

REGIONAL REVIEW NOTIFICATION

Atlanta Regional Commission • 40 Courtland Street NE, Atlanta, Georgia 30303 • ph: 404.463.3100 • fax:404.463.3105 • www.atlantaregional.com

DATE: Jun 4 2007

ARC REVIEW CODE: R706041

TO: CEO Vernon Jones
ATTN TO: Karmen Swan-White, Planner
FROM: Charles Krautler, Director

NOTE: This is digital
signature. Original on file.

The Atlanta Regional Commission (ARC) has received the following proposal and is initiating a regional review to seek comments from potentially impacted jurisdictions and agencies. The ARC requests your comments related to the proposal not addressed by the Commission's regional plans and policies.

Name of Proposal: The Heights at Clairmont (Fairfield at Clairmont)

Review Type: Development of Regional Impact

Description: The Heights at Clairmont, also known as Fairfield at Clairmont, is a 22.14 acre residential development located in DeKalb County. The proposed development will consist of 715 apartments. The development is proposing site access along Cannon Farm Hill Road and the I-85 southbound access road.

Submitting Local Government: DeKalb County

Date Opened: Jun 4 2007

Deadline for Comments: Jun 18 2007

Earliest the Regional Review can be Completed: Jul 4 2007

THE FOLLOWING LOCAL GOVERNMENTS AND AGENCIES ARE RECEIVING NOTICE OF THIS REVIEW:

ARC LAND USE PLANNING
ARC DATA RESEARCH
GEORGIA DEPARTMENT OF NATURAL RESOURCES
FULTON COUNTY
DEKALB COUNTY SCHOOLS

ARC TRANSPORTATION PLANNING
ARC AGING DIVISION
GEORGIA DEPARTMENT OF TRANSPORTATION
CITY OF ATLANTA

ARC ENVIRONMENTAL PLANNING
GEORGIA DEPARTMENT OF COMMUNITY AFFAIRS
GEORGIA REGIONAL TRANSPORTATION AUTHORITY
METRO ATLANTA RAPID TRANSIT AUTHORITY

Attached is information concerning this review.

If you have any questions regarding this review, Please call Haley Fleming, Review Coordinator, at (404) 463-3311. If the ARC staff does not receive comments from you by 2007-06-18 00:00:00, we will assume that your agency has no additional comments and we will close the review. Comments by email are strongly encouraged.

The ARC review website is located at: <http://www.atlantaregional.com/landuse> .

REGIONAL REVIEW NOTIFICATION

DEVELOPMENT OF REGIONAL IMPACT

DRI- REQUEST FOR COMMENTS

Instructions: The project described below has been submitted to this Regional Development Center for review as a Development of Regional Impact (DRI). A DRI is a development of sufficient project of sufficient scale or importance that it is likely to have impacts beyond the jurisdiction in which the project is actually located, such as adjoining cities or neighboring counties. We would like to consider your comments on this proposed development in our DRI review process. Therefore, please review the information about the project included on this form and give us your comments in the space provided. The completed form should be returned to the RDC on or before the specified return deadline.

Preliminary Findings of the RDC: **The Heights at Clairmont (Fairfield at Clairmont)** *See the Preliminary Report .*

Return Date: Jun 18 2007

Preliminary Report:	June 4, 2007	DEVELOPMENT OF REGIONAL IMPACT REVIEW REPORT	Project:	The Heights at Clairmont # 1387
Final Report Due:	July 4, 2007		Comments Due By:	June 18, 2007

PRELIMINARY REPORT SUMMARY

PROPOSED DEVELOPMENT:

The Heights at Clairmont, also known as Fairfield at Clairmont, is a 22.14 acre residential development located in DeKalb County. The proposed development will consist of 715 apartments. The development is proposing site access along Cannon Farm Hill Road and the I-85 southbound access road.

PROJECT PHASING:

The project is being proposed in one phase with a project build out date for 2011.

GENERAL

According to information on the review form or comments received from potentially affected governments:

Is the proposed project consistent with the host-local government's comprehensive plan? If not, identify inconsistencies.

The project site is currently zoned O-I. The zoning will remain the same. Information submitted for the review states that the proposed development is consistent with DeKalb County's Future Land Use Plan, which designates the site as suburban development and conservation/greenspace. It is also designated as an major employment area for the County.

