options and strategies.
Zoning Ordinance Review: Review Zoning Ordinance and amend it to pre-empt problems with rapid growth and uncontrolled development.	Action Item								City	Staff Time	Local	Ongoing; identify and present amendments, as needed.
<b>Code Enforcement:</b> Effectively balance code enforcement with pragmatism.			Polic	Policy Statement	ent				City	TBD	Local	The City's codes are enforced in an effective, fair, and professional manner.
Commercial Centers: Promote the development of planned commercial centers rather than strip development.			Polic	Policy Statement	ent				City	StaffTime	Local	Address in local plans and regulations; review projects for conformance during zoning and development process.
<b>Community Aesthetics:</b> Emphasize community aesthetics throughout the City.			Polic	Policy Statement	ent				City	StaffTime	Local	Address in local plans and regulations; review projects for conformance during zoning and development process.
New Neighborhoods. New neighborhoods should be well designed with quality architecture, have unique identities, provide inviting public spaces, and connect to surrounding properties and roads.			Polic	Policy Statement	ent				City	StaffTime	Local	New neighborhoods are welt designed, unique, welt connected and have inviting public spaces.
Environmental Stewardship & Sustainability: Promote environmental stewardship in municipal operations; explore options for implementing sustainable design standards.			Polic	Policy Statement	ent				City	Varies	Local	Purchase recycled/recyclable materials when possible; purchase hybrid and gas-conserving vehicles for City fleet, when appropriate; seek additional opportunities to be environmental stewards.
<b>Hotel Rooms:</b> Reduce the number of external entry hotel rooms in the City.			Polic	Policy Statement	ent				City	Staff Time, plus costs TBD	Local, TBD	External entry rooms are reduced and the renovation or construction of internal entry rooms is encouraged.
Housing Affordability & Choices: Continue to value housing affordability and housing choices when making zoning decisions.			Polic	Policy Statement	ent				City	Staff Time	Local	Evaluate during zoning decisions.
Land Use: Carefully monitor non-residential land use allocations.			Polic	Policy Statement	ant				City	StaffTime	Local	$\label{local-months} Monitor\ as\ needed\ with\ rezoning\ and\ SUP\ applications\ and\ quarterly\ economic\ indicator\ reports.$
Main Street Program: Promote program in community.			Polic	Policy Statement	ent			3	City DDA Citizens	StaffTime	Local	Community is aware of program.
Parking Facility(ies): Monitor options, as appropriate.			Polic	Policy Statement	ent				City	TBD	SPLOST Local	Evaluate needs Citywide; acquire property, as needed; design and construct project(s).
Town Center: Continue promotion and development of a mixed-use Town Center.			Polic	Policy Statement	ent			Privã	City DDA Private Sector	Varies	Varies	Construct projects identified in Downtown Suwanee Master Plan and Town Center Master Plan; work with private developers for other projects, as appropriate; support Downtown Merchants Association.

Suwanee 2040 Plan WORK PROGRAM 37

# **NEEDS AND OPPORTUNITIES**

Demographic Trends Land Use Changes Housing Analysis Community Facilities Transportation
Cultural and Historic Resources
Natural Resources
Broadband Services
Economic Development

#### **NEEDS AND OPPORTUNITIES**

The needs and opportunities assessment included documentation of existing physical conditions, an analysis of demographic and market trends, and community input through focus group interviews, an online survey, public open houses, and a series of steering committee meetings.

The needs and opportunities identified are grouped into nine planning elements – demographic trends; land use; housing; community facilities; transportation; cultural and historic resources; natural resources; broadband services; and economic development. The following summary describes changes and trends for each of these elements over the last 10 years since the last Comprehensive Plan update.

#### **DEMOGRAPHIC TRENDS**

The City of Suwanee has grown significantly since 2000, more than doubling the population and number of households in this time. Average annual population growth in Suwanee (3.9%) considerably outpaced that of Gwinnett County (2.0%) and Metro Atlanta (1.4%) since 2010. Future growth projections show the City adding approximately 548 people per year or 12,000 new residents by 2040. Projections indicate Suwanee will add approximately 8,000 new jobs by 2040, a slightly lower employment growth rate than is expected in Gwinnett County overall.

Population	City of Suwanee	Gwinnett County	
2000 Census	8,955	588,456	4,263,447
2010 Census	15,355	805,321	5,286,728
2017 Estimate	19,077	923,142	5,843,277
Avg. Annual Growth 2000-2010	5.5%	3.2%	2.2%
Avg. Annual Growth 2010-2017	3.9%	2.0%	1.4%

		Gwinnett	
Households	City of Suwanee	County	Metro Atlanta
2000 Census	3,004	202,319	1,559,711
2010 Census	5,418	268,519	1,943,885
2017 E <mark>stimat</mark> e	6,624	303,641	2,158,578
Avg. Annual Growth 2000-2017	5.1%	2.4%	1.9%

#### Population and Households

Suwanee residents are generally slightly older, well-educated, and affluent. Suwanee has a greater prevalence of residents in the Generation X cohort than other parts of Gwinnett County and the region, and over half of Suwanee's residents have earned a bachelor's degree or higher, compared to about one-third of residents countywide.

Suwanee residents have higher median household incomes than the County and the region. However, those that work in Suwanee have lower annual salaries than the average Gwinnett worker. This indicates an unbalanced jobs-housing ratio with residents commuting outside the City to work and workers commuting into the City to work. This influx and outflux of commuters for jobs leads to more traffic on Suwanee's arterials.

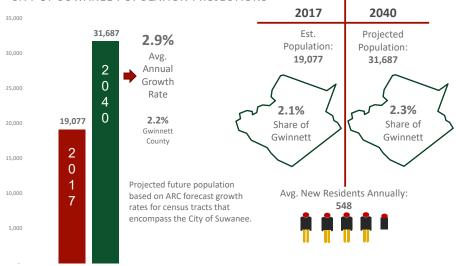

Only 3% of those employed in the City also live in the City. The largest percentage of these workers are coming from nearby cities in Gwinnett and Fulton County. It is notable that Suwanee has a small geographic footprint; therefore, one could live or work just outside the city limits and still have a short 10 minute commute.

6% of employed Suwanee residents work within the city limits. 1 in 10 employed Suwanee residents work from home, a higher than average proportion. This suggests a possible market for privately operated collaborative work spaces, shared meeting spaces, or temporary offices in Suwanee.

Among those that are commuting, 10% of employed residents of Suwanee commute to Atlanta. The next largest commuting populations work in Alpharetta (4.7%), Sandy Springs (3.6%) and Peachtree Corners (3.1%).

Suwanee's average household size is 2.9, which is slightly less than Gwinnett County and slightly more than Metro Atlanta. This suggests a need for smaller housing types as Suwanee grows.

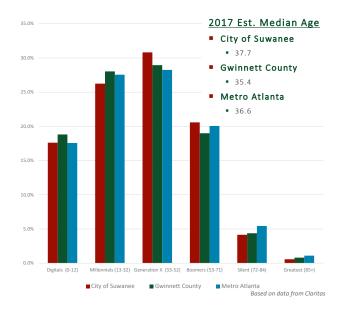

#### CITY OF SUWANEE POPULATION PROJECTIONS

Current population estimates based on data from US Census, ARC, Claritas, ESRI.

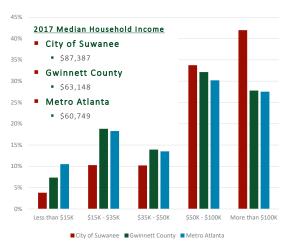

#### AGE

- On average, Suwanee residents tend to be more middle aged than those in Gwinnett County and Metro Atlanta.
- Generation X residents are more prevalent in Suwanee than in the county and region overall.
- Nearly a third of Suwanee residents are age 33-52.

#### INCOME

- Compared to the county and region, Suwanee residents are generally more affluent.
- 42% of households have incomes of \$100,000 and greater, contributing to a median household income that is 44% higher than that of Metro Atlanta overall and Gwinnett county.

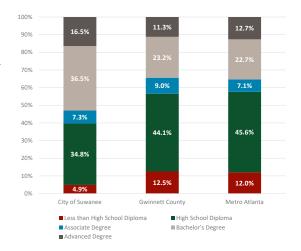

Based on data from Claritas

#### **EDUCATIONAL ATTAINMENT**

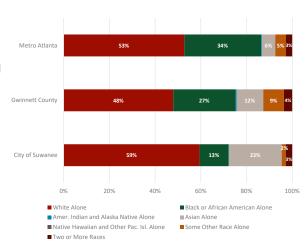

- Whereas in Gwinnett County as a whole 35% of the population has a college degree or higher educational attainment, in Suwanee 53% of residents have a college degree or higher.
- The higher earning power of a college degree correlates to higher incomes in Suwanee.

Based on data from Claritas

#### **RACE & ETHNICITY**

- 59% of Suwanee residents classify as "white alone" compared to 48% of Gwinnett County residents.
- Suwanee has a smaller proportion of African Americans and a larger proportion of Asian residents than Gwinnett County or Metro Atlanta.

Based on data from Claritas

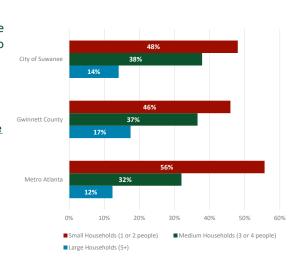

#### **HOUSEHOLD SIZE**

Households in Suwanee are comparable in size to households in the county.

#### 2017 Average Household Size

- City of Suwanee
  - **2**.9
- Gwinnett County
  - **3.0**
- Metro Atlanta

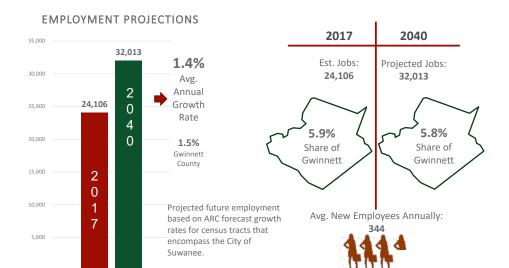

**2**.7

Based on data from Claritas

#### **Employment Assessment**

- Suwanee is projected to add approximately 8,000 new jobs by 2040, a 1.4% average annual growth rate, slightly less employment growth than is expected in Gwinnett County overall.
- The Suwanee employment base is weighted toward lower-paying service sector wholesaling/manufacturing jobs.
- One-quarter of Suwanee employees hold college degrees.
- Working from home is more prevalent in Suwanee than in surrounding areas; one of every ten people employed within the Suwanee City limts works from home
- Very few of those employed in Suwanee also live in the city, with the greatest percentage of commuters coming into Suwanee from nearby towns in Fulton and Gwinnett Counties.

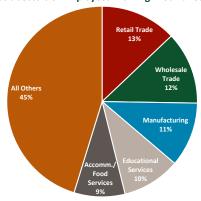

Current estimates based on data from US Census, ARC, Claritas, ESRI

#### SUWANEE EMPLOYMENT PROFILE

- 46% of all employees work in Suwanee's four leading employment sectors:
  - Retail Trade
  - Wholesale Trade
  - Manufacturing
  - Education

#### Job Sectors of Employees Working in Suwanee

#### EMPLOYEES PLACE OF RESIDENCE

 Approximately 30% of employees working in Suwanee live in neighboring communities.

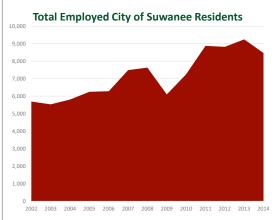

> Top Zip Codes 30024 Suwanee/Johns Creek (9.2%) 30043 Lawrenceville (7.7%) 30518 Buford/Sugar Hill (4.8%) 30044 Lawrenceville/Lilburn (4.3%) 30096 Duluth (3.3%)

Note: the darker the color the larger the number of employees

#### SUWANEE RESIDENTS

 The number of employed Suwanee residents grew significantly from 2002 to 2014, growing by nearly 3,000 residents in that time.

#### SUWANEE EMPLOYMENT PROFILE

- The typical worker in Suwanee is between the age of 30-54.
- Only 3% of those employed in Suwanee also live in the city, with the greatest percentage of commuters into Suwanee originating from the nearby cities of Johns Creek, Lawrenceville, Buford, and Sugar Hill.

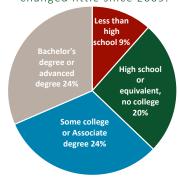

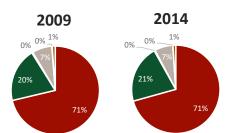

Living Outside

97%

#### **EMPLOYEE PROFILE**

- One quarter of Suwanee employees hold college degrees.
- The racial/ethnic profile of employees in Suwanee has changed little since 2009.

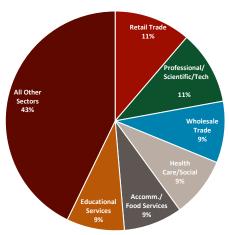

- White Alone
- Black or African American Alone
- American Indian or Alaska Native Alone
- Asian Alone
- Native Hawaiian or Other Pacific Islander Alone
- Two or More Race Groups

#### SUWANEE RESIDENTS

City of Suwanee residents are employed in a broad range of employment sectors, none of which include more than 11% of the employed population.

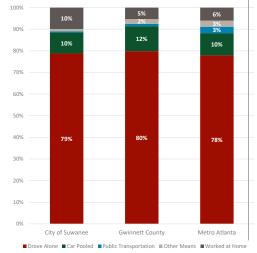

#### Suwanee 2040 Plan

#### SUWANEE RESIDENTS

One of every ten employed Suwanee residents work from home, a significantly higher proportion than Gwinnett County (5%) or Metro Atlanta (6%).

#### **Suwanee Residents by Transportation to Work**

#### SUWANEE RESIDENTS

One of every ten employed Suwanee residents commute to the City of Atlanta.

#### **Residents Place of Employment** Top Cities

Atlanta: 10.0% Suwanee: 6.4% Alpharetta: 4.7% Sandy Springs: 3.6% Peachtree Corners: 3.1%

Note: the darker the color the larger the number of employees

#### **LAND USE CHANGES**

#### Annexation:

 Since the 2030 Comprehensive Plan in 2007, the City annexed about 65 acres of land thus increasing the overall inventory from 6,998 acres in 2007 to 7,063 acres in 2017. This included the annexation of North Gwinnett High School and 20 acres of light industrial land along Satellite Boulevard.

#### Single Family Residential:

- Single family residential (single-family detached and single family attached) continues to be the dominant land use comprising 46% of total land area (2,862 acres) in 2017. This is a 1% increase since 2007.
- The conversion of 75 acres of land to residential use was due to new residential development on previously undeveloped land including recently completed Reserve at Moore Road, a detached single family neighborhood off of Moore Road; Suwanee Green, a new neighborhood under construction in the Old Town character area with a mix of small lot detached single family homes and attached single family homes; Suwanee Walk, a new attached single family townhome neighborhood under construction behind a shopping center near the intersection of Peachtree Industrial Boulevard and McGinnis Ferry Road; Northaven, a new attached single family townhome neighborhood under construction in the Terraces at Suwanee Gateway planned mix-use use development; and new townhomes currently under construction on four undeveloped blocks within Suwanee Station. The City is now experiencing the start of new residential neighborhoods since the

last Comprehensive Plan. Most of the housing demand over the last 10 years was absorbed by the build out of neighborhoods that started in the early 2000's: Suwanee Station, Village Grove, Three Bridges, McGinnis Reserve and Stonecypher. These neighborhoods were slow to build out due to the recession, but residential lots were quickly absorbed post recession leaving Suwanee with almost no buildable lots by the end of 2016.

