EXECUTIVE SUMMARY

This report presents the analysis of the anticipated traffic impacts of the proposed *Stonewall Tell Data Center* development located in the City of South Fulton, Georgia. The approximate 93.76-acre site is located along the east side of Stonewall Tell Road and south of South Fulton Parkway (SR 14 Alt/US 29 Alt). The site currently has a daycare facility in the northwest portion of the property. The daycare facility is planned to be terminated before the construction of the proposed development. No credit will be taken for the existing traffic on the development.

The proposed development will consist of the following land use and densities contained in **Table 1**. The project is expected to be completed by 2033 (approximately 8 years).

Table 1: Proposed Land Use and Density	
Data Center	1,902,000 SF (three buildings) (Office Use: approx. 65,270 SF)

The DRI analysis includes an estimate of the overall vehicle trips projected to be generated by the development, also known as gross trips. Based on the Institute of Transportation Engineers (ITE) *Trip Generation Manual, 11th Edition* for Data Center (Land Use Code 160), the development is projected to generate 1,882 gross trips per day. The project therefore qualifies for GRTA Expedited Review since the total daily trips are fewer than 3,000 trips per day.

Capacity analyses were performed for the study intersections under the Existing 2025 conditions, the Projected 2033 No-Build conditions, and the Projected 2033 Build conditions.

- Existing 2025 conditions represent traffic volumes that were collected by performing AM and PM peak hour turning movement counts. Counts were collected on Tuesday, January 28, 2025.
- Projected 2033 No-Build conditions represent the Existing 2025 traffic volumes grown using a 2.0% per year background traffic growth rate from 2025 to 2033 (8 years).
- Projected 2033 Build conditions represent the Projected 2033 No-Build conditions plus the addition of the project trips that are anticipated to be generated by the *Stonewall Tell Data Center* development.

A brief summary of system (background/No-Build) and development (Build condition) improvements and recommendations are noted below; additional details follow.

Programmed Project Roadway Improvements

The following intersection improvements are programmed to be implemented by GDOT (PI #0018369 and PI #0019668) (not by the development) before the build-out of the proposed *Stonewall Tell Data Center* development, and are included in the Projected 2033 No-Build and Build conditions (shown in green on **Figure 7** and **Figure 8**):

- PI #0019668 - South Fulton Parkway (SR 14 Alt/US 29 Alt) at Stonewall Tell Road (Intersection 1)
 - Construct an additional southbound lane to provide one (1) exclusive right-turn lane along Stonewall Tell Road.
 - Restripe the southbound approach to consist of one (1) exclusive left-turn lane, one (1) shared left-turn/through lane, and one (1) exclusive right-turn lane along Stonewall Tell Road.
 - Restripe the northbound approach to consist of one (1) exclusive left-turn lane, one (1) shared left-turn/through lane, and one (1) exclusive right-turn lane along Stonewall Tell Road.
- PI #0018369 - South Fulton Parkway (SR 14 Alt/US 29 Alt) at Mason Road/Hunter Road (Intersection 2)
 - Restripe the southbound approach along Mason Road to consist of two (2) exclusive left-turn lanes and one (1) shared through/right-turn lane.
 - Widen the northbound approach along Hunter Road to consist of one (1) exclusive left-turn lane, one (1) exclusive through lane, and one (1) exclusive right-turn lane.

Project 2033 No-Build Conditions (System Improvements)

Due to the low level-of-service (LOS) at the following intersection under the Projected 2033 No-Build conditions, the following intersection improvements are recommended (needed to serve background traffic, without the development, shown in red on **Figure 7** and **Figure 8**):

- South Fulton Parkway (SR 14 Alt/US 29 Alt) at Stonewall Tell Road (Intersection 1)
 - Construct one (1) additional southbound left-turn lane along Stonewall Tell Road, in place of the programmed shared left-turn/through lane under GDOT PI #0019668.
- Roosevelt Highway (SR 14/US 29) at Stonewall Tell Road (Intersection 4)
 - Install a traffic signal, if and when warranted and as approved by GDOT
 - Construct one (1) exclusive southbound left-turn lane along Stonewall Tell Road
 - Construct one (1) exclusive northbound left-turn lane along Stonewall Tell Road

Projected 2033 Build Conditions (Site Access Improvements)

In order to serve the *Stonewall Tell Data Center* development, the following site access improvements are recommended (shown in blue on **Figure 7** and **Figure 8**):

- Stonewall Tell Road at Amazon Driveway/Site Driveway A (Intersection 5)
 - On the site, construct a full-movement driveway with a minimum of one (1) ingress lane entering the site and a minimum of one (1) egress lane exiting the site.
 - Construct one (1) exclusive southbound left-turn lane along Stonewall Tell Road.
- Mason Road at Site Driveway B (Intersection 6)
 - On the site, construct a full-movement driveway with a minimum of one (1) ingress lane entering the site and a minimum of one (1) egress lanes exiting the site.

The following tables document the improved level-of-service summary as required by GRTA.

South Fulton Parkway (SR 14 Alt/US 29 Alt) at Stonewall Tell Road (Intersection 1)

Overall LOS Standard: D Approach LOS Standard: D		Stonewall Tell Road			Stonewall Tell Road			South Fulton Parkway (SR 14 Alt/US 23 Alt)			South Fulton Parkway (SR 14 Alt/US 23 Alt)

		95th Queue	0	0	16	139		289	234		6	968	

* For approach failing in Existing 2025 conditions, LOS standard is E in future conditions.

With the listed improvements above, the intersection of Roosevelt Highway (SR 14/US 29) at Stonewall Tell Road (Intersection 4) is projected to operate at acceptable overall and approach LOS standards under the Projected 2033 No-Build conditions and Projected 2033 Build conditions.

Impacted Queue Lengths Exceeding Storage

Intersection	Movement	Storage Length	Projected Build Queue Length (AM / PM)	Recommendation
1. South Fulton Parkway (SR 14 Alt/US 29 Alt) at Stonewall Tell Road	NBL*	100	71 / 64 (50 th) 128 / 105 (95 th)	No-Build (System Improvement): Consider extending NBL lane storage into center raised median.
	NBR	275	133 / 152 (50 th) 280 / 231 (95 th)	Consider extending NBR lane storage into center raised median.
4. Roosevelt Highway (SR 14/US 29) at Stonewall Tell Road	EBL	150	42 / 177 (50 th) 91 / 289 (95 th)	No-Build (System Improvement): Consider extending EBL lane storage into two-way left-turn lane.

* Exceeds available storage in Existing 2025 conditions

Other movements where the projected queuing exceeds the available storage are not impacted by the proposed development traffic.

1.0 PROJECT DESCRIPTION

1.1 Introduction

This report presents the analysis of the anticipated traffic impacts of the proposed *Stonewall Tell Data Center* development located in the City of South Fulton, Georgia. The approximate 94.99-acre site is located along the east side of Stonewall Tell Road and south of South Fulton Parkway (SR 14 Alt/US 29 Alt). Approximately 58.9 acres out of the 94.99 acres are associated with the rezoning application by the City of South Fulton, as this is a City-initiated rezoning. The remaining 34.86 acres are located in the City of Union City. The project site primarily sits within the City of South Fulton, with portions of the site located within the City of Union City. The project site is currently zoned as outlined below:

- City of South Fulton:
 - Agricultural District (AG-1) with South Fulton Parkway Overlay
- City of Union City
 - Single Family Residential District (R-1)
 - Neighborhood Commercial District (NC)
 - Town Center Mixed Use (TCMU)
 - Light Industrial (M-1)

A Rezoning application with the City of South Fulton was filed on January 14, 2025. **Figure 1** provides a location map of the project site.