Is the proposed project consistent with any potentially affected local government's comprehensive plan? If not, identify inconsistencies.

This will be determined based on comments received from potentially impacted local governments.

Will the proposed project impact the implementation of any local government's short-term work program? If so, how?

This will be determined based on comments received from potentially impacted local governments.

Will the proposed project generate population and/or employment increases in the Region? If yes, what would be the major infrastructure and facilities improvements needed to support the increase?

Yes, the proposed development would increase the need for services in the area for existing and future residents.

What other major development projects are planned near the proposed project?

Preliminary Report:	June 4, 2007	DEVELOPMENT OF REGIONAL IMPACT REVIEW REPORT	Project:	The Heights at Clairmont # 1387
Final Report Due:	July 4, 2007		Comments Due By:	June 18, 2007

The ARC has reviewed other major development projects, known as Area Plan (1984 to 1991) or as a DRI (1991 to present), within a mile radius of the proposed project.

Year	Name
1997	Post Briarcliff
1988	Brookhaven Center
1986	Lenox Park
1985	Wood Hills

Will the proposed project displace housing units or community facilities? If yes, identify and give number of units, facilities, etc.

Information submitted for the review states that there are 648 efficiency apartments in nine buildings that will be demolished with this development.

Will the development cause a loss in jobs? If yes, how many?

No.

Is the proposed development consistent with regional plans and policies?

The proposed development is located with a mega corridor on the Atlanta Unified Growth Policy Map. A mega corridor is defined as the most intensely developed radial corridors in the region. The proposed development is a redevelopment that will provide housing close to major employment areas in the region. According to information submitted for the review, the current efficiency apartment complex is 35% leased, and some of the existing buildings have been condemned while many are dilapidated. The proposed development will provide new housing opportunities to the area. Due to the lack of frontage along Clairmont Road, retail services on the site are not viable.

The proposed development should provide adequate pedestrian access to the transit stops along Clairmont Road. Other pedestrian and bicycle access should be considered along North Fork Peachtree Creek. According to DeKalb County’s Future Development Plan, the area around the creek is designated as conservation and greenspace. The overall intent is to protect open spaces that follow a linear features for recreational and conservation purposes. Policies within the plan include expanding and connecting trail systems throughout the County. It is encouraged that the developer and DeKalb County work together to ensure that future trail connections can be made through the side and provide direct access to individuals residing within the development.

It is important that stub outs to adjacent development are provided for future street connections as it is likely that other properties within the immediate area will redevelopment.

Preliminary Report:	June 4, 2007	DEVELOPMENT OF REGIONAL IMPACT REVIEW REPORT	Project:	The Heights at Clairmont # 1387
Final Report Due:	July 4, 2007		Comments Due By:	June 18, 2007

PRELIMINARY REPORT

Regional Development Plan Policies

1. Provide sustainable economic growth in all areas of the region.
2. Encourage new homes and jobs within existing developed areas of the region, focusing on principal transportation corridors, the Central Business District, activity centers, and town centers.
3. Increase opportunities for mixed use development, transit-oriented development, infill, and redevelopment.
4. At strategic regional locations, plan and retail industrial and freight land uses.
5. Design transportation infrastructure to protect the context of adjoining development and provide a sense of place appropriate for our communities.
6. Promote the reclamation of Brownfield development sites.
7. Protect the character and integrity of existing neighborhoods, while also meeting the needs of communities to grow.
8. Encourage a variety of homes styles, densities, and price ranges in locations that are accessible to jobs and services to ensure housing for individuals and families of all incomes and age groups.
9. Promote new communities that feature greenspace and neighborhood parks, pedestrian scale, support transportation options, and provide an appropriate mix of uses and housing types.
10. Promote sustainable and energy efficient development.
11. Protect environmentally-sensitive areas including wetlands, floodplains, small water supply watersheds, rivers and stream corridors.
12. Increase the amount, quality, and connectivity, and accessibility of greenspace.
13. Provide strategies to preserve and enhance historic resources
14. Through regional infrastructure planning, limit growth in undeveloped areas of the region
15. Assist local governments to adopt growth management strategies that make more efficient use of existing infrastructure.
16. Inform and involve the public in planning at regional, local, and neighborhood levels.
17. Coordinate local policies and regulations to support Regional Policies
18. Encourage the development of state and regional growth management policy.