#### Multifamily Residential:

- Multifamily residential use accounts for only 3% of the total land area (196 acres in 2017), which is an increase of only 34 acres from 2007 due to the more vertical, compact development style that the City has encouraged for new multifamily over the last 10 years.
- The three multifamily projects built prior to the last Comprehensive Plan were lowrise, garden-style apartment communities (The Residence on McGinnis Ferry, Landmark at Grand Oasis and Century Pointe at Suwanee Station). These projects provide 1,363 units over a combined 162 acres, which contain large buffers between adjacent property and very little usable open space.
- In the last 10 years, two new multifamily projects have been built. Both developments are within existing planned mixed-use developments, which allow for shared central open spaces for the larger overall development and connectivity between adjacent uses. This development pattern allows for multifamily to take up less land, be closer to other compatible uses, and create a more walkable environment. In 2012, the Terraces at Suwanee Gateway apartments were built with 335 units in a stacked

LAND USE CATEGORIES	LU AREA 2007 (ACRE)	% LU 2007	<b>ELU AREA</b> <b>2017</b> (ACRE)	% ELU 2017	Change in Land Area

flat format at a higher density than previous garden apartments. These were designed in a more urban manner with units with entrances directly onto the sidewalk to meet the design standards for the Terraces at Suwanee Gateway. Artisan Station was built in the Suwanee Station planned mixed-use development in 2016 with 224 units. These two projects added 559 new units, which increased the total number of multifamily units to 1,922.

#### Mixed-Use Center:

- This category includes vertical mixed-use buildings with residential above commercial uses. This use currently exists only in two buildings at Town Center next to City Hall, but the Solis project currently under construction will extend this land use down Buford Highway per the vision of the Downtown Suwanee Master Plan.
- The Solis Town Center project, currently under construction, includes a mixed-use building with ground floor retail and multifamily flats above at the corner of Chicago Street and Buford Highway. This Project represents the next generation of multifamily housing. It will meet Suwanee's high quality design standards, contribute to the desired mixed-use character of Town Center and provide a more urban lifestyle option in Suwanee. Solis will provide 240 residential units and a structured parking deck.

#### Commercial/Retail and Office:

Over the last 10 years, new commercial/retail development was built on undeveloped land at major intersections along Peachtree Industrial Boulevard (PIB), within Town Center, and within the Terraces at Suwanee Gateway located off of Lawrenceville-Suwanee Road just west of the I-85 interchange. The commercial/retail portions of Three Bridges were built out with one and two story multitenant buildings near the intersection of PIB and Suwanee Dam Road, a new multi-tenant shopping center was built on the southeast corner of PIB and McGinnis Ferry Road, and another multi-tenant shopping center was built at the northwest corner of PIB and Moore Road. All but two of the remaining commercial tracts in the Town Center master plan were built out. The build out of the Terraces of Suwanee Gateway, the former Falcons Training Camp, resulted in 4 new freestanding retail buildings, 2 new multi-tenant retail buildings, and an entertainment venue in walking distance to new office and residential uses.

#### Industrial:

 There has been a loss of some industrial land but not because industrial developments have been redeveloped.
 Rather, it is mostly due to the subdivision of some parcels and coding undeveloped portions as vacant land, or in some cases changing the use to office use to reflect the new more office type users that are occupying existing light industrial buildings. Industrial uses such as light manufacturing, distribution facilities, business parks, processing plants, factories, warehouses, and wholesale trade facilities are concentrated along Satellite Boulevard, portions of Lawrenceville-Suwanee Road (west of I-85), Buford Highway (south of McGinnis Ferry Road), Brogdon Road and Tench Road.

#### Institutional:

Institutional land increased due to the annexation of North Gwinnett High School, the addition of the new City Hall at Town Center, a new rehabilitation facility in the Terraces of Suwanee Gateway, a new police substation on Lawrenceville- Suwanee Road, and a new faith based facility on Celebration Drive

#### Parks/Recreation/Open Space:

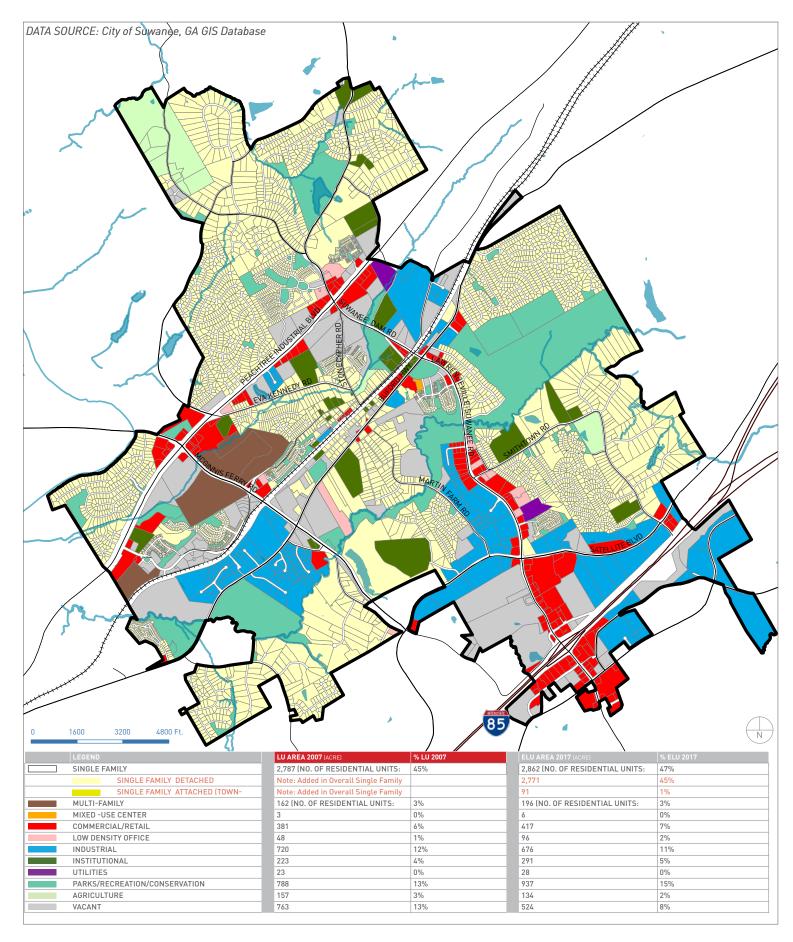

Parks and Open Space continues to be the second largest land use with almost 937 acres dedicated to Suwanee's greenway system; city, county and private parks; conservation land; and preserved floodplain/wetlands. In the last 10 years, the City has added 149 acres of preserved land or open space mostly through green space carved out of new development mainly in Three Bridges, McGinnis Reserve and Suwanee Station. Additionally, a six acre undeveloped tract of land along Peachtree Industrial Boulevard was preserved for open space and donated to the City within the Metropolitan River Protection Corridor and 12 acres were purchased by the City adjacent to George Pierce Park.

#### Agriculture:

 The City's remaining agricultural land includes a horse farm and tree farm. Both of these large tracts of land are surrounded by low density residential development and are likely to be candidates for similar residential development

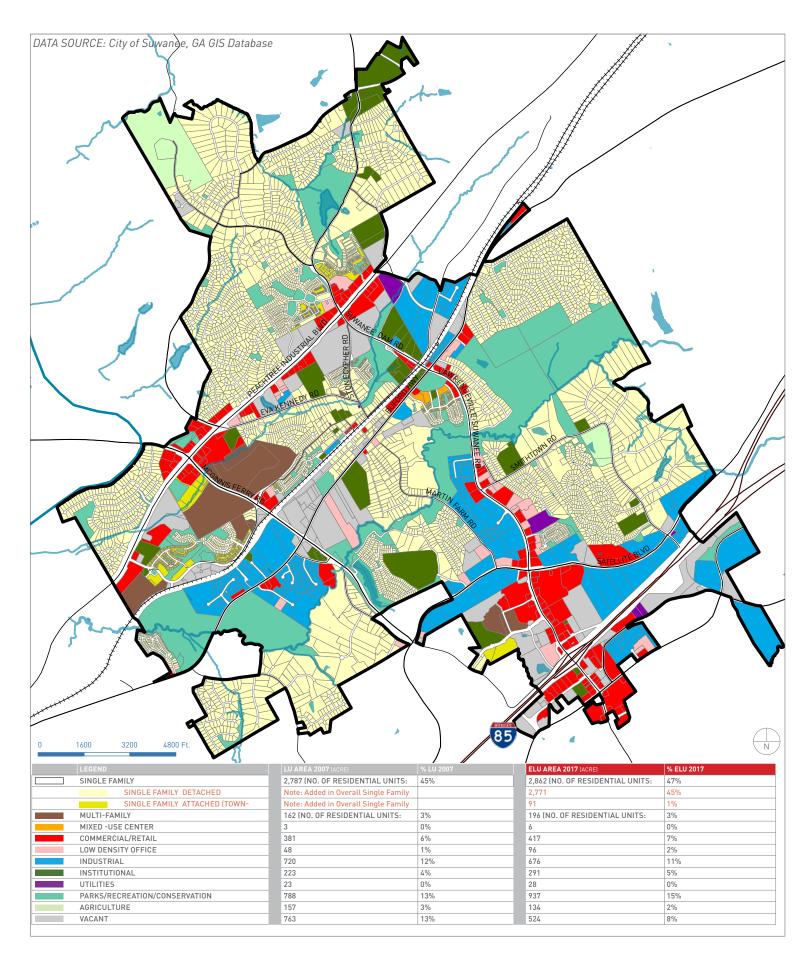

#### Vacant:

• Currently, the City only has 524 acres of vacant land, which is a loss of almost 240 acres since 2007. The amount of vacant land considered to be developable is further reduced to 340 acres after accounting for floodplain, stream buffers, and topographical challenges on some of the remaining vacant land. With limited vacant land available, future development and growth should be planned in an efficient manner, and redevelopment of underutilized properties in strategic locations could be a critical tool.

**FIG. 19** 2007 LAND USE MAP

#### **HOUSING ANALYSIS**

- Suwanee housing stock is newer compared to the County and the region; 60% of all housing units in the City were built since 2000.
- Housing values in Suwanee are significantly higher than average values in Gwinnett County and Metro Atlanta.
- New home permitting and new home sales declined from 2014 to 2017 as existing neighborhoods built out after the recession and the inventory of new homes and lots became scarce by the end of 2016. With the creation of new neighborhoods, permitting has picked up and sales are resuming.
- Single family detached homes are the dominant housing type and will continue to be if the entire City was built out per the Future Land Use Plan.
- Population changes, need for more density to support restaurants, and the desire for compact communities that preserve open space and are walkable, all point to more medium density housing in the future. This aligns with Suwanee's maturity level as a City. Suwanee has minimum opportunity left for low density single family detached neighborhoods. The undeveloped land and redevelopment opportunities are likely are in locations with high land costs due to existing commercial or industrial zoning or proximity to arterials. Other than a few strategic locations designated for future multifamily, most of the future residential development in Suwanee will be infill medium density housing. Suwanee has recently experienced an increase in townhome construction. There is now a desire and need for other forms of medium density housing, particularly types without stairs or with elevators that can better accommodate Suwanee's growing senior population.

#### **Overall Housing Growth**

 There was a 20% increase, or 1,198 housing unit addition, from 2007-2017. Housing density based on residential parcel acreage is 2.3 units/acre, which is a minor increase from 2.0 units/acre in 2007. Recent housing development has been at about 11 units/acre using more compact housing development typology such as smaller single-family lots, townhomes, and multifamily development.

#### Single Family Detached and Attached

• Currently, single family residential, both detached and attached, account for the largest housing type with 73% of the total inventory, a slight decrease from 76% in 2007. Single family residential is mostly owner occupied.

#### Multifamily

 Currently multifamily housing is about 27%, 1,922 units, of the total housing inventory, which is a 517 unit increase from 2007. Almost 70% of the multi-family stock is garden style apartments built before 2007.

Development	No. of Units	Year Built
Landmark at Grand Oasis	434	1995
AMLI/The Residence on McGinnis Ferry	593	1997-2000
Century Point at Suwanee Station	336	2005
Terraces at Suwanee Gateway	335	2012
Artisan Station	224	2016
TOTAL	1,922	
Solis (under construction)	240	2018

Over the past 20 years, City of Suwanee multifamily units represented a small but growing portion of the Gwinnett County multifamily market. This is because prior to 1995, Suwanee was still a rural community without any multifamily. Since then, six multifamily developments have been built. One of these is in a mixed-use development in Suwanee Gateway, one is in Town Center, and the rest

are within one mile of the land Suwanee has purchased and set aside for a future transit station.

## 2007

2007 Housing Inventory	Acres	Units	Density
Single Family Detached	NA	3,945	NA
Single Family Attached	NA	537	NA
Single Family Detached + Attached	2,787	4,482	1.6
Multifamily	162	1,386	8.6
TOTAL	2,949	5,868	2.0

#### 2017

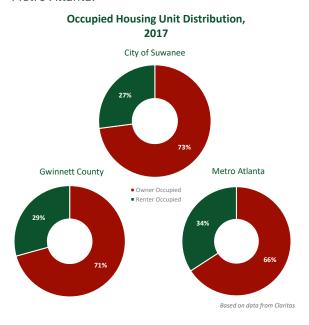

2017 Housing Inventory	Acres	Units	Density
Single Family Detached	2,771	4,376	1.6
Single Family Attached	91	787	8.6
Single Family Detached + Attached	2,862	5,163	1.8
Multifamily	196	1,903	9.7
TOTAL	3,058	7,066	2.3

#### **Senior Housing**

- There is a senior living facility under construction on Suwanee Dam Road that includes 86 independent living units, 57 assisted living units, and 32 memory care units.
- A development permit has been issued for a second assisted living facility with 86 units located at Buford Highway and McGinnns Ferry Road. This project has not started development.

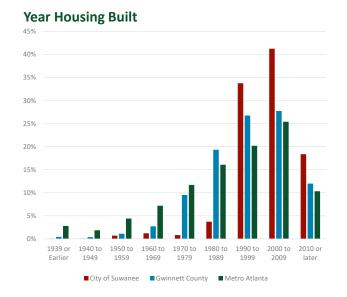

#### **Housing Tenure**

 27% of occupied housing in the city of Suwanee is rental housing, a lower share than in Gwinnett County and Metro Atlanta.

#### Age of Housing

- 60% of all housing units in Suwanee were built since 2000, compared of 40% in Gwinnett County and 36% in metro as a whole.
- Only 7% of all housing units in Suwanee were built before

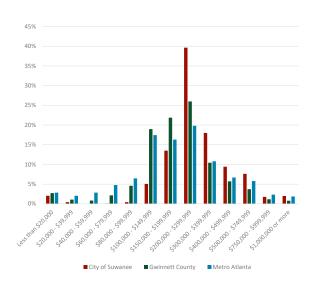

1990, compared to 33% in Gwinnett County and 44% in Metro Atlanta.