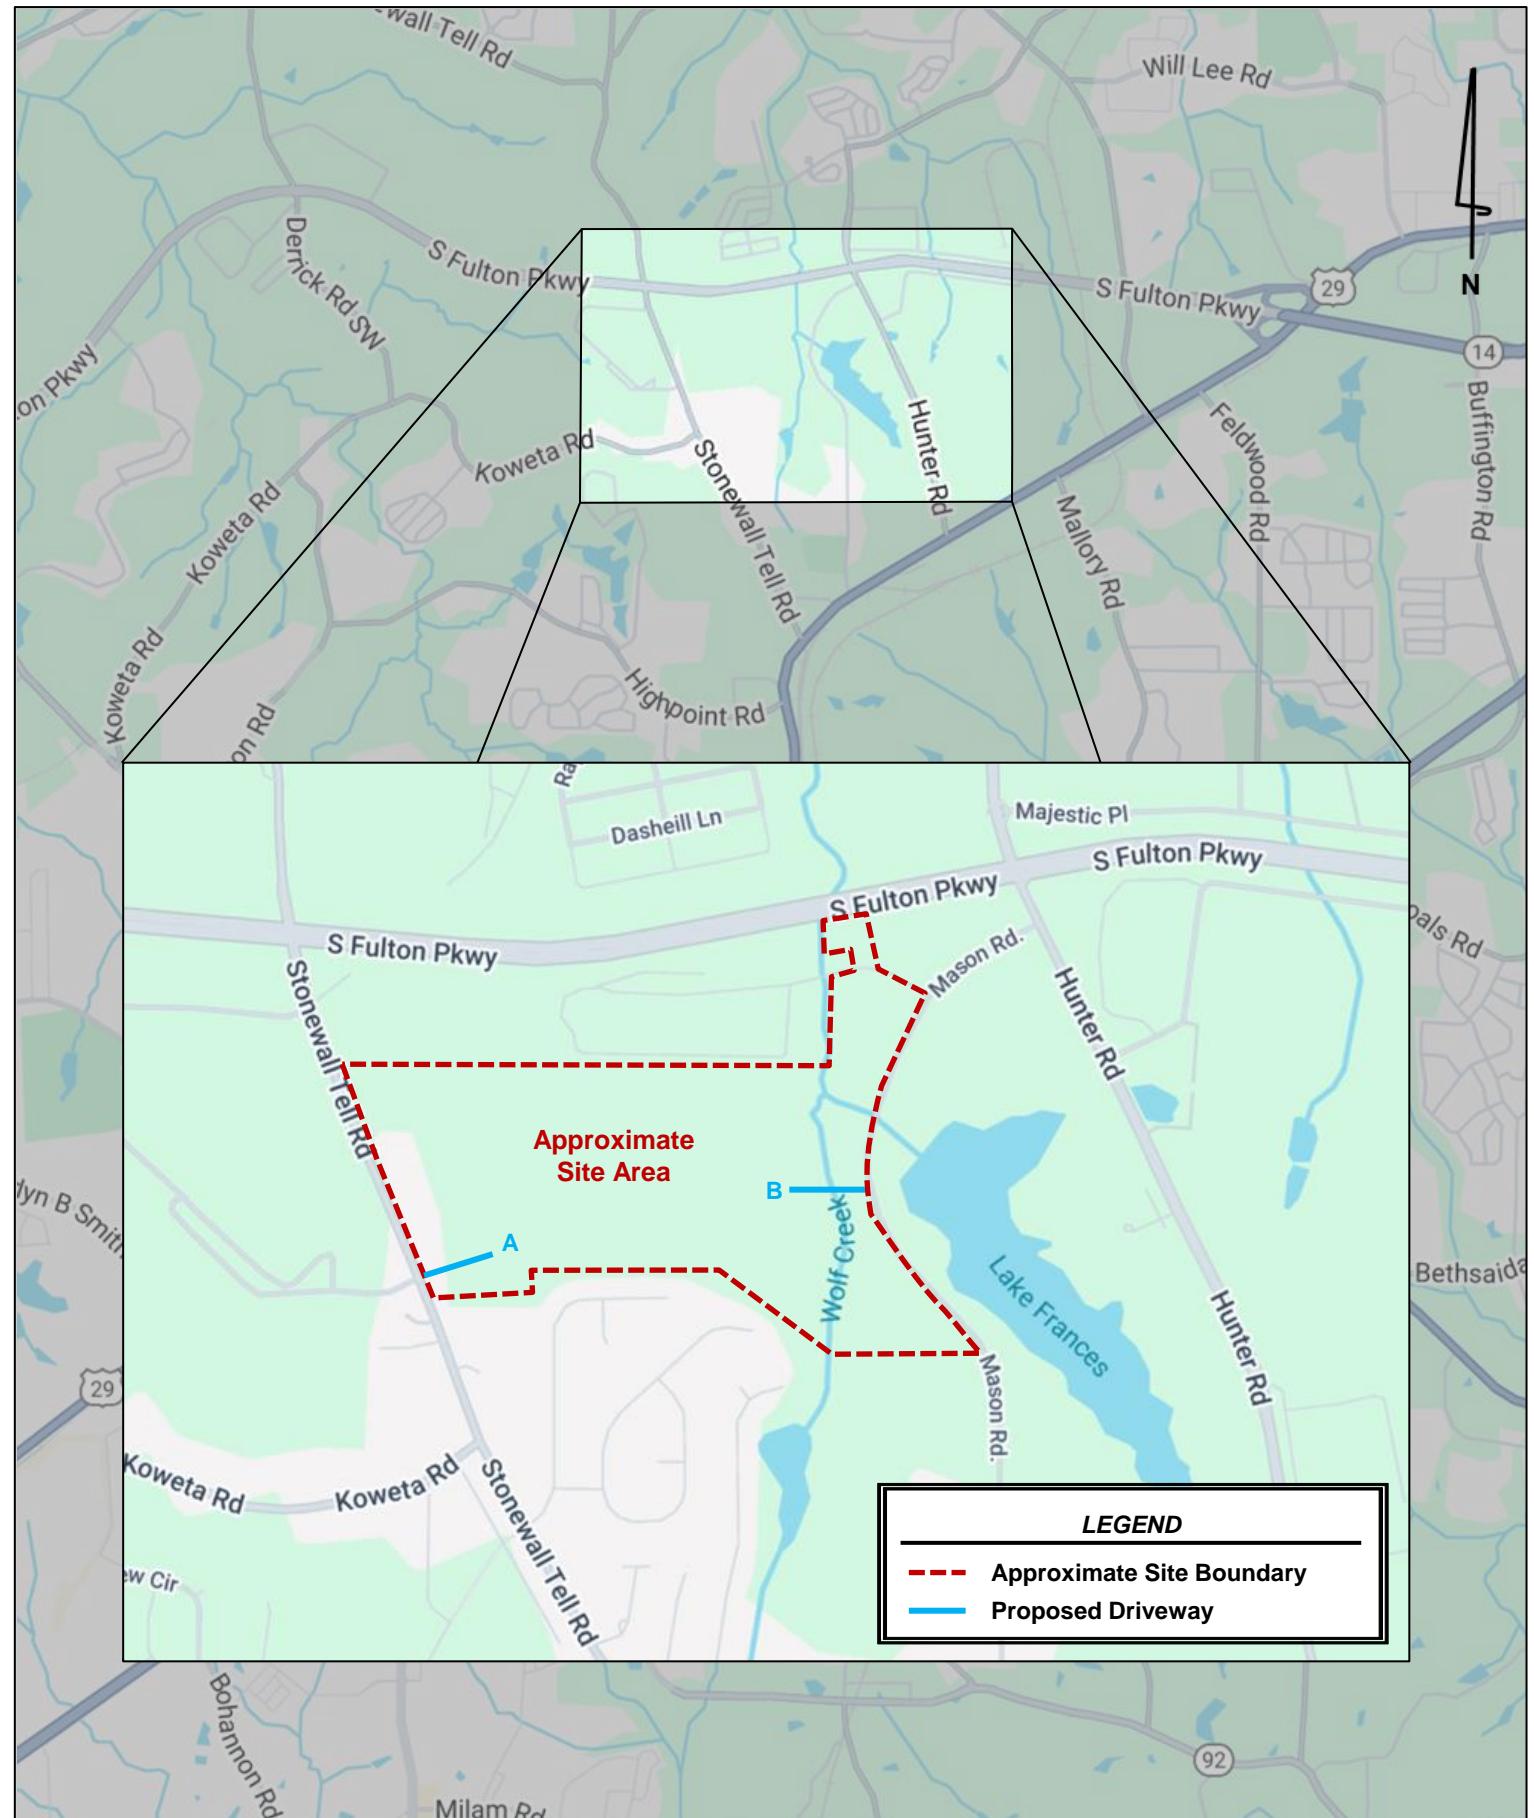

Figure 2 provides an aerial view of the project site and surrounding area.