#### **Housing Value**

- Nearly 40% of homes in the City of Suwanee are valued between \$200,000 and \$300,000, compared to just 26% countywide.
- Median Housing Value

City of Suwanee: \$271,702

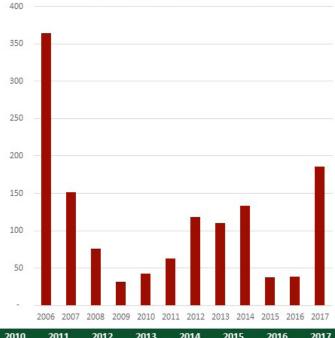

Based on data from Claritas

Gwinnett County: \$194,981

Metro Atlanta: \$191,671

#### **Building Permits**

 Housing permit issuance dipped in Suwanee in 2015 and 2016 as existing neighborhoods built-out after the recession and the inventory of new homes and lots became scarce.

	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015	2016	2017
City of Suwanee	364	152	76	32	43	63	118	110	133	38	39	186

Based on data from U.S. Census and City of Suwanee

#### **New Home Sales**

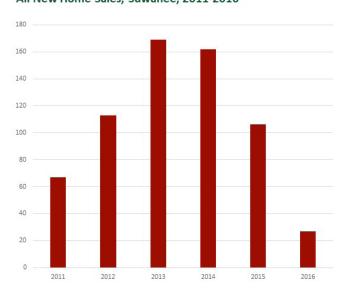

- From 2011 through 2015 Suwanee accounted for 15%-22% of all new townhome sales countywide.
- Suwanee single-family new home sales peaked as a share of Gwinnett in 2012 at nearly 6% before decreasing to less than 1% in 2016.
- The decrease in new home sales in Suwanee can be attributed to a lack of available inventory.
- The volume of new home sales in the City of Suwanee peaked in 2013 at 169 units sold.
- Lot and home availability was recently scarce and led to the decrease in new home sales in Suwanee.

#### **Multifamily Market**

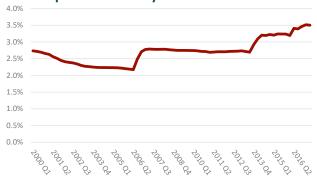

- Over the past 15 years, Suwanee multifamily units have represented a small but growing portion of the Gwinnett County multifamily market.
- The number of multifamily units nearly doubled in Suwanee since 2000 with the opening of three complexes totaling 888 units.
- Typical apartment units in Suwanee are charging \$1,310/ month (\$1.15/SF), a 15% price premium over units in the rest of the County.

#### **COMMUNITY FACILITIES**

#### Park/Recreation/Open Space:

Prior to the 2000 Comprehensive Plan, the City only had about 10 acres of city-owned parkland. In response to that lack of parkland, the 2000 Comprehensive Plan identified parkland and open space acquisition and protection as an important community goal. The City subsequently conducted an Open Space and Recreational Needs Assessment in 2001. The plan identified a need for additional passive parks and open space. The assessment found that Gwinnett County was providing adequate active recreation facilities in Suwanee, but open space preservation, passive park areas, and community gathering areas were limited. In response to this assessment and with backing of a citizen-approved referendum, the City initiated a \$17.7 million dollar Open Space Initiative. This initiative resulted in the purchase and preservation of over 200 acres of open space and parks and the construction of approximately 2.5 miles of trails that Suwanee residents enjoy today. The City is currently designing a new park on a major piece of land purchased as part of the Open Space Initiative. The new park will be an extension of Town Center on the west side of the railroad tracks.

When coupled with Gwinnett County resources and private amenities, the City contains approximately 900 acres of parkland contributing to the quality of life in Suwanee. About 170 acres of open space is dedicated to large city parks like Town Center Park, Suwanee Creek Park, and Sims Lake Park, and small neighborhood parks like Martin Farm Park, PlayTown Suwanee, City Hall Park, White Street Park, and Main Street Park. George Pierce Park, a Gwinnett County park within the City, provides approximately 300 acres of active recreation fields, trails, and a senior center. The Suwanee Creek Greenway, a four-mile long multiuse path that runs from Suwanee Creek Park to Town Center to George Pierce Park, serves as a pedestrian spine for the City connecting many neighborhoods to Suwanee's trail system. The City launched a bike-share program in 2016 with stations located at Suwanee Creek Park and Town Center Park to make this amenity more accessible to all.

#### **Community Facilities**

There is a concentration of city and county facilities in Town Center including City Hall, municipal court, a County fire station, a police station, and a County library. Other city facilities include public works buildings on Swiftwater Park Drive and Windsor Park Drive and a police training facility at the I-85 interchange. The City completed a feasibility study in 2017. The purpose of the study was to explore options for future needs for a larger and more functional court facility and public works and police storage and maintenance facilities.

The Swiftwater Park Drive facility filled the public works needs. However, there are other smaller storage facilities in the downtown that will need to be replace if they removed for park expansion or other development. Upon availability of future funding resources and potential public-private partnerships, the following recommendations were made by the study:

- Expansion of existing municipal court building to increase efficiency and increase capacity
- Adaptive re-use of the fire station by a future private user
- Adaptive re-use of the school building and site by a future public or private user

#### **Public Safety:**

The Suwanee Police Department has a community oriented policing philosophy to maintain safety for residents and businesses. Various community-based programs such as P.A.C.T (Police and Citizens Together) program, Georgia Teens Ride with P.R.I.D.E (Parents Reducing Incidents of Driver Error), Selective Enforcement Unit, Park Patrol Officers, Citizens Police Academy, and C.O.P.S (Caring Officers Providing Support) help enhance the City's overall security and quality of life.

#### Healthcare:

Suwanee is served by five hospitals located outside the city limits including Eastside Medical Center, Emory John's Creek, Gwinnett Medical Center, Gwinnett Health System, and Summit Ridge Hospital. The only signifficant healthcare facility in Suwanee is the Salude Transitional Care Facility located on Northolt Parkway. There are primary care and urgent care facilities occupying many of Suwanee's multitenant commercial buildings.

#### Educational Facilities:

The Gwinnett County Board of Education operates the public school system that serves Suwanee residents. Most of Suwanee is served by the North Gwinnett Cluster. This cluster includes North Gwinnett High School, North Gwinnett Middle School, Level Creek, Riverside, Roberts and Suwanee Elementary Schools. North Gwinnett High School completed a significant renovation in 2015 that expanded capacity. The Peachtree Ridge Cluster serves Suwanee residents living south of McGinnis Ferry Road and the apartments north of McGinnis Ferry Road. Schools serving Suwanee include Peachtree Ridge High School, Hull Middle School, Burnette, and Parsons Elementary School.

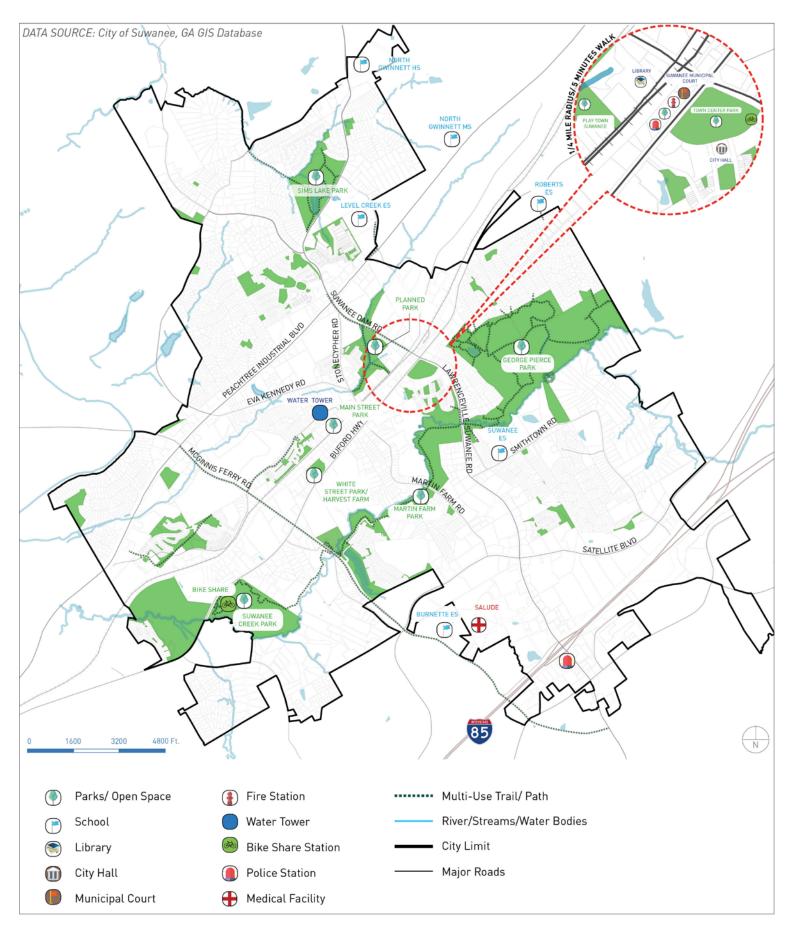

FIG. 21 COMMUNITY FACILITIES MAP

#### **TRANSPORTATION**

The City of Suwanee partners with others to provide for the community's various transportation needs. The City generally focuses on improving and maintaining local roads and providing alternative transportation options, such as sidewalks and greenways for pedestrians and cyclists. Gwinnett County and Georgia Department of Transportation build and maintain the major roads, allowing the City to focus on localized efforts.

The City's role is not to create large, multi-lane highways crisscrossing the City. Rather, the City's efforts are primarily to connect destinations (jobs, schools, services, etc.) throughout the community in order to minimize travel need. The City values slower vehicle speeds and undertakes efforts to calm traffic in various ways, such as narrow, connected streets. The City's local transportation actions can be summarized by four primary focus areas: 1) connectivity; 2) safety; 3) maintenance; and 4) providing for alternative transportation.

Transportation policies and projects should be in alignment with the future land use plan and goals outlined in this plan. Similarly, land use policy adjustment should be considered if future transportation investment from the County or the State after the conditions of an are or feasibility of a defined land use, such as a transit station area.

The City and County regularly undertake transportation study and planning efforts with public input in order to identify transportation issues, solutions, and potential projects. Several studies have been done since the last Comprehensive Plan including:

Buford Highway Transportation Study, 2010

Suwanee Pedestrian and Bicycle Plan, 2011

2015 Downtown Suwanee Master Plan, 2015

Gwinnett County Comprehensive Transportation Plan, 2018

The maps and charts on the following pages outline desired future projects that came out of these studies.

#### City Pedestrian and Bicycle Projects

The City has successfully implemented many of the projects from the Pedestrian and Bicycle Plan in the last 10 years. These projects have resulted in the creation of an interconnected network of trails and sidewalks where people can walk or bike from many neighborhoods to community facilities, commercial areas, and open spaces. The Suwanee Creek Greenway is an integral part of the City's identity and quality of life. In the last 10 years the City has expanded the greenway system to include approximately 16 miles of multipurpose trails. The City should continue to seek opportunities to expand the Suwanee Creek Greenway specifically looking to connect the Greenway to destinations along Buford Highway. The City also added shared bike lanes on Eva Kennedy Road, Martin Farm Road, Main Street and Station Center Boulevard. Most of the major traffic thoroughfares now have sidewalks on both sides of the road, but there are still some gaps that need to be filled by future planned projects. The Gwinnett County Trails Master Plan calls for several extended greenway/multi-use trails up to the Suwanee city limits that could expand the trail system for Suwanee residents even further.

#### **Buford Highway Reconstruction**

The 2009 Downtown Suwanee Master Plan that followed the 2030 Comprehensive Plan identified the desire to preserve Buford Highway as a two lane road connecting the two sides of Suwanee's downtown rather than dividing downtown with a wider four-lane road. This led to the Buford Highway Transportation Study that was done in 2010 to evaluate options for preserving Suwanee's "main street" while improving safety and mobility for all modes of transportation. The result of this study is a transportation project designed by the City, funded by an LCI grant and local funds, and constructed by the Georgia Department of Transportation. The project extends the length of Buford Highway between McGinnis Ferry Road and George Pierce Park. It will be a context-sensitive roadway that will allow all users (vehicles, pedestrians, and bicyclists) to travel safely along and across the corridor. The improved street will not only handle a similar traffic volume but also accommodate pedestrians and cyclists in a safe manner by slowing down vehicles.

The Buford Highway Reconstruction is currently underway. Buford Highway will still accommodate two lanes of vehicular traffic, but it will now include dedicated, on-street bike lanes; 13-foot wide sidewalks; and on-street parallel parking along the half mile promenade between Suwanee's historic Old Town and Town Center. A new roundabout at the intersection with Russell Street will serve as a gateway into Suwanee's downtown and improve left turns to and from Old Town. South of Russell Street, Buford Highway will take on a more rural character. Bike lanes will merge with the sidewalk to form a single 10-foot wide multi-use trail on the east side of Buford Highway extending to the existing multi-use trail on McGinnis Ferry Road. North of Town Center, 5 to 8-foot wide sidewalks and dedicated, on-street bike lanes will continue all the way to George Pierce Park. The existing hawk signal at Town Center Avenue will be realigned to improve pedestrian safety.

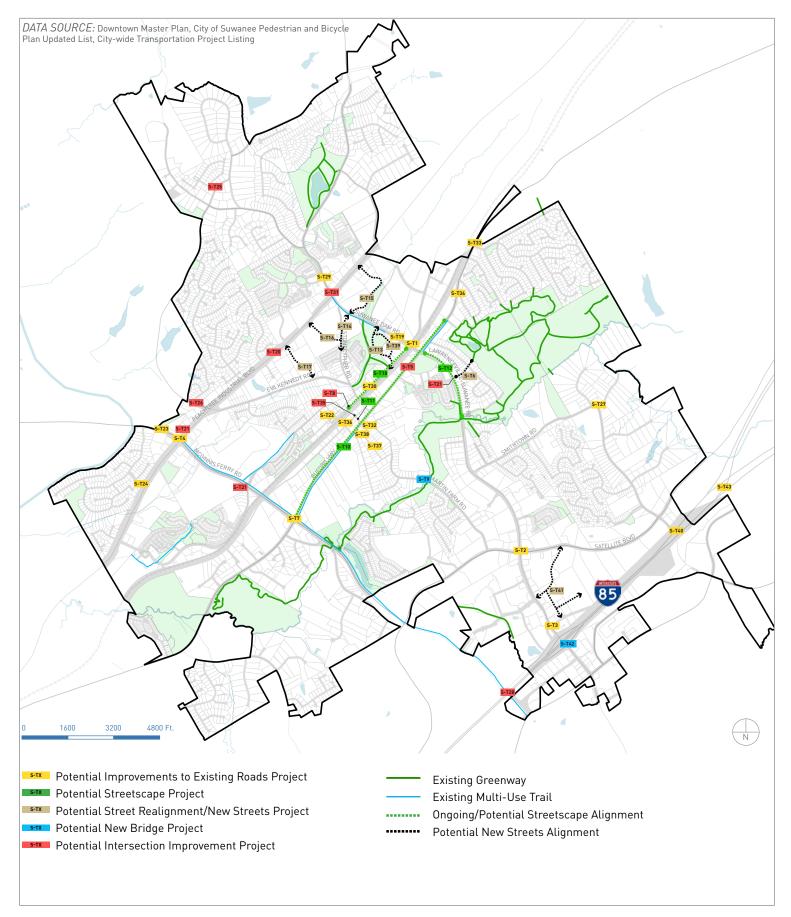

FIG. 24 POTENTIAL CITY TRANSPORTATION PROJECTS

#### **City Transportation Projects**

The transportation projects illustrated in Figure 25 and listed in the following charts are compiled based on projects listed in the 2015 Downtown Suwanee Master Plan and previously identified City transportation projects. These represent a comprehensive strategy to enhance the City's vehicular network.

Figure 25 shows a framework for new roadway connections that are desirable as potential private redevelopment occurs along Peachtree Industrial Boulevard and Suwanee Dam Road. These opportunities would be planned and constructed in concert with large-scale redevelopment projects and offer opportunities to distribute traffic and increase connectivity. Identified intersection improvements are geared towards safety improvements for both vehicular and pedestrian traffic in higher intensity areas.

		traffic to move between the two expressways from
		southwest direction to northeast direction

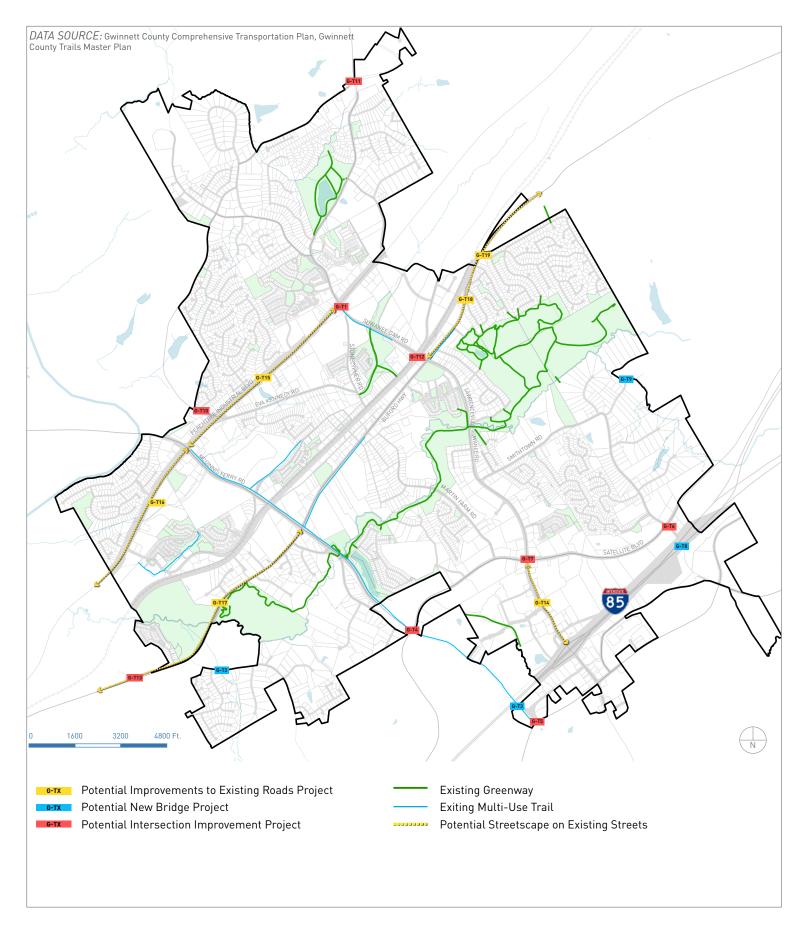

FIG. 25 ROAD INFRASTRUCTURE PROJECTS (GWINNETT COUNTY)

#### **Gwinnett County Transportation Projects**

Suwanee's arterials are owned and managed by Gwinnett County or Georgia Department of Transportation. These arterials are a vital part of the City; therefore, the City has a vested interest in the future of these roads in terms of their function and aesthetic. The City has made many investments on these roads to improve pedestrian and bicycle safety and mobility. However, the City relies on the County for improvements and maintenance of these roads as well as regional planning by the County, State, and Atlanta Regional Commission to insure that these arterials continue to function well to serve Suwanee residents as well as those that use these arterials for passing through Suwanee.

The County is currently updating the Gwinnett County Comprehensive Transportation Plan, Destination 2040. The plan prepared a list of projects that were prioritized through input from County staff, the technical and stakeholder committee, and the public. Priority projects were included in the County Comprehensive Transportation Plan's (CTP) Short-Range Plan and were also included in the short-term funding for the County's Special Purpose Local Option Sales Tax (SPLOST). Additionally, the CTP recommended long-range projects to include regionally significant projects. Projects from the CTP that are within the City limits of Suwanee are illustrated in Figure 26 and listed in the charts below.

#### Level 1

ID	Location	Discription
G-T1	Enhance Crossings of Peachtree Industrial Blvd. at Suwanee Dam	Install pedestrian countdown timers, streetlighting improvements, and brick pattern accented crosswalks at both intersections. Modify Suwanee Dam Road int

G-T19	US 23/SR 13/Buford Highway at Ruby Forest Parkway	Vertical Alignment

#### **Transit**

Suwanee is not currently served by transit. Demographic trends show that 1 of every 10 employed residents of Suwanee commute to Atlanta for work and could benefit from transit lines that connect Suwanee to Atlanta. There are currently two potential opportunities for transit stations in Suwanee that would connect Suwanee to other parts of the region via transit lines with dedicated paths. Suwanee should continue to advocate for both of the following options and a transit stop within Suwanee along both potential lines.

Suwanee Station was originally rezoned to PMUD (Planned Mixed Use Development) in May of 2000 in anticipation of a future commuter rail stop. In 1995, the Georgia Rail Passenger Authority identified six commuter rail lines that would radiate outward from Atlanta. Suwanee was identified as a potential stop along the Atlanta to Gainesville commuter rail line. More recently, the U.S. Department of Transportation (USDOT) identified a route from Atlanta to Charlotte as an intercity passenger rail corridor in the proposed Southeast High Speed Rail (SEHSR) network. A current study is being done by the Georgia Department of Transportation to determine the final route of this potential passenger rail line. Suwanee is a planned stop in 3 of the 6 routes under consideration.

The Gwinnett County Comprehensive Transportation Plan is currently being updated. The draft of this plan recommends a bus rapid transit (BRT) line with dedicated lanes that would pass through the Suwanee Gateway Character Area. This BRT line would extend down Satellite Boulevard with stops at the Infinite Energy Center, a proposed transit center at Gwinnett Place Mall, and a multimodal hub to be located in the western part of Gwinnett County near Jimmy Carter Boulevard. This proposed multimodal hub will connect to a MARTA heavy rail line extended up from the Doraville MARTA station and a proposed east-west BRT line that would connect Gwinnett to Fulton County and a new MARTA station planned at Holcomb Bridge Road and GA 400.

Another transit recommendation of the Gwinnett County Comprehensive Transportation Plan that would impact Suwanee includes direct access ramps from the I-85 managed lanes at the intersection of I-85 and McGinnis Ferry Road. Proposed ramps would be constructed connecting median managed lanes to the freeway overpass. The ramps would intersect with the overpassing road at a signalized intersection. Bus stops would be located on the ramps that would be connected to a new parkand-ride lot via sidewalks on the overpass structure. The direct access ramps enable Express buses to stop at these locations without having to travel on local streets.

Finally, a new local bus route is also proposed in the Gwinnett County Comprehensive Transportation Plan that would bring local service to Suwanee. A circular route is proposed that would run along McGinnis Ferry Road, Peachtree Industrial Boulevard, Suwanee Dam Road, and Buford Highway. The route would connect to the proposed Gwinnett Place Transit Center via McGinnis Ferry and Satellite Boulevard. The City should insure that any local service has a route that includes Station Center Boulevard in Suwanee Station and includes a stop at the transit station area that is owned by the City reserved for a transit station to serve the existing transit oriented development.

Page intentionally left blank

# **CULTURAL AND HISTORIC RESOURCES**

In 2013 Suwanee's historic district was listed in the National Register of Historic Places with 40 contributing buildings. Suwanee's historic district includes Main Street, Stonecypher Road, Scales Road, Russell Street, and White Street. Being on the Nation Register of Historic Places does not require the preservation of historic structures within the district or limit renovation, however it can assist property owners that wish to invest in the restoration of Suwanee's historic structures by making them eligible for historic tax credits.

Many of Suwanee's historic buildings have experienced reinvestment in the last 10 years. In 2014 the Rhodes House on Russell Street, which was once a railroad hotel and boarding house, was restored by an internationally acclaimed violin maker. Two of Suwanee's oldest landmarks along Main Street are experiencing reinvestment. The City purchased Pierce's Corner in 2005 to preserve one of Suwanee's oldest buildings. The City is currently renovating the building to sell to a future restauranteur. The building behind Pierce's Corner, Suwanee's old post office, was renovated in 2018 to be used as a law office. These public and private investments will add vibrancy to Old Town while preserving historic resources.

The Everett Music Barn has been an unofficial cultural asset to the City of Suwanee for decades. In 1964, the Everett Brothers began playing bluegrass music at their home on Stonecypher Road in Suwanee. Their home became a fixture on local radio shows in Buford, Canton and Cumming. In 1968, the Everett's built a music room specifically to host jam sessions. By 1971, the brothers built the barn behind their house to accommodate the many local and regional musicians that came to play and the audiences that came to see them. Since then the barn has hosted a number of national touring bluegrass musicians and launched the careers of others. The City officially recognizes and promotes the barn as a historic and cultural asset. This will protect both the physical structure and unique use of the barn.

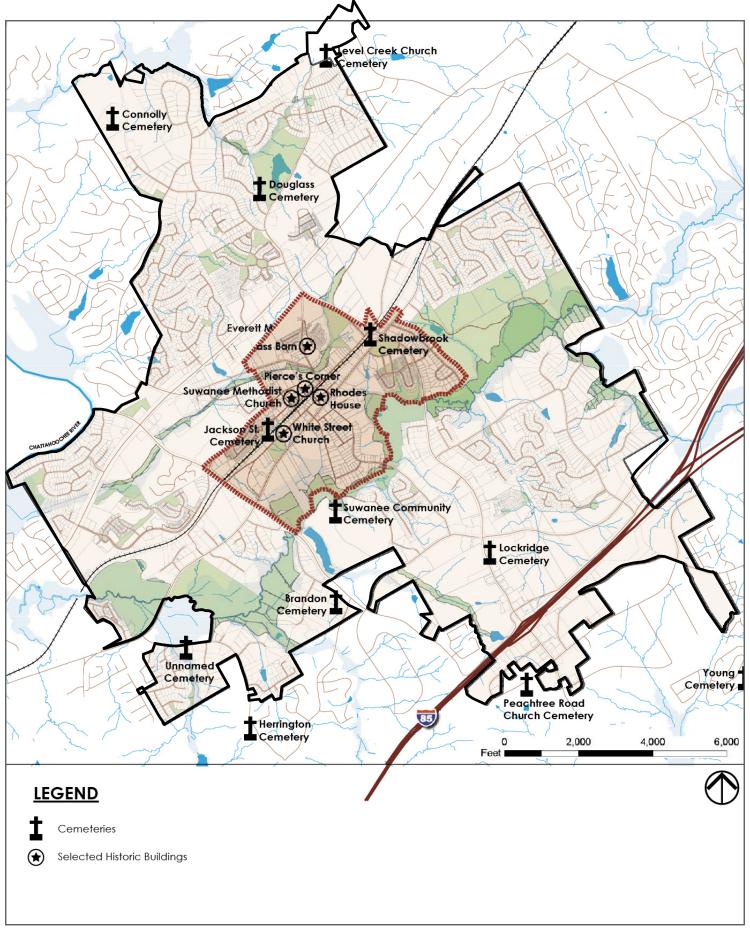

FIG. 26 CULTURAL AND HISTORIC RESOURCES MAP

# **NATURAL RESOURCES**

The City and its citizens have taken several steps toward protection of natural resources and the environment. These steps included new regulatory controls and significant local initiatives.

The 2001 Open Space bond referendum, approved in November 2001, allowed the City to take a proactive approach to protecting natural resources by providing funding for the protection and acquisition of environmentally sensitive tracts. The City subsequently purchased an 85 acre tract with approximately 60 acres of wetlands along Suwanee Creek, a 61-acre tract with a lake on Suwanee Dam Road, a 24-acre tract along Brushy Creek in Old Town, a 10-acre tract with wetlands along McGinnis Ferry Road, and a 7-acre tract with several small streams along Buford Highway. On the 61 acre parcel on Suwanee Dam Road (Sims Lake Park), the City reconstructed the existing dam on the site to meet Safe Dam requirements. The parcels purchased were all identified in the City's Open Space and Recreational Needs Assessment.

# **River and Stream Corridors**

Protection of the Chattahoochee is provided by the Metropolitan River Protection Act (Georgia Code 12-5-440 et seg.), which was passed by the Georgia Legislature in 1973 and created a 2000-foot Corridor on both sides of the river. Protection in the Corridor is provided by the Chattahoochee Corridor Plan, which was authorized by the Act and includes standards that must be met by development in the corridor. These standards include limits on land disturbance and impervious surface, floodplain requirements, and a 50-foot undisturbed vegetative buffer and 150-foot impervious surface setback on the river and a 35-foot undisturbed buffer on certain tributaries in the corridor. The Chattahoochee River touches the western edge of the City of Suwanee. There are currently two tracts of land that have some remaining developable area within the river protection corridor.

In 2005, the Metropolitan North Georgia Water Planning District adopted a Watershed Protection Plan that includes the City of Suwanee. As a result of this plan, the City was required to adopt new stream buffer requirements increasing stream buffer regulations from 25 feet in width to 75 feet in width.

# **Groundwater Recharge Areas**

Groundwater recharge areas are geologic formations where water enters the ground to replenish aguifers, the underground holding tanks of groundwater. In order to avoid toxic and hazardous waste contamination to drinking water supplies, groundwater recharge areas must be protected. These areas are especially sensitive to hazardous substances, which could contaminate local drinking water. There are a total of nine groundwater recharge areas in Gwinnett County; one of these is located on the eastern edge of the city limits of Suwanee. The Groundwater Recharge Ordinance was adopted by the City in 1999.

# Wetlands

Wetlands serve as important fish and wildlife habitats and breeding grounds and are an integral part of food chain production. Numerous plants and animal species have adapted to the special conditions of freshwater wetlands and cannot survive elsewhere. They serve as storage areas for flood protection/control, erosion control, water quality maintenance, groundwater recharge and supply and for recreation opportunities. In Suwanee, wetlands are primarily found along streams and particularly along Suwanee Creek. In 1999, the City amended its zoning ordinance to clearly require compliance with U.S. Army Corp of Engineers requirements regarding any land disturbance proposed in a wetland area.

# **Floodplains**

Suwanee, Level, Ivy and Brushy creeks are the primary sources of flooding in the City. Flooding usually occurs during the spring due to periods of frontal system activity. Floodplain Management is required under the National Flood Insurance Act of 1963 and the Flood Disaster Protection Act of 1973. The City has adopted Gwinnett County's FEMA (Federal Emergency Management Agency)-reviewed Floodplain Management Ordinance. Additional restrictions regarding lots containing floodplain areas and site plans also are outlined in the Zoning Ordinance. Use Provisions.