The site currently has a daycare facility on the northwest portion of the development. The daycare facility will be terminated before the construction of the proposed development and no credit for the existing traffic will be included in the analysis. The proposed development will consist of the following land uses and densities contained in **Table 2**. The project is expected to be completed by 2033 (approximately 8 years).

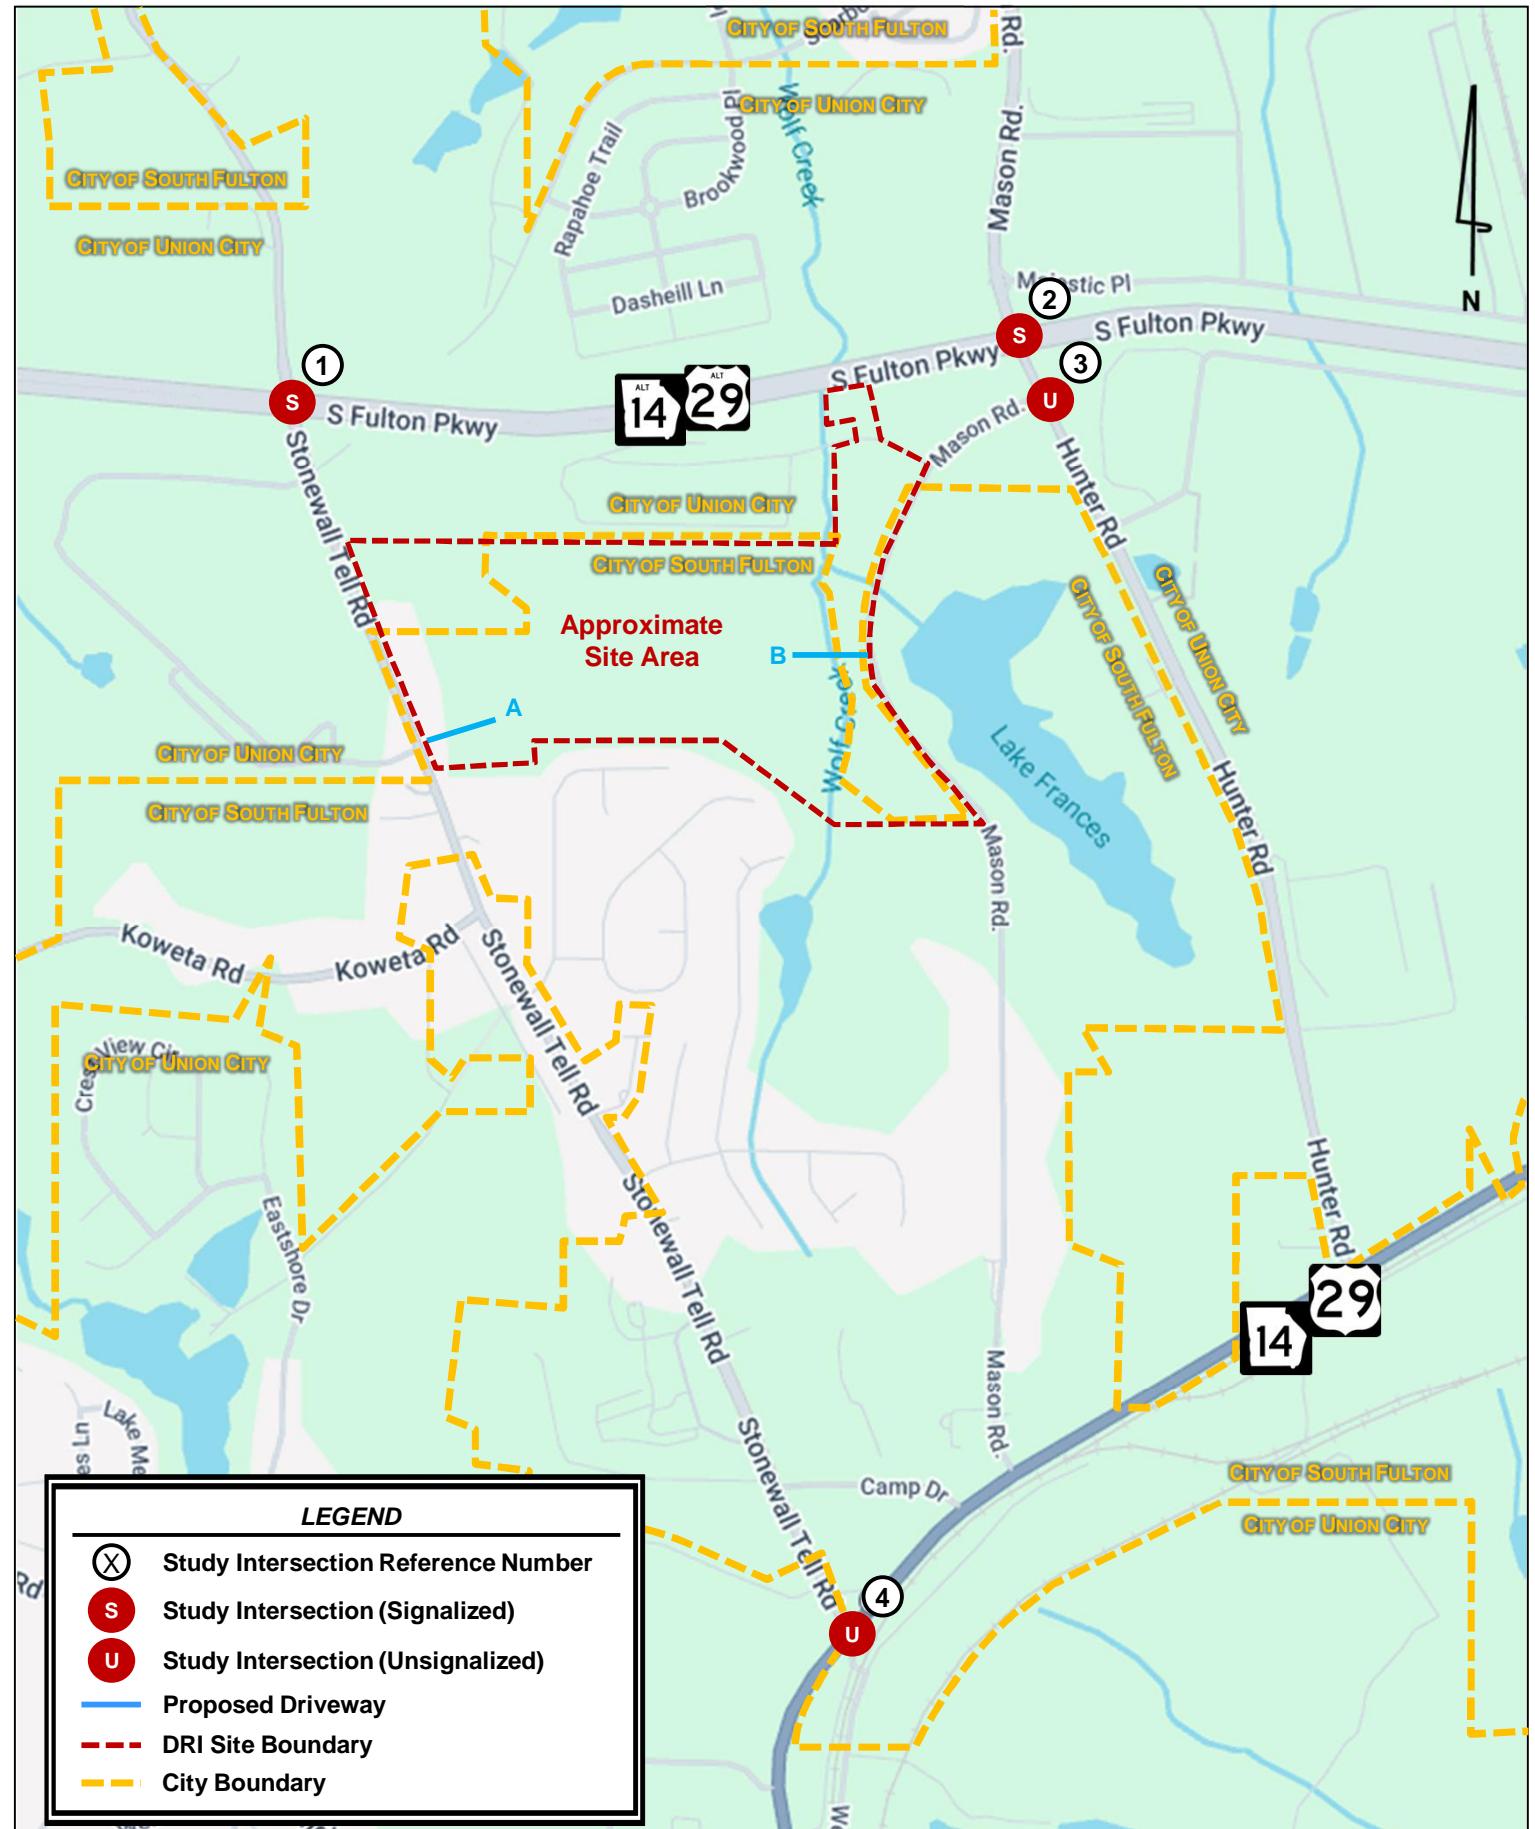

Table 2: Proposed Land Use and Density	
Land Use	Proposed
Data Center	1,902,000 SF (three buildings) (Office Use: approx. 65,270 SF)

A reference of the proposed site plan is provided in **Appendix A**. A full-sized site plan consistent with GRTA's Site Plan Guidelines is also included in the review package.

The project is considered a Development of Regional Impact (DRI) and is subject to Georgia Regional Transportation Authority (GRTA) and Atlanta Regional Commission (ARC) review due to the project size exceeding 500,000 SF in a new industrial development. The DRI was formally triggered with the filing of the rezoning application on January 14, 2025 by the City of South Fulton. This transportation analysis includes all inputs and methodologies discussed at the DRI Methodology Meeting with GRTA, ARC, and other stakeholders held on February 3, 2025. The inputs and methodologies are outlined in the GRTA Letter of Understanding (LOU) dated February 24, 2025.

1.2 Site Access

As currently envisioned, the proposed development will be accessible via two (2) new access points:

1. **Site Driveway A** – a proposed full-movement driveway located along Stonewall Tell Road aligned with the existing Amazon Driveway and proposed to operate under side street stop-control.
2. **Site Driveway B** – a proposed full-movement driveway located along Mason Road and proposed to operate under side street stop control. It will be located approximately 1,895 feet south of Hunter Road.

1.3 Internal Circulation Analysis

Internal roadways and pedestrian walkways will be provided throughout the site between all buildings and parking. See referenced site plan in **Appendix A** for a visual representation of vehicular and pedestrian connectivity on the site.

1.4 Parking

The current number of total site parking spaces to be provided based on the proposed office space within the proposed data center are listed below in **Table 3**.

Table 3: Parking Spaces			
Land Use	Requirement		Proposed
	Minimum	Maximum	
Office	196 3 spaces per 1,000 SF	N/A	196

Bicycle, car/vanpool, and electric vehicle parking will be provided to meet or exceed City of South Fulton code requirements. Final parking provided will be based on the final density built. Additional parking details are provided on the proposed site plan in **Appendix A**.

1.5 Alternative Transportation Facilities

Bicycle, car/vanpool, and electric vehicle parking facilities will be provided to meet or exceed City of South Fulton code requirements. Currently, discontinuous sidewalks are present along Stonewall Tell Road. A 5-foot sidewalk is proposed to be installed along the project frontage on Stonewall Tell Road, which would connect Site Driveway A to the sidewalks north of the project site and provide a continuous pedestrian facility from Site Driveway A to South Fulton Parkway (SR 14 Alt/US 29 Alt).

MARTA bus route 82 services along South Fulton Parkway (SR 14 Alt/US 29 Alt). A bus stop is located on the southeast corner of the intersection of South Fulton Parkway (SR 14 Alt/US 29 Alt) at Stonewall Tell Road.

1.6 Dense Urban Environments Enhanced Focus Area

Per Section 3.2.4.2 of the GRTA *Development of Regional Impact Review Procedures* the *Stonewall Tell Data Center* development does not qualify for a “Dense Urban Environment Enhanced Focus Area” review, due to its location in the City of South Fulton.

1.7 Heavy Vehicle Enhanced Focus Area

As discussed in Methodology Meeting, the proposed use for *Stonewall Tell Data Center* does not generate significant heavy vehicles and therefore does not require “Heavy Vehicle Enhanced Focus Area” review.

2.0 TRAFFIC ANALYSES, METHODOLOGY AND ASSUMPTIONS

2.1 Study Network Determination

The study area was determined at the methodology meeting with input from GRTA, ARC, and other local agency stakeholders. The study includes the following four (4) off-site intersections described in **Table 4** and shown in **Figure 3**.

Table 4: Intersection Control Summary

Intersection	Jurisdiction	Control
1. South Fulton Parkway (SR 14 Alt/US 29 Alt) at Stonewall Tell Road (existing)	GDOT	Signalized
2. South Fulton Parkway (SR 14 Alt/US 29 Alt) at Mason Road/Hunter Road (existing)	GDOT	Signalized
3. Hunter Road at Mason Road (existing)	South Fulton	Unsignalized (Side-Street Stop Control)
4. Roosevelt Highway (SR 14/US 29) at Stonewall Tell Road (existing)	GDOT	Unsignalized (Side-Street Stop Control)

2.2 Existing Roadway Facilities

Roadway classification descriptions and estimated Annual Average Daily Traffic (AADT) for roadway segments within the study network are provided in **Table 5** (**bolded** roadways are adjacent to the site).

Table 5: Roadway Classifications

Roadway	Lanes	Posted Speed Limit	AADT (GDOT, 2023)	GDOT Functional Classification
Stonewall Tell Road	2	35 mph	9,510	Minor Arterial
South Fulton Parkway (SR 14 Alt/US 29 Alt)	4	55 mph	41,000	Principal Arterial
Roosevelt Highway (SR 14/US 29)	5	55 mph	21,100	Principal Arterial
Hunter Road	2	45 mph	-	Local
Mason Road	2	35 mph (n/o South Fulton Parkway)/ 45 mph (s/o South Fulton Parkway)	-	Local

2.3 Traffic Data Collection and Calibration

Traffic counts were collected at the four (4) existing study intersections on Tuesday, January 28, 2025.

Traffic count peak hours for all the study intersections are shown in **Table 6**.

Table 6: Traffic Count Summary			
Intersection	Count Date	AM Peak Hour	PM Peak Hour
1. South Fulton Parkway (SR 14 Alt/US 29 Alt) at Stonewall Tell Road	1/28/2025	7:15 AM – 8:15 AM	5:00 PM – 6:00 PM
2. South Fulton Parkway (SR 14 Alt/US 29 Alt) at Mason Road/Hunter Road	1/28/2025	7:15 AM – 8:15 AM	4:45 PM – 5:45 PM
3. Hunter Road at Mason Road	1/28/2025	7:00 AM – 8:00 AM	5:00 PM – 6:00 PM
4. Roosevelt Highway (SR 14/US 29) at Stonewall Tell Road	1/28/2025	7:15 AM – 8:15 AM	5:00 PM – 6:00 PM

The collected peak hour turning movement traffic counts are provided in **Appendix E**.