# Certification

In 2009, the City of Suwanee was one of the first communities to be certified "Green" under the Atlanta Regional Commission's Green Communities Program. The city reaffirmed its commitment to environmental stewardship in 2013 when it recertified as a Green Community at the Bronze level. In 2017, Suwanee was recognized a third time by recertifying at the Bronze level. Some sustainable practices that earned certification points for the City included:

- Offering residents increased access to pedestrian and bicycle activity via construction of the Brushy Creek Greenway Trail
- Constructing the first LEED certified city hall in Georgia
- Starting Gwinnett County's first community bike share program in \_\_\_\_\_
- Hosting Georgia's largest organic community garden including a rainwater cistern and a community orchard
- Encouraging smart growth development

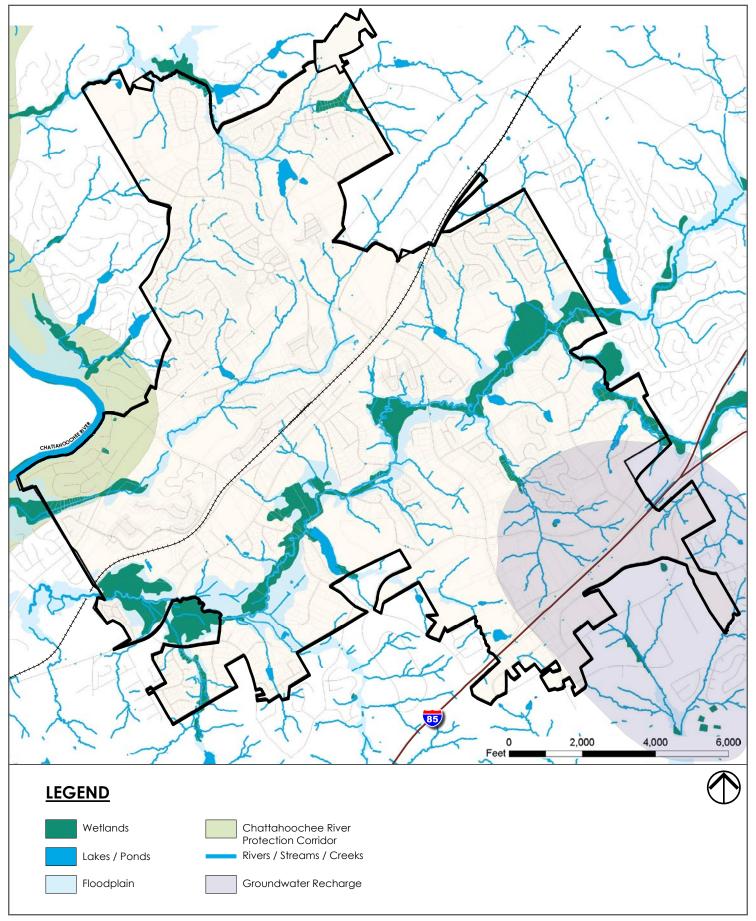

FIG. 27 NATURAL RESOURCES MAP

# **BROADBAND SERVICES**

The City has adequate broadband coverage to be regionally competitive. Suwanee is served by multiple broadband service providers including AT&T, Level 3, Charter, and Comcast.

# **ECONOMIC DEVELOPMENT**

The City of Suwanee has not historically undertaken conventional "suit-and-tie" economic development recruitment efforts. Larger regional players, such as the Gwinnett Chamber of Commerce with its Partnership Gwinnett Program, adequately fill that role. Instead, the City has found that focusing on quality of life issues for its current residents is a highly effective economic development tool. A good quality of life is essential in attracting new businesses that depend on knowledgeable, highly skilled workers. As the City continues to grow, diverse quality of life objectives and features like sound government, a safe and clean community, quality housing, parks, walkability, low taxes, good schools, places to gather and be social, and a sense of community are critical. To this end, the City has made efforts to focus on providing features and services such as Town Center Park, Suwanee Creek Greenway, Sims Lake Park, local events, Community-Oriented Policing, and P.A.C.T. programs.

There are several areas with significant retail, industrial, and office land uses that contribute to the economy and provide employment opportunities. However there is a need for economic diversification and additional business attraction in the City including creation of highly-skilled jobs that better correlate to Suwanee's well educated residents that are currently commuting for work. This is an important goal to give Suwanee residents a wider variety of job opportunities closer to home.

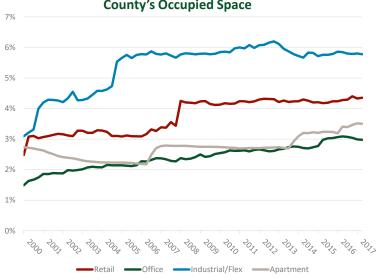

# Commercial Real Estate Assessment

- The commercial real estate market in Suwanee can be characterized as healthy, with higher rents and lower vacancies than similar properties in other parts of Gwinnett County.
- Retail rents in Suwanee have yet to return to their prerecession level; however, the local retail market is performing stronger than countywide retail.
- Suwanee office space accounts for 2.8% of all Gwinnett County office space while achieving significantly higher average rents: \$19/SF in Suwanee compared to \$15/ SF countywide.
- Industrial/flex space in the City of Suwanee has significantly increased as a share of space countywide since 2000 and achieves some of the highest rents in the County.

City of Suwanee Share of Gwinnett County's Occupied Space

■ The City of Suwanee's share of Gwinnett County's occupied commercial real estate has increased significantly across all sectors since 2000.

Based on data from CoStar Inc.

41

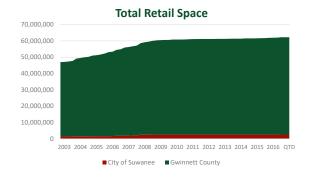

# RETAIL MARKET

- There is over 2.6 million square feet of retail space in the City of Suwanee, making up 4.4% of all Gwinnett County retail space.
- Average retail rents in Suwanee (\$14.29/SF) are slightly higher than either Gwinnett County or Metro Atlanta.

	City of Suwanee	Gwinnett County	Metro Atlanta
Existing Buildings	170	3,642	25,844

# **COMMUNITY PARTICIPATION**

City Events **Project Website** Online Survey National Citizen Survey Focus Groups Summary Public Open Houses Steering Committee Meetings Punlic Hearing

# COMMUNITY PARTICIPATION

The City of Suwanee has a legacy of engaging community stakeholders in thoughtful and meaningful ways. The success of previous plans is a testament to the City's commitment to community-based planning. The 2040 Comprehensive Plan seeks to build on this legacy through the use of multiple engagement techniques and forums including: public open houses, a project website, focus groups, a steering committee and an on-line survey. Forums were designed in such a way as to:

- 1. Educate participants on past planning and implementation efforts to demonstrate that good planning has led to on the ground results and to show that community voices have been heard and feedback acted upon;
- 2. Encourage participants to validate previous long-range planning concepts that are still valid so as not to recreate the wheel or unnecessarily unravel current efforts;
- Encourage participants to re-examine previous long-range planning concepts that may need to be reexamined based on changing market dynamics or community preferences;
- 4. Allow participants to suggest new planning concepts that have heretofore not been considered or were not relevant in past plans.

Collectively these efforts have led to a 2040 Comprehensive Plan that solidly builds upon the previous plan yet still looks forward in new and exciting ways.

# **CITY EVENTS**

City staff took advantage of various city events including Food truck Friday, Grown in the Park, and Suwanee Fest, to reach out to captive audiences who might not otherwise participate in traditional planning meetings. At these events, staff focused on sharing information about the upcoming public open houses and directing people to places where they could provide easy on-line input including the project website.

# 2040 PLAN PROJECT WEBSITE

The project website remained active throughout the planning process as a portal of ongoing information and mechanism for public feedback. The webpage had a dedicated URL (https:// www.suwanee2040plan.com/) and also a link from the City's website. Content on the project website included:

- What and Why? Background information on comprehensive plans in general and the 2040 plan specifically
- 2. Participate: Links to the on-line survey, announcements for impending public open houses, images from past open houses and a location to submit comments
- Timeline: An overview of the planning process
- Project Documents: Various presentations, maps and documents showing progress along the way

# **ON-LINE SURVEY**

An interactive unscientific survey was conducted from May 2017-July 2017 (3 months) as a way to connect the 2040 planning process to a broader audience. The Survey included a list of 25 questions related to specific planning issues along with several questions related to participant profiles (e.g., as a way to correlate responses and trends to specific demographics or circumstances). The format of questions included multiple choice, ranking, and descriptive "fill in the blank" questions. Some questions delved into preferences of land use and development within individual Character Areas. Others were overall questions about mobility and connectivity, citywide vision, assets and strengths, issues and challenges, open spaces, and economic development. Over 150 individual responses were logged over the 3-month period. Survey response highlights include the following:

Comments

"Both my spouse and I have collectively moved 40 times before we moved to Suwanee, he has now lived here for 6 years and I have for 3. We have found a place we don't want to leave because it's a haven for us. We love TCP and I walk there multiple times a week. We use the greenways to train for half marathons, attend many festivals here etc. We would love to see more single family homes on medium sized lots so that the population density doesn't get insanely high and dilute what makes Suwanee awesome. Also we would love to see the green ways connect even more neighborhoods and a craft brewery and a farm to table restaurant would be nice too!"

"The first things you see when you get off the exit in Suwanee are a sex shop and 2 smoke shops. When people come to visit us, they always point that out. We are concerned if many more townhome/ apartments/ big neighborhoods are placed, that our schools will be too crowded and that we may be forced to change school districts which would be very upsetting to us. Other than that, we love Suwanee! My husband grew up here and we have been happily raising our own family here, keep up the great work!"

90% of respondents chose this as a more appropriate option in Suwanee **Gateway Area** 

CONVERT AGING AND UNDER UTILIZED COMMERCIAL PROPERTIES INTO RESIDENTIAL DEVELOPMENT

70% of respondants chose this as the least appropriate option HIGHER RESIDENTIAL DENSITIES IN STRATEGIC LOCATION

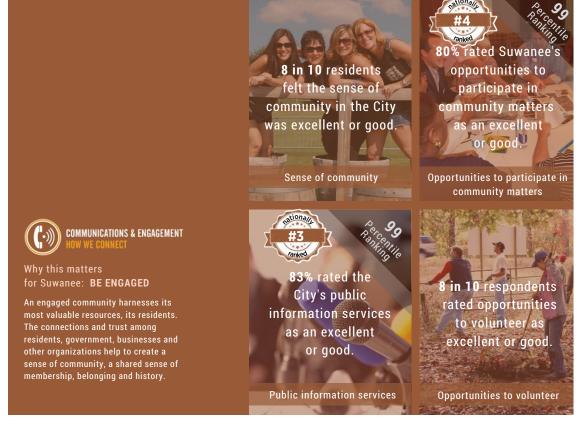

70-75% of respondants chose this as least appropriate Housing type MULTIFAMILY RENTAL/CONDO STACKED FLATS

# NATIONAL CITIZEN SURVEY

In April 2017, the City of Suwanee voluntarily participated in its fifth National Citizen Survey, a statistically valid survey managed by the National Research Center that gathers resident opinions across a range of issues. The survey was sent to 1,500 randomly selected city addresses. As in previous years, residents' ratings put the city at or near the top in a variety of areas compared to other communities across the country.

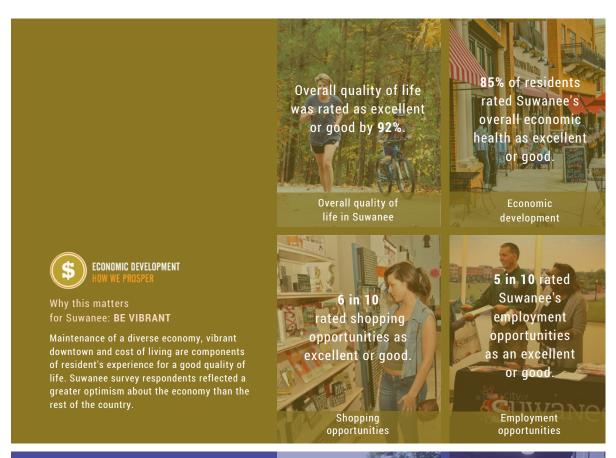

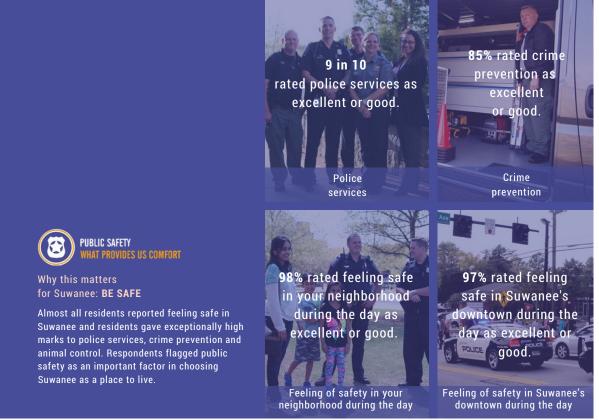

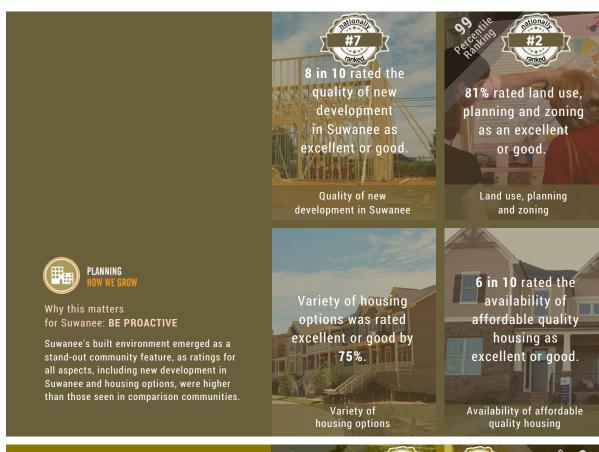

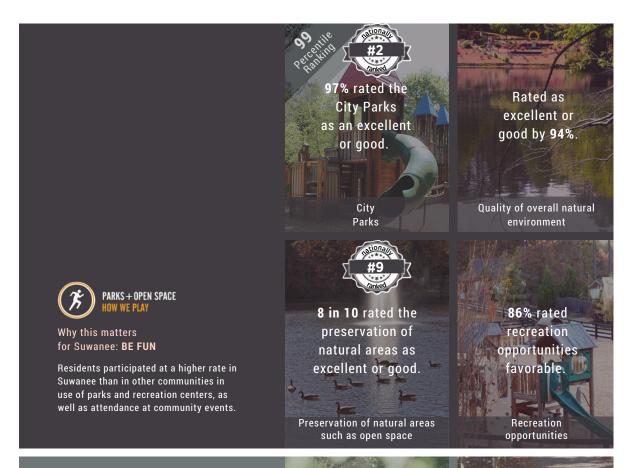

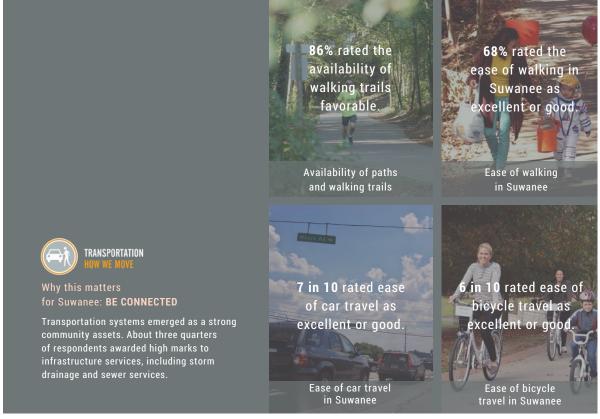

# **FOCUS GROUPS**

A series of focus groups involving 34 stakeholders were conducted on April 13th, 2017 and April 20th, 2017. Participants included an array of community interests including the Mayor and Councilmembers, business owners, residents including many homeowners association leaders, and members of City boards including the Planning Commission, Zoning Board of Appeals, Downtown Development Authority, and the Public Art Commission. Overall, 19 of Suwanee's neighborhoods were represented.