2.4 Background Growth

Background traffic is defined as expected traffic on the roadway network in future year(s) absent the construction and opening of the proposed *Stonewall Tell Data Center* development. Background traffic includes a base growth rate, which is based on historical count data and population growth data. It can also include trips anticipated from nearby or adjacent other projects.

Based on methodology outlined in the GRTA Letter of Understanding (LOU), a 2.0% per year background traffic growth rate from 2025 to 2033 (8 years) was used for all roadways. No additional nearby development traffic was included, as this traffic was captured within the background traffic growth rate.

The Projected 2033 No-Build conditions represent the Existing 2025 traffic volumes grown for eight (8) years at 2.0% per year throughout the study network.

The Projected 2033 Build conditions represent the project trips generated by the *Stonewall Tell Data Center* development (discussed in Section 3.0 and 4.0) added to the Projected 2033 No-Build Conditions.

2.5 Programmed and Planned Projects

Programmed and planned projects near the project site were researched to account for any improvements or modifications within the study network before or by the build-out year of the development. The programmed and planned projects were discussed in the methodology meeting with GRTA, ARC, and other local stakeholders.

The following projects shown in **Table 7** are programmed to occur near the development.

Table 7: Programmed Projects							
Project Name	From / To Points:	Sponsor	GDOT PI #	ARC ID # (TIP)	Design FY	ROW / UTL FY	CST FY
SR 14 Alt/US 29 at Hunter Road/ Mason Road	Intersection of SR 14 Alt/US 29 Alt at Hunter Road/ Mason Road	GDOT	0018369	-	2022	-	2026
SR 14 Alt at CS 1386/ Stonewall Tell Road	Intersection of SR 14 Alt at CS 1386/ Stonewall Tell Road	GDOT	0019668	-	2023	2026/ 2027	2027

Project information was obtained from GeoPI (GDOT) and the Atlanta Region's Plan (ARC).

GDOT PI #0018369 proposes to extend all turn lanes along South Fulton Parkway (SR 14 Alt/US 29 Alt), improve turning radii of the intersection, restripe the southbound approach to consist of two exclusive left-turn lanes and a shared through/right-turn lane, and widen the northbound approach (Hunter Road) to consist of an exclusive left-turn lane, exclusive through lane, and exclusive right-turn lane. The project proposes to add sidewalks to the existing MARTA stops and provide concrete pads at existing MARTA bus stops. These improvements will be considered as a background improvement in the Projected 2033 No-Build conditions.

GDOT PI #0019668 proposes to construct an exclusive right-turn lane along the southbound approach (Stonewall Tell Road) and improve turning radii of the intersection. The construction of the project is anticipated to begin in 2027. These improvements will be considered as a background improvement in the Projected 2033 No-Build conditions.

The following projects shown in **Table 8** are planned to occur near the development.

Table 8: Planned Projects					
Project Name	From / To Points:	Potential Sponsor	Project ID #	ARC ID # (TIP)	Design FY
South Fulton Parkway Corridor High-Capacity Premium Transit Service	MARTA College Park rail station to SR 92	MARTA	AR-491A	2050	ARC Fact Sheet

Project information was obtained from GeoPI (GDOT) and the Atlanta Region's Plan (ARC).

Available fact sheets for projects listed in the table above can be found in **Appendix D**.

2.6 Level-of-Service Overview

Level-of-service (LOS) is used to describe the operating characteristics of a road segment or intersection in relation to its capacity. LOS is defined as a qualitative measure that describes operational conditions and motorists' perceptions within a traffic stream. The *Highway Capacity Manual* defines six levels-of-service, LOS A through LOS F, with A being the best and F being the worst. LOS analyses were conducted at all intersections within the study network using *Synchro 12*.

LOS for signalized intersections and all-way stop controlled intersections are reported for the intersection as a whole. One or more movements at an intersection may experience a low LOS while the intersection as a whole may operate acceptably.

LOS for unsignalized intersections with stop control on the minor street only is reported for the side street approaches and the major street left-turn movements. Low LOS for side street approaches is not uncommon, as vehicles may experience delays in turning onto a major roadway.

2.7 Level-of-Service Standards

For the purposes of this traffic analysis, a LOS standard of D was assumed for the following study intersections as specified in the LOU:

- South Fulton Parkway (SR 14 Alt/US 29 Alt) at Stonewall Tell Road (intersection 1)
- Roosevelt Highway (SR 14/US 29) at Stonewall Tell Road (Intersection 4)

Due to its location in a Regional Employment Corridor, a LOS standard of E was assumed for the following study intersections as specified in the LOU:

- South Fulton Parkway (SR 14 Alt/US 29 Alt) at Mason Road/Hunter Road (Intersection 2)
- Hunter Road at Mason Road (Intersection 3)

However, per section 3.2.2.1 of the GRTA *Development of Regional Impact Review Procedures*, if an intersection overall or approach LOS is failing under existing conditions, then the LOS standard for future No-Build and Build conditions is considered to be LOS E.

3.0 TRIP GENERATION

Gross trips associated with the proposed development were estimated using the *Institute of Transportation Engineers' (ITE) Trip Generation Manual, 11th Edition*, using equations where available. Reductions to gross trips including mixed-use reductions and pass-by reductions were not applicable for the site. For a conservative analysis based on an understanding of land use patterns in the area, no alternative mode reduction was taken in this analysis as outlined in the GRTA Letter of Understanding (LOU).

Table 9 summarizes the gross trip generation for the proposed development with no reductions per the GRTA LOU for Data Center (ITE Land Use Code 160).

Table 9: Trip Generation								
Land Use	Density	Daily Traffic			AM Peak Hour		PM Peak Hour	
		Total	Enter	Exit	Enter	Exit	Enter	Exit
160 – Data Center	1,902,000 SF	1,882	941	941	133	109	61	143
<i>Mixed-Use Reductions</i>		0	0	0	0	0	0	0
<i>Alternative Mode Reductions</i>		0	0	0	0	0	0	0
<i>Pass-by Reductions</i>		0	0	0	0	0	0	0
Gross Project Trips		1,882	941	941	133	109	61	143

A more detailed trip generation analysis summary table is provided in **Appendix B**.

4.0 TRIP DISTRIBUTION AND ASSIGNMENT

The distribution of new project trips was based on the project land use, a review of land use densities and road facilities in the area, engineering judgement, and methodology discussions with GRTA, ARC, City of South Fulton, City of Union City, and other local stakeholders.

The anticipated distribution and assignment of the trips throughout the study roadway network is shown for in the development in **Figure 4**. These trip assignment percentages were applied to the net project trips expected to be generated by the development, and the volumes were assigned to the roadway network. The peak hour project trips are shown by turning movement throughout the study network in **Figure 5**.

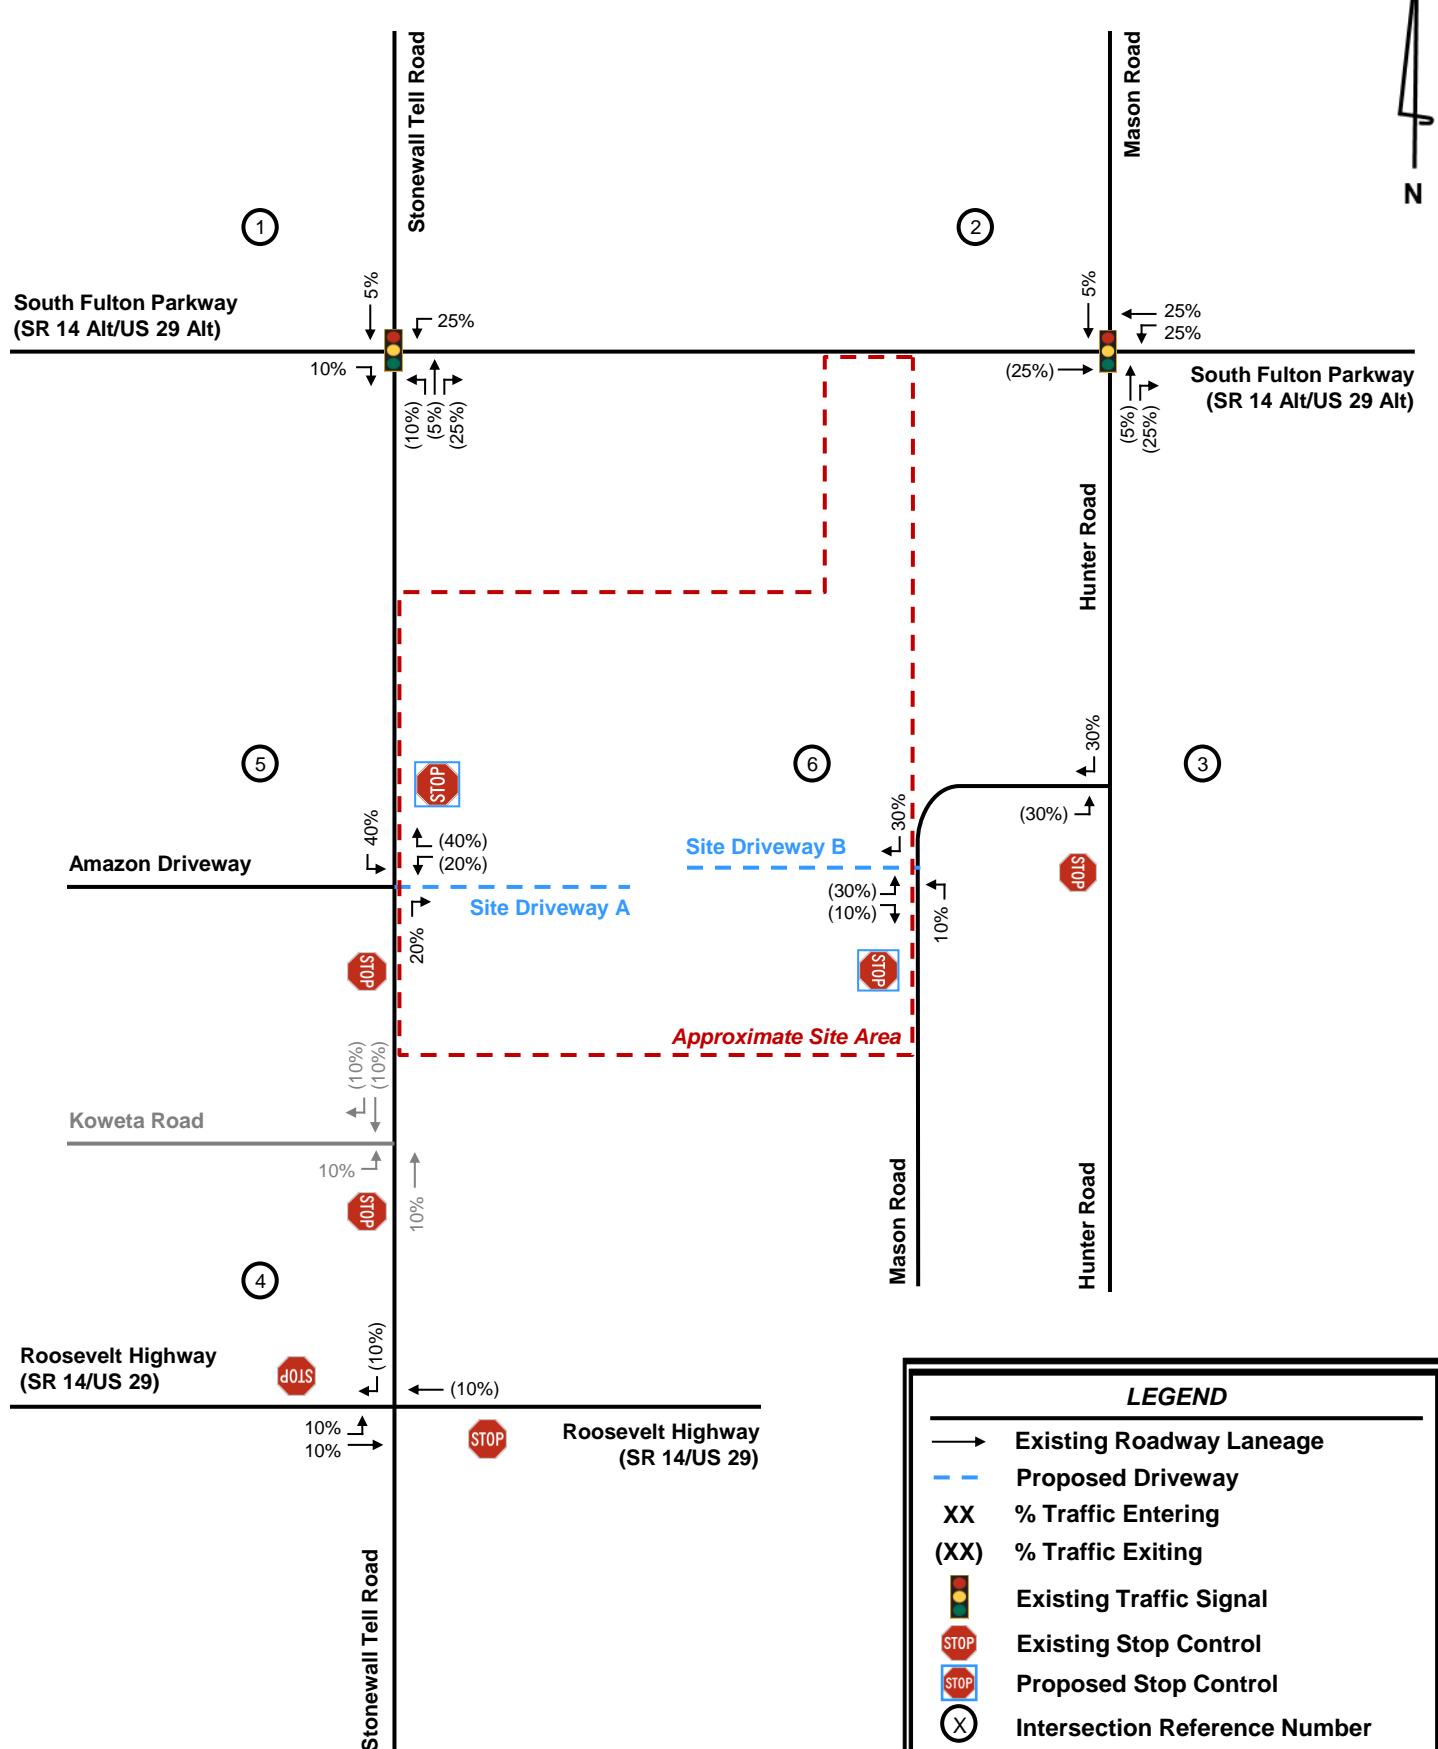

Detailed intersection volume worksheets are provided in **Appendix C**.