These meetings were conducted at the very outset of the planning process to solicit broad feedback about where the planning process needed to focus, what is working well, what needs to be reconsidered, etc. Common themes from these meetings are summarized below:

# Vision

- Create a connected community through infrastructure, events, culture, place-making, public art, shared-vision and ownership
- Community buy-in is important
- Need more housing diversity
- Leadership development how to ensure another generation of good leaders?
- Intergovernmental relationships, particularly with Gwinnett County - be mindful of things outside the City's control, outside the City's borders
- What does the City do well? What is already working?
- Diversity youth leadership, social connections with diverse ethnic population
- Good Neighbors intergovernmental relations with neighboring cities and Gwinnett county
- Walkability with the addition of sidewalks and trails, some neighborhoods feel more connected and walkable. Buford Highway is improving

# Where are the gaps and opportunities? What should happen better?

Transportation & Mobility – local street network needs to be more efficient (Eva Kennedy, Martin Farm, Stonecypher) to alleviate congestion on major thoroughfares. Sidewalks on high traffic corridors feel unsafe. Is a shuttle system possible? Shared transit like Uber?

Interstate 85 Transportation – opportunities for enhanced operations? Diverging diamond interchange, flyover near Smithtown, McGinnis Ferry bridge with ramps, etc.

- Cultural leadership Strong legacy but how can we continue it forward?
- Housing types we are missing opportunities for millennials and empty nesters seeking to downsize, need to explore infill housing opportunities
- More Mixed-use development in feasible locations such as Buford Highway, Lawrenceville-Suwanee corridors
- Suwanee Gateway still not getting what we want here, are there longer term opportunities for Class A offices, businesses, hospital, medical facility, entertainment venue, hotel, conference centers? No desires for additional big box retail, strip commercial and fast food chains.
- More Local businesses, music, food, entertainment, artists
- Reuse and redevelopment of underutilized properties in strategic locations, what types of new uses make sense?
- Aging in place Need architectural standards for senior housing within a general community (not for a standalone senior housing), be close to services in walkable areas
- Urban Grocery store is there an opportunity within walking distance of Town Center and Old Town?
- Recreation & amenities waterbodies could be turned into amenities, create connections to Chattahoochee river. other parks need to be improved with more amenities

# What are the challenges?

- Too many strip malls
- Too many townhomes
- Several residential developments on Peachtree Industrial Boulevard outside the City limits will create facilities demands inside the City
- Non-tax payers are using City facilities which impacts parking. Should we consider parking fees?

# **PUBLIC OPEN HOUSES**

These "drop-in" style meetings were hosted by City and consulting team staff in a way that allowed for one-on-one interaction through a series of "planning stations" arrayed around the room. Each planning station contained large-format boards or plots with information and multiple interactive exercises for participants to provide input. All meetings were held in City Council chambers at City Hall from 4pm to 7:30 pm. Open houses were advertised with fliers distributed at events. retail locations, community clubhouses, neighborhood mail kiosks, emails to homeowner's association representatives, and online via the city website on a Facebook page.

# We want to **hear** from you

The City of Suwanee is updating our Comprehensive Plan

# Join us at our Public Open Houses

4:00-7:30pm April 27, 2017 July 20, 2017 September 28, 2017

Suwanee City H

suwanee2040plan.com

# Public Open House #1 (April 27th 2017)

This open house included multiple planning stations including: 6.

- Introduction: This station provided an overview of the process, an outline and sample of previous planning efforts and an educational exhibit explaining the benefits of Comprehensive Plans.
- City of Suwanee Now!: This station included a series of informational boards showing existing conditions including land use, zoning, amenities, mobility, etc. Participants were encouraged to provide corrections, clarifications and additions.
- 3. 2030 Comprehensive Plan: This station displayed important

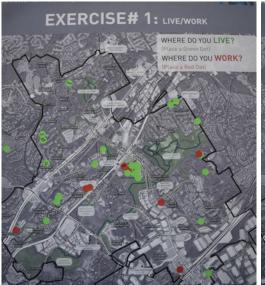

Come to the kick off meeting for our Comprehensive Plan update tonight! Drop in City Hall anytime between 4:00-7:30 p.m. to share your thoughts about the future of Suwanee as we plan for the next 20 years. For more information or to follow the planning process online visit www.suwanee2040plan.com

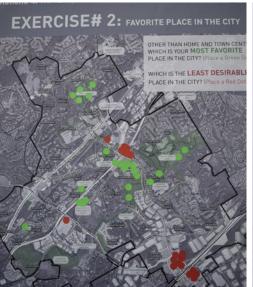

planning concepts and visions from the previous 2030 plan. Participants were encouraged to validate or challenge previous concepts for carrying forward into the 2040 plan.

- 4. Live/Work Exercise and Favorite Place in the City Exercise: These exercises asked participants to locate on a map where they live, where they work and their most / least desirable places in the City. This helped City staff and the Consulting Team understand the perspectives that various participants represent.
- 5. Validation of Vision: This exercise allowed participants to validate the previous 2030 Vision statement and, where appropriate, update or modify the vision for 2040.
- 6. Issues, Needs and Opportunities: This exercise utilized an 8' by 8' map of the entire city and asked participants to put tags and descriptions in geographic locations where they felt attention was needed. Participants were asked to consider issues related to housing and mixed-use, retail/commercial, recreational and cultural amenities, transportation/mobility, and open space.

Input was received across a wide range of issues, geographies and level of specificity. The most prevalent comments included:

- The City has done a good job implementing previous plans.
- For the most part, the 2030 Comprehensive Plan is still

- Some strip commercial centers could be redeveloped.
- Future development should continue to move away from auto-oriented uses such as gas stations and fast food.
- The City could use a great diversity of housing types to create more living options including cottage style housing and master-on-main units if feasible.
- Improve intersection at Main Street and Suwanee Dam Road
- There is a need for a traffic light at Town Center Avenue and Buford Highway.
- Need to connect King Street.

Station# 1: Introduction

# **INTRODUCTION**

# WHAT IS A COMPREHENSIVE PLAN?

rehensive Plan is a long-range plan that establishes strategies to address of its long-term goals for the future over the next 20 years.

Comprehensive Plan is a city-wide plan which establishes an overall vision and goals for the City as a whole and prescribes future land use and a work program that address the needs of the entire community.

- Community Needs and Opportunities: Immediate challenges faced
- . Land Use Element: Update Character Areas\* Map and Future Land Use
- Community Work Program: to do list for addressing the challenges

# **WHY 2040 PLAN?**

Plan will be an update to the "Suwanee 2030 Comprehensive Plan," which was completed in 2008. In addition to fulfilling State requirements, the Comprehensive Plan is an important tool for guiding future

## Benefits of a Comprehensive Plan

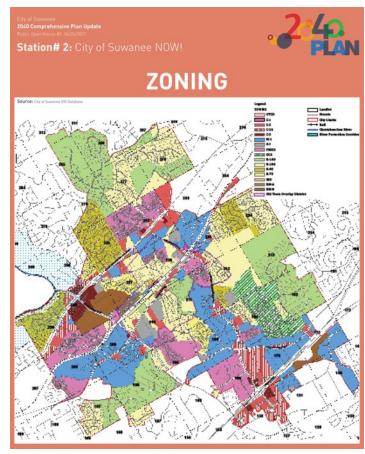

- Shows important relationships between community issues
  Tracks implementation of community-based policies
  Creates an environment of predictability for business, investors, and property owners

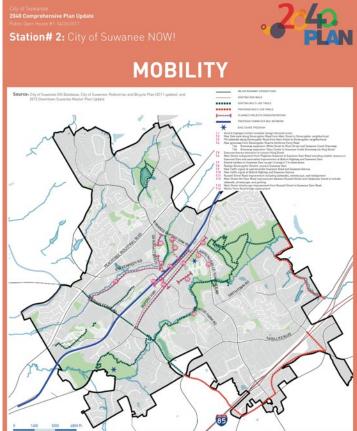

It is important to revisit the Comprehensive Plan every 10 years to identify and plan for any new needs and opportunities that may not have existed in previous planning efforts and to update the plan in the context of changes in population, changes in

https://www.suwanee2040plan.com

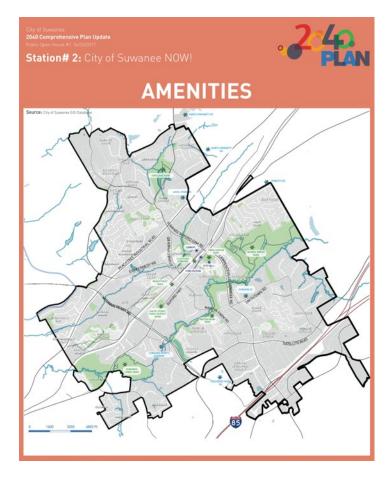

2040 PLAN Station# 1: Introduction **PLANNING SCHEDULE** 

# 2030 COMPREHENSIVE PLAN HIGHLIGHTS

- The potential development of the commuter rail system and location of a station along the tracks within this area instigated the development of Suwanee Station.
- The area should continue to focus on residential development and capitalize on the possibility of a commuter rail station.
- There should be a balance between rental and ownership properties, which in turn should encourage commercial growth in strategic locations.
- Most of the character area is likely to develop according to SUWANEE GATEWAY: the approved concept plan for the Suwanee Station mixed use 
  • Future land use should be dominated by office and commercial

# SATELLITE NORTH:

- Satellite North should function as a transitional area between this activity center to the north and the emerging economic anchor

  The Gateway.

  Overall, Suwanee Gateway should present a strong, positive image of of Suwanee Gateway to the south.
- Viable existing and new commercial uses should be encouraged and supported in most of Satellite North.
- Because of the proximity to Town Center and the city's substantial investment in the greenway, the vision for the redevelopment of Sharon Industrial Way should follow the mixed-use and residential precedent of Town Center, with special attention given to the possibility of creating new senior housing as a program

# SUWANEE NORTH:

- The areas should have increased pedestrian connectivity and
- Most of the vacant and redevelopable land should adhere to the existing character of the city and be developed as single family residential or compatible uses

# BUFORD WEST:

This character area is not a priority for growth and development The immediate future envisions this area to be limited to industrial uses with development limited to undeveloped parcels in existing

As the name suggests, these neighborhoods are The immediate future envis business parks.

## SMITHTOWN ROAD

- homes. The area should be developed as a safe residential haven with limited and slow traffic moving through the neighborhoods. Pedestrian connectivity should be enhanced through streetscape
- projects such that surrounding areas of the city, like George Pierce Park, Martin Farm Park and Town Center, become easy to access without complete dependency on the automobile.

- mixed-use, with retail and hospitality capitalizing on the

- Suwanee Gateway should be a regional hub.

· As the name suggests, these neighborhoods are es residential areas and should be preserved as such

# PEACHTREE INDUSTRIAL BOULEVARD:

- The corridor should be enhanced with streetscaping and tree plantings, as well as safety improvements to encourage more
- pedestrian use and connections with adjacent neighborhoods.

  Create PIB as a landscaped multimodal parkway that is a retai spine of Suwanee, with new or redeveloped retail frontage patterned
- after architecturally-rich retail developments.

  The PIB / McGinnis Ferry intersection (Character Area 2a) should be surrounded and intensified by this type of development in the
- The PIB/Suwanee Dam Road intersection [Character Area 2b] is larger in size and should incorporate intensified retail on the PIB frontage parcels and Traditional Neighborhood Development like Village Grove on adjacent land.

- redevelopment of the lumberyard) and into the vacant land adjacent to Old Town, as envisioned in the Old Town Master Plan.
- New residential development adjacent to Old Town should consider its special context, and integrate into its landscape while transitioning down in density.
- New mixed-use development across Lawrenceville-Suwanee Road should be similar in nature to that flanking the city hall site, but set back from the right-of-way to allow for a plaza that mirrors the hardscaped edge of Town Center Park.
- Streets in this area should be extended to link into George Pierce Park as appropriate.

# HISTORIC OLD TOWN:

- Historic preservation should be balanced with new construction. and infill development encouraged but designed and built in designed and built in ways that maintain and enhance the environment and unique small-town characters. small-town character.
- The area around the small, but distinct, Main Street should be reinforced with compact and compatible development.
- Town Center should be extended to Russell Street along Buford Highway with buildings and uses that embody pedestrian-oriented principles, gracious sidewalks, lively storefronts, substantial and continuous building masses, and concealed parking and services.
- Russell Street itself should serve as a gateway to Old Town and Main Street, but complement and not compete with Town Center as a destination.

  Old Town should also encourage mobility options and walkability
- with new sidewalks where needed and road improvements or ns to provide street network connectivity to adjace

# Public Open House #2 (July 20th 2017)

This open house included multiple planning stations including:

- 1. 2040 Working Vision Statement: Participants were encouraged to provide comments on an early draft Vision statement that was adapted from the 2030 Vision.
- 2. Character Areas Update: This included a city-wide map showing the 2030 Character Areas alongside proposed 2040 Character Areas (some of which had modified boundaries from 2030).
- 3. Transportation Framework: Participants were asked to weigh in on draft transportation and mobility concepts.
- 4. Community Survey Summary Results To Date: Participants were shown highlights of the on-line survey.
- 5. Peer Cities Data: Participants where shown various population, jobs, housing and density statistics from several aspirational peer cities to show how Suwanee stacks up.
- 6. Character Area Exercises: Participants engaged in exploring goals and development character across nine distinct Character Areas.

Input received at this Open House set the stage for finalizing the overall Vision along with more detailed planning and design within each Character Area. General takeaways included:

- The draft Vision does a good job expressing the community's desires.
- The proposed boundary changes to Character Areas (from the 2030 Plan) were generally accepted.
- Historic Old Town could benefit from lower density cottage style housing if it is feasible.

- Suwanee Town Center densities and character should continue to develop and expand, including south of Suwanee Creek Greenway.
- Suwanee Gateway is still envisioned as an area that could dramatically redevelop including higher densities, particularly office, commercial and mixed-use development.
- The Peachtree Industrial Corridor should not be fully developed as strip retail. Mixed-use and residential development should be explored in some locations along the corridor.

\*\*Please note that there is a LOT of activity in front of and around City Hall tonight! Please enter through the back door; there will be directional signage. We're sorry for any inconvenience this may cause!