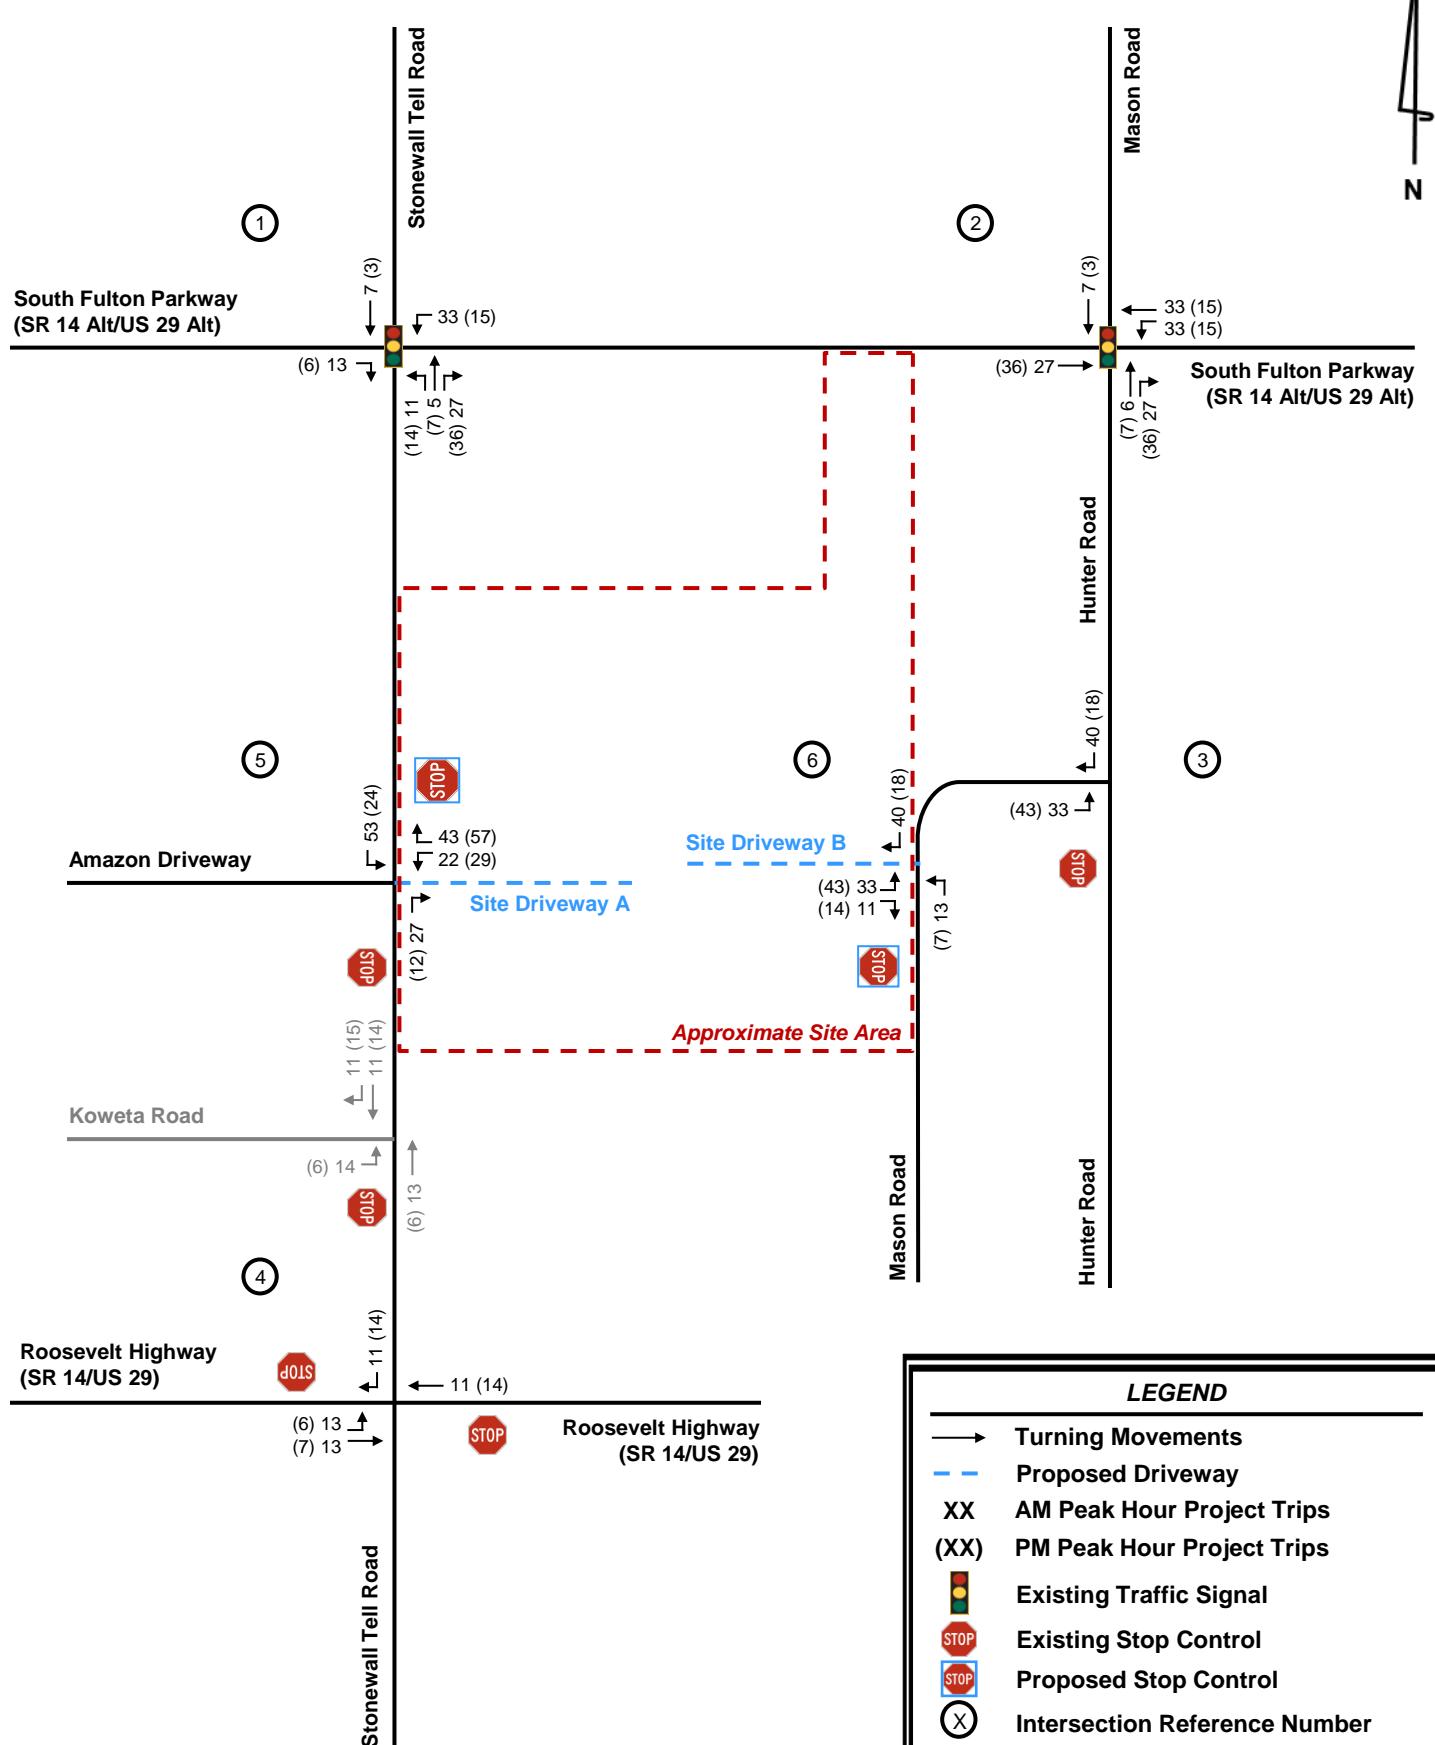

5.0 TRAFFIC ANALYSIS

Capacity analyses were performed using *Synchro 12* for the AM and PM peak hours under the Existing 2025 conditions, Projected 2033 No-Build conditions, and Projected 2033 Build conditions. The capacity analyses were performed using methodologies from the *Highway Capacity Manual (HCM), 7th Edition* unless otherwise noted.

These analyses included existing roadway lane configurations for each of the scenarios. The traffic volumes and roadway lane configurations used for each scenario are shown in **Figure 6** for Existing 2025 conditions, **Figure 7** for Projected 2033 No-Build conditions, and **Figure 8** for Projected 2033 Build conditions.