The final Public Open House focused on presenting elements of the draft plan for final comment. Elements presented were refined based on feedback from the Steering Committee, City Staff review and public input received in previous open houses. Elements presented included:

- 1. The 2040 Vision Statement
- 2. The new 2040 Character Area boundaries.
- 3. Development Framework Plan: This exhibit showed locations in the City likely to redevelop over the next 20 years along with proposed future land use for each area.
- Selected Growth Scenario: This exhibit highlighted the resulting changes in City population, jobs and commercial square footage based on the development patterns envisioned in the 2040 plan.
- 5. Character Area Frameworks: These exhibits showed specific goals, future land use concepts, desired development character, and renderings of future development (in select locations).

# 2040 STEERING COMMITTEE:

For this important effort, a Steering Committee was utilized to solicit input from the community throughout the planning process. The Steering Committee included City Councilmembers, representatives from each of the City boards, a County Commissioner, and the last two Suwanee Mayors.

**Mayor Jimmy Burnette** 

City Councilmembers:

Dan Foster

Dick Goodman

Beth Hilscher

Doug Ireland

Linnea Miller

# **Steering Committee Members:**

Scott Auer, Zoning Board of Appeals and Public Art Commission

**Jace Brooks**, Gwinnett County Commissioner and former City Councilmember

Ray Brown, Zoning Board of Appeals

Roger Grant, Harvest Farm Board

Cherie Heringer, Public Art Commission

Lila Kelley, Planning Commission

Jerry Little, Downtown Development Authority

Nick Masino, former Mayor

Keith Nabb. Public Art Commission

Julie Purdue, Downtown Development Authority

Glenn Weyant, Planning Commission

Dave Williams, former Mayor

Randy Winfield, Downtown Development Authority

Over the course of the planning process, the 2040 Steering Committee met five times. These meetings were open to the public. The agendas for these meeting were advertised on the city website and in local media and posted on the front windows of City Hall (see advertised agendas that follow).

# Meeting #1: May 18, 2017:

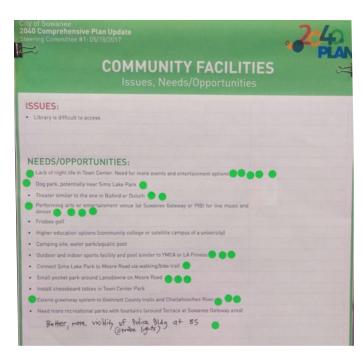

This meeting focused on explaining the planning process, presenting the market study highlighting demographic and economic trends, showing changes in land use and housing over the past 10 years, highlighting current / ongoing projects that impact long range planning, and outlining preliminary community feedback.

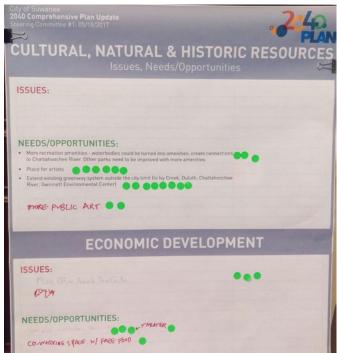

Steering Committee members and City Councilmembers were asked to review, validate and prioritize issues, needs and opportunities compiled based on Focus Groups and Open House #1.

"It would be NICE if Suwanee was more like....."

- Parson's Alley and theater in DULUTH
- Restaurants and Theater in LAWRENCEVILLE
- Fine dining in Avalon, ALPHARETTA
- Authentic restaurants on Canton Street in ROSWELL
- Walkable like
   SHIRLINGTON VILLAGE

- Variety of restaurants and downtown development character in GREENVILLE
- Housing diversity in SERENBE,
   VICKERY and CHARLESTON
- Downtown Market, fine dining and breweries in GRAND RAPIDS
- Restaurants at the Forum in PEACHTREE CORNERS and in Downtown BUFORD

# Meeting #2: June 22, 2017:

This meeting focused on review of a preliminary vision statement, a presentation on the trade-offs and benefits of density, a comparison of peer "aspirational" cities selected by the Steering Committee and an innovative, interactive work session.

# WHAT THE DATA TELLS ABOUT ASPIRATIONAL PLACES...

# PROJECTED POPULATION GROWTH

POP	ULA	LION	DEN	ISITY

	Population, Estimate 2016 (People)	Population Density (People per Square Mile)	Size (Sq.Mile)	Full Service Restaurants
Lawrenceville	30,782	2,299	13.39	39
Duluth	29,331	2,936	9.99	78
Greenville	67,453	2,353	28.67	181

# HOUSING DENSITY

	Households (2011- 2015)	Housing Units (2010)	Housing Density (units/acres)	Median Household Income (2011-2015)
Lawrenceville	10,047	11,187	1.31	\$41,743
Duluth	10,823	11,313	1.77	\$55,660
Greenville	26,636	29,418	1.60	\$41,924
Roswell	34,697	36,344	1.39	\$82,150
Suwanee	5,525	5,919	0.85	\$82,440
Alpharetta	22,824	23,029	1.34	\$92,839
Fulton County	908,249			
Gwinnett County	352,102			

	Total Jobs	Employment Density (jobs/acres)	Full Service Restaurants
Lawrenceville	27,661	3.23	39
Duluth	18,252	2.85	78
Greenville	123,044	6.71	181
Roswell	61,873	2.37	114
Suwanee	24,106	3.46	48
Alpharetta	89,056	5.17	118
Fulton County	908,249	2.66	1,110
Gwinnett County	352,102	1.26	672

Source: US Census, ARC, Claritas, ESRI

In a nutshell, Suwanee is LOWER in residential, housing, and employment density compared to aspirational cities

# **EMPLOYMENT PROJECTIONS**

# ASPIRATIONAL CITIES COMPARISON

	Population (2016)	Full Service Restaurants	"Office Workers"	Daytime/Night time Restaurant Spending	Restaurant Revenue	Local Spending Ratio	
Lawrenceville	30,782	39	2,785	\$1,878,315	\$30,266,000	105%	
Duluth	29,331	78	3,580	\$2,414,495	\$45,429,000	97%	
Greenville	67,453	181	18,918	\$12,759,056	\$208,339,000	48%	
Roswell	94,598	114	10,819	\$7,296,766	\$113,677,000	1639

Support from Outside Potential for More Need More

At Equilibrium

# Meeting #2: June 22, 2017 (Continued)

The work session involved breaking participants into three facilitated groups. Each group was charged with planning for Suwanee's growth using a game format of poker chips and playing cards. The exercise was intended to have participants explore the benefits of increased overall city density by allowing them to "buy" additional community facilities as they increased growth and density. This was followed up by charging participants with finding areas within the City to then locate and distribute the resulting growth (both in jobs and housing).

# HOW MUCH ARE YOU WILLING TO BET ON SUWANEE'S FUTURE?

Breakout into 3 groups

60 minute exercise

# Follow these steps:

Choose dining options

Choose job growth

Choose transit options

Want a corner market?

# Create your Group Scenario

Distribute Population Growth

Review resulting density equivalents

Lather, rinse, repeat as needed...

STEERING COMMIT JUNE 22, 2017, THURS		2 BREAKOUT G	ROUP EXERCIS	E ZABZ						
HOW MUCH ARE YOU WILLING TO BET ON SUWANEE'S FUTURE?										
This game is not intended to be a hyper-ration Rather, it is designed to be a somewhat abstract exthe trade-offs of density, population and job gramenities. We are asking you to make choices "where does it go" to help us better understand to the grame rules and metrics are based on a comunique to Suwanee along with best practices, pla and research of similar cities across the region and we are asking you to make below reflect the most that we keep hearing from Suwanee stakeholders	ercise to demonstrate rowth and associated of "how much" and he impacts of growth. bination of conditions nning rules of thumb, d country. The choices t common sentiments	Bear in mind your choices below will have a direct impact on population growth, housing density, traffic and quality of life!								
Step 1: Choose the number and types of										
High End White Table Cloth  Micro/Craft Brewery	○ World Cuisine (lik		High End Ster Grille)	High End Steakhouse (like The Capitol Grille)						
Farm to Table / Organic	Gourmet Southw			Coffee House/Pastry Café (like Café						
Chef Driven Restaurant	Gourmet Pizza (li	ke Anticos)	Intermezzol							
Step 2: Choose the number of new jobs you'd like to see added to Suwanee by 2040. ARC projects +/-8,000 by 2040.										
○ 5000 ○ 6000 ○ 7000	8000	O 9000 (	)10,000 ()1	1,000						
Step 3: Would you like to see Commuter Rail in Suwanee? (regional transit, shares tracks with the railroad, connects to other Gwinnett Cities and into Doraville MARTA station).  Oracle YES  NO										
Step 4: In addition (or instead of) Comm	uter Rail, what loca	al transit service wo	ould you like to se	e?						
Local city-subsidized ride share (Uber,	s, etc.	No local transit service								
Lyft, etc.)										
Step 5: Would you like to see Old Town/Town Center get a small-scale corner market?  NO										
Step 6: Consolidate your individual choices into an overall group scenario and hand in to banker to get your payout.										
Based on your selections above, your banker will provide you with an associated population and jobs growth (poker chips) and amenities (playing cards)										
Step 7: As a group, use the poker chips to distribute your chosen jobs (Red) and population growth (Blue) within specific Character Areas. Use your playing cards to show locations for amenities.										
Step 8: Revisit your above decisions as needed and play around with various scenarios.										

uwanee

# **WORKSHOP THREADS...**

- Openness to higher population and job growth than ARC projections
- Strong desire for commuter rail (but not in City control)
- No consensus on City-supported transit
- Opportunity for population/housing growth in Downtown area (Town Center, Old Town and PIB/Suwanee Junction)
- Consensus on extending the Town Center character area to the north and south to accommodate "denser" growth in strategic locations
- Strong desire for job growth in Suwanee Gateway...and population/housing
- Openness to higher population and job growth than ARC projections

# TABLE 1

No. of people: 14,000

No. of jobs: 9,000

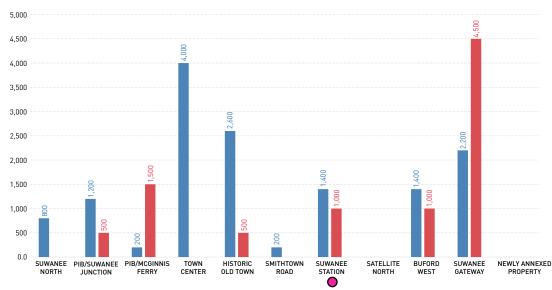

# Amenities:

4: Unique, non-chain restaurants (Not placed in any particular character area)

1: Corner market (didn't had enough density in a particular character area or cluster of character areas to support it)

1: Commuter rail transit system

Note: Table 1 did not choose city wide alternate local transit service as an option

# **TABLE 2**

No. of people: 16,000

No. of jobs: 10,000

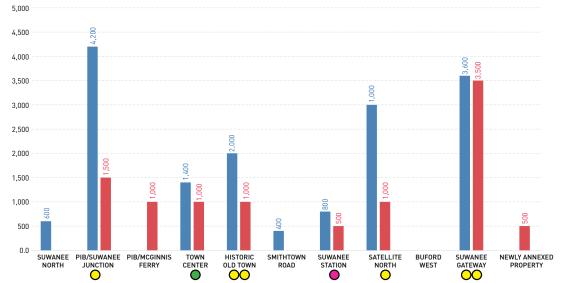

# Amenities:

6: Unique, non-chain restaurants

1: Corner market

City wide subsidized ride share program

1: Commuter rail transit system

# TABLE 3

No. of people: 15,000

No. of jobs: 7,000

# Amenities:

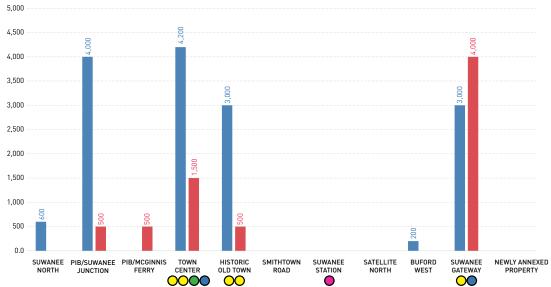

5: Unique, non-chain restaurants

1: Corner market

2: Locations for subsidized ride share program

1: Commuter rail transit system

Note: Steering committee suggested to modify the Town Center character area to include properties along Buford Highway

# Meeting #3: July 18, 2017:

This meeting focused on recapping the take-aways from Meeting #2's growth exercise and then moved on to explore the proposed 2040 Character Areas. This included new proposed boundaries (from the 2030 Plan), goals, framework/land use and transportation diagrams and density discussions.

# Meeting #4: August 17, 2017:

This meeting focused on exploring the implications of a consolidated development framework. This included vetting areas where future development (and redevelopment) is most likely, future land use in individual Character Areas, and strategies for reviewing the overall resulting build-out scenarios. These scenarios highlighted the implications on citywide population and jobs growth based on future land use and density decisions. A "no change" scenario, scenario A, was not supported by the committee. The Steering Committee selected a combination of two growth scenarios. "Scenario B," a medium growth scenario was chosen for the overall City with a high growth scenario "Scenario C" for commercial land uses within the Gateway Character Area. The Steering Committee felt strongly that the opportunity for high density office and job growth should be preserved in the Gateway.

# Mixed-Use/Higher Density Residential (Mixed-Use Center):

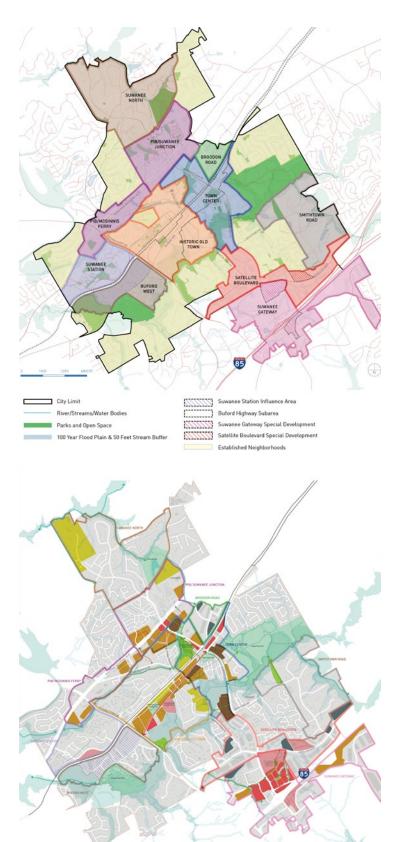

- 16-40 Units/Acre, 5+ story
- Vertical mixed-use, storefront retail/office on ground floor, residential apartments/condos above
- Mixed-Use/Medium Density Residential (Mixed-Use Village):
- 7-15 Units/Acre, 2-3 story
- Vertical/horizontal mixed-use, storefront retail/office on ground floor or on periphery, apartments/stacked flats/condos/townhomes

# Lower Density Residential:

- 2-6 Units/Acre, 1-2 story
- Single-family detached zero lot/narrow lot single family, cottages, granny flats, carriage homes, etc.

# Commercial/Office/Retail:

• 2-5+ story building with multi-tenant uses

Existing Multi-use Trail/Greenway
Potential Multi-use Trail/Greenway
New Streets/Streetscape Enhancements
Gwinnett County Greenway Master Plan
Buford Highway Subarea

Suwanee Station Influence Area

# **BUILDOUT ANALYSIS**

# Methodology

- Compared status quo (existing zoning) with 2 higher growth scenarios
- Applied density multipliers / ranges to +/-72 individual developable areas
- Housing density multipliers from Character Area Frameworks
- Commercial density multipliers from comparable sample developments in Suwanee
- Actual unit counts plugged in for known planned projects
- Individual special circumstances taken into account for specific contexts on a project by project basis
- Contextual infill opportunities taken into account outside of development areas

# SCENARIO MULTIPLIERS (approximate - customized in certain areas)

# Scenario A: Current Zoning Build-Out

Based on current allowed densities

# Scenario B: Low Build-Out

- 16 units/acre Mixed-Use Center/ High-Density Residential
- 7 units/acre Mixed-Use Village/ Medium-Density Residential
- 2 units/acre Low Density Residential
- 0.25 FAR Commercial/Retail/Office (1 story)
- 0.35 FAR Industrial/Distribution (1 story)
- 0.40 FAR- Surface parked 3-5 story office (Gateway)

# Scenario C: High Build-Out

- 40 units/acre Mixed-Use Center/ High-Density Residential
- 15 units/acre Mixed-Use Center/ Medium-Density Residential
- 6 units/acre Low Density Residential
- 0.40 FAR Commercial/Retail/Office (2 story)
- 0.35 FAR Industrial/Distribution (1 story)
- 2.00 FAR Deck parked 8-12 story office (Gateway)

CITY-WIDE GROWTH ESTIMATES	SCENARIO A: ZONING-BASED BUILT OUT			SCENARIO B: 2040 PLAN - LOW			SCENARIO C: 2040 PLAN - HIGH		
	Housing	Commercial	Industrial	Housing	Commercial	Industrial	Housing	Commercial	Industrial
OKOWIIIESIIMAIES	Units	SF	SF	Units	SF	SF	Units	SF	SF
	2,000	2.9 million	2.5 million	5,000	4.7 Million	1.0 million	8,600	5.5 million	1.35 million
Population Growth		5,000			12,500			21,500	
Total 2040 Population		+/-23,000			+/-30,500			+/-39,500	
Jobs - Commercial/		9,500			15,800			18,300	
Office									
Jobs - Industrial		500			200			270	
Job Growth		10,000			16,000			18,570	

# **RESULTS TABLE (PROS/CONS)**

# Preferred Scenario B Features:

- Considers conversion of some commercial and industrial zoned areas to residential / mixed-use
- Lower range of residential density; denser growth in Town Center, PIB/Suwanee Junction and Suwanee Gateway
- Contextual residential infill in Historic Old Town. Smithtown Road and Suwanee North
- Mixed-use focus for Gateway rather than high-density office (somewhat different than 2030 plan)

# Sample of Results:

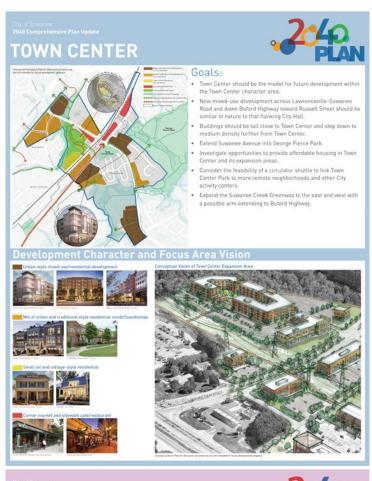

- Estimated 2040 population: +/-30,500
- Better balance of people living and working in the city
- Better support for future "wants" restaurants, urban market, transit, etc.
- More residents living in Town Center and Old Town to support businesses
- More residents living within walking distance to Town Center and Town Center on Main will reduce parking demand in Town Center
- Create additional destinations
- Improved multimodal mobility
- Development type supports the vision of Buford Highway as walkable "main street" of the city
- Increased traffic
- Medium impact on school system

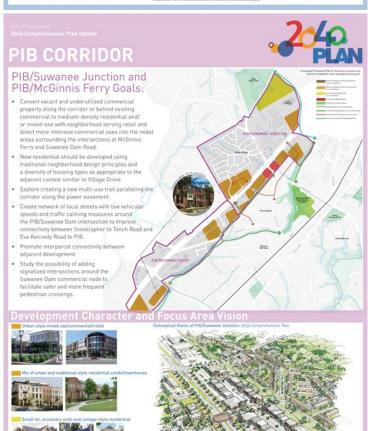

# Meeting #5: September 21, 2017:

This meeting focused on presenting draft 2040 Plan materials including more detailed development frameworks for targeted

Character Areas along with renderings showing the character and massing of potential future development scenarios.

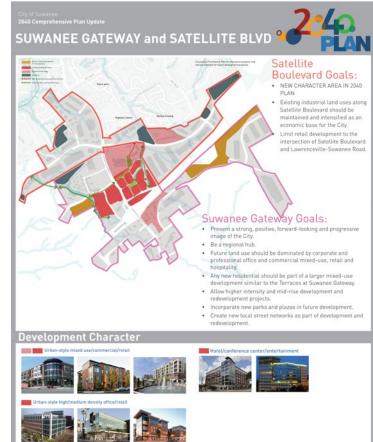

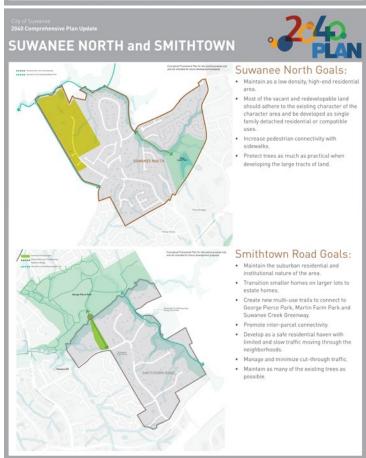

# ESTABLISHED NEIGHBORHOODS

# FINAL PUBLIC HEARING:

Two Public hearings were held on October 2nd, 2018 and October 23<sup>rd</sup>, 2018 to provide opportinities for residents to comment on the draft 2040 Comprehensive Plan.

DATE: September 6, 2018 Gwinnett Daily Post

FROM: Alyssa Durden, Planning Division Director

SUBJECT: Public Notices

Please run the following ad on September 12th and September 26th, 2018.

# **PUBLIC HEARING** CITY OF SUWANEE, GEORGIA

The Public is hereby notified that on October  $2^{nd}$  and October  $23^{rd}$ , at 6:30 p.m. at Suwanee City Hall, 330 Town Center Avenue, the Planning Commission and Mayor and City Council, respectively, will hold public hearings to receive comments for the 2040 Comprehensive Plan.

The purpose of this hearing is to brief the community on the contents of the 2040 Comprehensive Plan, provide an opportunity for residents to make final suggestions, additions or revisions, and notify the community of when the 2040 Plan will be submitted to the Atlanta Regional Commission and Georgia Department of Community Affairs for review. The document has been prepared following the Rules of Georgia Department of Community Affairs Standards and Procedures for Local Comprehensive Planning.

On October  $23^{rd}$ , 2018, at 6:30 p.m. at Suwanee City Hall, 330 Town Center Avenue, the Mayor and Council are scheduled to consider a Transmittal Resolution to forward the 2040Comprehensive Plan document to the Atlanta Regional Commission for review and approval.

All interested parties are encouraged to attend the hearing.

The 2040 Comprehensive Plan will be on file at Suwanee City Hall, 330 Town Center Avenue, Suwanee, Georgia, and may be viewed by the public between the hours of 8:00 a.m. to 5:00 p.m., Monday through Friday.

Goals:

Established res

Pedestrian connectivity should be enhanced especially in older

# **APPENDIX**

# **DESIGN GUIDELINES**

In 2000, the city adopted a comprehensive plan that embraced a shift in the style of development. Before this plan, development was typically divided into separate, discrete uses. Residential development was primarily single family detached homes on large lots accessed via a series of cul-de-sac roads. Connections within and between neighborhoods were discouraged. Multifamily development was primarily gated, garden style apartments. The adoption of the Comprehensive Plan in 2000 ushered in the emergence of development intended to make Suwanee more walkable, provide a variety of housing types that could serve residents throughout their lives, and create opportunities to live, work and play in Suwanee. Guidelines for this type of development were created as part of the plan. These quidelines remain as a central theme to the type of development Suwanee expects to see in the future. As such, these same guidelines are included in the 2040 Plan. Just as they did in 2000. the guidelines are intended to provide guidance for the type of development Suwanee expects to see in the coming years.

# Design Guidelines—General

The following guidelines apply generally to all mixed use areas. While these guidelines are not regulatory, projects will be accessed for how well they reflect an understanding of these principles:

- A grid system of streets is preferred over cul-de-sac designs. Block fronts are not to exceed 600 feet in length; dead-end streets may be no longer than 200 feet and should reflect a "close" design around a central median or square, not a cul-de-sac.
- Individual developments within a Character Area are to interconnect their streets and parking areas. Developments on the edge of a Character Area should connect to streets outside the Character Area where feasible
- Traffic calming techniques are to be used on all local streets, such as narrow pavement widths, on-street parking, street trees and round-about intersections.
- Nonresidential uses encouraged to serve the residential areas in each Character Area include a use with a meeting hall available to the public (such as a church), small-scale convenience shopping stores, a day care center and an after care facility.
- A mixture of residential, commercial, office and civic uses is encouraged, including a mixture of two or more of these uses in the same building.

- Sidewalks are to be provided along both sides of each street, and connections to the Suwanee Trail System are required to be provided wherever practical. Sidewalk area should include an adequate landscape zone, clear zone, and supplemental zone (each minimally 5 feet) as an integral part of the "urban" street character.
- Street trees are to be provided along both sides of every street within the Character Area, with minimum 3" caliper shade trees meeting City specifications planted every 25 to 45 feet depending upon the anticipated canopy size of the species.
- Street lights are to be provided along both sides of every street within the Character Area traditional (upright) standards maximum 16 feet high, placed no more than 200 feet apart (measured in every direction). In predominantly residential areas, sidewalk lighting (with traditional design) directed toward the ground on maximum 3 foot high fixtures may be substituted, if spaced no more than 60 feet apart.
- Architecture is to be of consistent design and style within an individual development. The Southern Vernacular styles are encouraged, which include Georgian, Classic Revival, Victorian and Federalist.
- Exterior materials on each building must be brick, stone, stucco (real), or painted wood siding (or hardy plank). "Foursided" architecture is required, with a finished face on every side of a building.
- Roofs are to be pitched with a minimum slope of 2:1 (run to rise). Roofing materials must be asphalt, wood or slate shingles, or standing seam metal.
- Multi-family residential buildings are to present a front face to a public street. Garden-style apartment complexes are not appropriate for mixed use areas.
- All utilities, including electric power, telephone and cable TV, are to be placed underground.
- At least 20% of the gross land area must be open space, which may include undeveloped conservation areas in their natural state, parks or recreation areas, trails, public squares, plazas etc. Protection of wetlands, floodplains and natural habitats is encouraged.

Suwanee 2040 Plan APPENDIX 107

# Design Guidelines—Mixed Use Villages

Mixed-Use Villages are predominantly residential in character, but may include low intensity neighborhood-scale shopping facilities in stand-alone buildings (such as a corner market) or commercial space in a live/work dwelling where the proprietor resides. The following guidelines apply to each mixed-use village area as a whole. While every individual property is not expected to reflect every guideline (particularly small parcels), each property will be expected to complement and fit into the guidelines for the overall mixed-use village, depending on its location and relationship to the overall design.

- Parking for residential uses should be located to the rear
  of the structure, accessed off an alley. In very limited circumstances, if parking is accessed from the front street,
  the parking garage must be located at least 20 feet back
  from the front of the dwelling. Parallel parking along the
  front street will be counted toward the minimum parking
  requirement for the use.
- If parking garages for single-family detached dwellings are accessed off an alley, the garage may have an accessory apartment ("granny flat") or an office above it. The flats or office floor area will not be counted toward the maximum density restrictions on the property.
- Residential buildings should be no more than 500 feet in walking distance from a public square or park, measured from the front door. Open spaces designated as parks must be at least ½ acre in size. The public square or park should be located to the front of the buildings that surround it.
- Single-family residences must have covered porches at least 8 feet deep, along at least a portion of the front of the building or along the side coming to the front.
- Every principal building must front on a street. Maximum setback from the street right-of-way line is 15 feet. Balconies, covered front porches and overhangs may encroach up to 10 feet into the setback.
- Front yard fencing, if provided, must be wood picket, wood-look vinyl, wrought iron, stone or timber in a traditional design, at least 2 feet high but not more than 4 feet high. Fence materials and designs must be consistent within each development, but may differ from other developments.

- At least 20% of the gross land area in each development must be open space, which may include undeveloped conservation areas in their natural state, parks or recreation areas, trails, public squares, etc.
- Multi-family residential buildings are to present a front face to a public street, and are to reflect single-family design characteristics.
- Sidewalks along residential streets must be at least 5 feet wide and provide at least 5 feet of separation between the sidewalk and the street curb.

# Design Guidelines—Mixed Use Centers

Mixed-Use Centers are predominantly nonresidential in character, including commercial retail, service and civic uses, and may include residential uses within the area in stand-alone buildings or in commercial or office buildings above the first floor. The following guidelines apply to each mixed-use center as a whole. While every individual property is not expected to reflect every guideline (particularly small parcels), each property will be expected to complement and fit into the guidelines for the overall mixed-use center, depending on its location and relationship to the overall design.

- Commercial buildings with shops on the first floor may have offices or residential units on the floors above.
- Office buildings with offices on the first floor may have residential units on the floors above.
- Every principal building must front directly on a street. Maximum setback from the street right of-way line is 15 feet. Balconies, colonnades and overhangs may encroach up to 10 feet into the setback.
- Wherever practical, streets should terminate at a focal point, which may be a civic building, principal use, church, bell tower, gazebo, etc.
- Surface parking lots for commercial and office uses: no more than 25% of the minimum required parking may be located across the street from the front of the building (not including parallel parking spaces on the street in front of the building). The remainder of the parking is to be located to the rear of the building, or to the side set back at least 30 feet from the street.
- Parking lot lighting is required. Fixtures may not exceed 3 feet in height and must be designed to direct their light toward the ground.
- Surface parking lots are to be screened along every street with hedges, low fencing or landscaped berms to a height of at least 3 feet.
- A multi-level parking garage must be located along a street within 15 feet of the right-of way line, or to the rear of the building it serves. All sides of the garage visible from a

- street must present an architecturally finished look consistent with the building it serves. If located along a street, office or commercial space must be provided on the ground level facing the street.
- Parking for residential uses is preferred to be located to the rear of the structure, accessed off an alley. If parking is accessed from the front street, the parking garage must be located at least 20 feet back from the front of the dwelling. Parallel parking along the front street will be counted toward the minimum parking requirement for the use. Sidewalks in front of shops or offices are to be at least 13 feet in width.
- Commercial buildings must be no more than 600 feet walking distance from a public square or park, measured from the front door. The public square or park must be at least ½ acre in size.
- Multi-family residential buildings are to present a front face to a public street, and should reflect a more urban design style.

Suwanee 2040 Plan APPENDIX 109