Sections 5.1 – 5.6 provide the results of the capacity analyses are presented for each study intersection and include projected LOS, delay, and queue lengths. *Synchro 12* capacity analyses reports are provided in **Appendix F**.

* For approach failing in Existing 2025 conditions, LOS standard is E in future conditions.

The signalized intersection of South Fulton Parkway (SR 14 Alt/US 29 Alt) at Stonewall Tell Road (Intersection 1) is projected to operate at an acceptable overall LOS under the Existing 2025 AM and PM peak hour conditions. However, the intersection is not projected to meet GRTA's LOS standards for the overall intersection under the Projected 2033 No-Build AM peak hour and under the 2033 Build AM peak hour. Under both the AM and PM peak hours for the 2025 Existing, Projected 2033 No-Build, and Projected 2033 Build conditions, the northbound approach is projected to operate at LOS E and the southbound approach is projected to operate at LOS F. Additionally, during the AM peak hour of the Projected 2033 No-Build and Build conditions, the eastbound approach LOS is projected to operate at LOS E. Per GRTA guidance, if an intersection overall or approach LOS is failing under existing conditions, then the LOS standard for future No-Build and Build conditions is considered to be LOS E. Therefore, the LOS standard for future No-Build and Build conditions for the southbound approach during both the AM and PM peak hour is LOS E.

It is notable that there is a programmed project expected to be constructed in 2027, prior to the build-out of the site. GDOT has programmed the following roadway improvements at the intersection as part of PI #0019668 (shown in green on **Figure 7** and **Figure 8**):

- Construct one (1) additional southbound lane to provide one (1) exclusive right-turn lane along Stonewall Tell Road.
- Restripe the southbound approach to consist of one (1) exclusive left-turn lane, one (1) shared left-turn/through lane, and one (1) exclusive right-turn lane along Stonewall Tell Road.

With the programmed improvements under GDOT PI #0019668, the Projected 2033 No-Build and Build conditions are not expected to meet GRTA's LOS standards for the overall intersection in the AM peak hour and the northbound and southbound approaches under both peak hours. Additionally, the eastbound approach is projected to fail in the Projected 2033 No-Build and Build conditions during the AM peak hour.

In order to improve the overall and approach LOS under the Projected 2033 No-Build and Build conditions, Kimley-Horn recommends the following system improvement (shown in red on **Figure 7** and **Figure 8**):

- Construct one (1) additional southbound left-turn lane along Stonewall Tell Road, in place of the programmed shared left-through lane under GDOT PI #0019668.

Signal timing adjustments were included in the improved conditions to consider changes in travel patterns in future conditions at the intersection. The analysis results for the improved conditions at Intersection 1 are shown in the table below.

Overall LOS Standard: D Approach LOS Standard: D*			Stonewall Tell Road			Stonewall Tell Road			South Fulton Parkway (SR 14 Alt/US 23 Alt)			South Fulton Parkway (SR 14 Alt/US 23 Alt)

The intersection of South Fulton Parkway (SR 14 Alt/US 23 Alt) at Mason Road/Hunter Road (Intersection 2) is projected to operate at an acceptable overall and approach LOS during the AM and PM peak hours under Existing 2025 conditions. It is notable that there is a programmed project expected to be constructed in 2026, prior to the build-out of the site. GDOT has programmed the following roadway improvements at the intersection as part of PI #0018369 (shown in green on **Figure 7** and **Figure 8**):

- Restripe the southbound approach along Mason Road to consist of two (2) exclusive left-turn lanes and one (1) shared through/right-turn lane.
- Widen the northbound approach along Hunter Road to consist of one (1) exclusive left-turn lane, one (1) exclusive through lane, and one (1) exclusive right-turn lane.

With the programmed improvements under GDOT PI #0018369, the Projected 2033 No-Build and Build conditions are expected to meet GRTA's LOS standards for the overall intersection and each approach in the AM and PM peak hours.

\$ - Delay exceeds 300 seconds.

* For approach failing in Existing 2025 conditions, LOS standard is E in future conditions.

The existing side-street stop-controlled intersection of Roosevelt Highway (SR 14/US 29) at Stonewall Tell Road currently operates at failing approach LOS along the northbound and southbound approaches during the AM peak hour and along the southbound approach during the PM peak hour. Under the Projected 2033 No-Build and Build conditions, the intersection of Roosevelt Highway (SR 14/US 29) at Stonewall Tell Road is projected to operate at a failing approach LOS along the northbound and southbound approaches during the AM peak hour and along the southbound approach during the PM peak hour. Per GRTA guidance, if an intersection overall or approach LOS is failing under existing conditions, then the LOS standard for future No-Build and Build conditions is considered to be LOS E. Therefore, the LOS standard for future No-Build and Build conditions is LOS E for the northbound and southbound approaches during the AM peak hour and southbound approach during the PM peak hour.

In order to improve the approach LOS under the Projected 2033 No-Build and Build conditions, Kimley-Horn recommends the following system improvement (shown in red on **Figure 7** and **Figure 8**):

- Install a traffic signal, if and when warranted and as approved by GDOT
- Construct one (1) exclusive southbound left-turn lane along Stonewall Tell Road
- Construct one (1) exclusive northbound left-turn lane along Stonewall Tell Road

The analysis results for the improved conditions at Intersection 4 are shown in the table below.

Overall LOS Standard: D Approach LOS Standard: D*		Stonewall Tell Road			Stonewall Tell Road			Roosevelt Highway (SR 14/US 29)			Roosevelt Highway (SR 14/US 29)

Project Type:	Reconstruction/Rehabilitation	Construction Status Report
Project Status:	Construction Work Program	
Right of Way Authorization:	7/11/2025	Contact Us

Project Description:

This project proposes to extend all dedicated turn lanes on SR 14 ALT / South Fulton Parkway to improve storage length while improving radii on all four corners at the intersection of SR 14 ALT and Hunter Road / Mason Road to accommodate truck turning movements and widen Hunter Road to add dedicated left-turn, right-turn, and through lanes. The project also proposes to add sidewalk to the existing MARTA Bus Stops and provide bus stop concrete pads. SR 14 ALT, Hunter Road, and Mason Road, within the project limits, will also be resurfaced and restriped.

AR-491A**2050 MTP PROJECT FACT SHEET**

Short Title	SOUTH FULTON PARKWAY CORRIDOR BUS RAPID TRANSIT FROM MARTA COLLEGE PARK RAIL STATION TO SR 92		
GDOT Project No.	N/A		
Federal ID No.	N/A		
Status	Long Range		
Service Type	Transit / BRT Capital		
Sponsor	MARTA		
Jurisdiction	Fulton County (South)		
Analysis Level	In the Region's Air Quality Conformity Analysis		
Existing Thru Lane	N/A	LCI	<input type="checkbox"/>
Planned Thru Lane	N/A	Flex	<input type="checkbox"/>
Network Year	2050		
Corridor Length	TBD miles		

**Detailed Description and Justification**

This project will provide high capacity premium transit service along the South Fulton Parkway corridor between MARTA's College Park heavy rail station and SR 92.

Intersection Summary

- ~ Volume exceeds capacity, queue is theoretically infinite.
Queue shown is maximum after two cycles.
- # 95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.
- m Volume for 95th percentile queue is metered by upstream signal.

Intersection Summary

- ~ Volume exceeds capacity, queue is theoretically infinite.
Queue shown is maximum after two cycles.
- # 95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.
- m Volume for 95th percentile queue is metered by upstream signal.

Intersection Summary

- ~ Volume exceeds capacity, queue is theoretically infinite.
Queue shown is maximum after two cycles.
- # 95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.
- m Volume for 95th percentile queue is metered by upstream signal.

Intersection Summary

95th percentile volume exceeds capacity, queue may be longer.

Queue shown is maximum after two cycles.

m Volume for 95th percentile queue is metered by upstream signal.

Intersection Summary

~ Volume exceeds capacity, queue is theoretically infinite.

Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.

Queue shown is maximum after two cycles.

m Volume for 95th percentile queue is metered by upstream signal.