BEST LAND USE PRACTICES

Practice 1: Keep vehicle miles of travel (VMT) below the area average. Infill developments are the best at accomplishing this. The more remote a development the more self contained it must be to stay below the area average VMT.

Practice 2: Contribute to the area's jobs-housing balance. Strive for a job-housing balance with a three to five mile area around a development site.

Preliminary Report:	June 4, 2007	DEVELOPMENT OF REGIONAL IMPACT REVIEW REPORT	Project:	The Heights at Clairmont # 1387
Final Report Due:	July 4, 2007		Comments Due By:	June 18, 2007

- Practice 3: Mix land uses at the finest grain the market will bear and include civic uses in the mix.
- Practice 4: Develop in clusters and keep the clusters small. This will result in more open space preservation.
- Practice 5: Place higher-density housing near commercial centers, transit lines and parks. This will enable more walking, biking and transit use.
- Practice 6: Phase convenience shopping and recreational opportunities to keep pace with housing. These are valued amenities and translate into less external travel by residents if located conveniently to housing.
- Practice 7: Make subdivisions into neighborhoods with well-defined centers and edges. This is traditional development.
- Practice 8: Reserve school sites and donate them if necessary to attract new schools. This will result in neighborhood schools which provide a more supportive learning environment than larger ones.
- Practice 9: Concentrate commercial development in compact centers or districts, rather than letting it spread out in strips.
- Practice 10: Make shopping centers and business parks into all-purpose activity centers. Suburban shopping centers and their environs could be improved by mixing uses and designing them with the pedestrian amenities of downtowns.
- Practice 11: Tame auto-oriented land uses, or at least separate them from pedestrian-oriented uses. Relegate “big box” stores to areas where they will do the least harm to the community fabric.

BEST TRANSPORTATION PRACTICES

- Practice 1: Design the street network with multiple connections and relatively direct routes.
- Practice 2: Space through-streets no more than a half mile apart, or the equivalent route density in a curvilinear network.
- Practice 3: Use traffic-calming measures liberally. Use short streets, sharp curves, center islands, traffic circles, textured pavements, speed bumps and raised crosswalks.
- Practice 4: Keep speeds on local streets down to 20 mph.
- Practice 5: Keep speeds on arterials and collectors down to 35 mph (at least inside communities).
- Practice 6: Keep all streets as narrow as possible and never more than four traffic lanes wide. Florida suggests access streets 18 feet, subcollectors 26 feet, and collectors from 28 feet to 36 feet depending on lanes and parking.
- Practice 7: Align streets to give buildings energy-efficient orientations. Allow building sites to benefit from sun angles, natural shading and prevailing breezes.
- Practice 8: Avoid using traffic signals wherever possible and always space them for good traffic progression.
- Practice 9: Provide networks for pedestrians and bicyclists as good as the network for motorists.
- Practice 10: Provide pedestrians and bicyclists with shortcuts and alternatives to travel along high-volume streets.
- Practice 11: Incorporate transit-oriented design features.
- Practice 12: Establish TDM programs for local employees. Ridesharing, modified work hours, telecommuting and others.

BEST ENVIRONMENTAL PRACTICES

- Practice 1: Use a systems approach to environmental planning. Shift from development orientation to basins or ecosystems planning.
- Practice 2: Channel development into areas that are already disturbed.
- Practice 3: Preserve patches of high-quality habitat, as large and circular as possible, feathered at the edges and connected by wildlife corridors. Stream corridors offer great potential.
- Practice 4: Design around significant wetlands.
- Practice 5: Establish upland buffers around all retained wetlands and natural water bodies.
- Practice 6: Preserve significant uplands, too.
- Practice 7: Restore and enhance ecological functions damaged by prior site activities.
- Practice 8: Detain runoff with open, natural drainage systems. The more natural the system the more valuable it will be for wildlife and water quality.
- Practice 9: Design man-made lakes and stormwater ponds for maximum environmental value. Recreation, stormwater management, wildlife habitat and others.

Preliminary Report:	June 4, 2007	DEVELOPMENT OF REGIONAL IMPACT REVIEW REPORT	Project:	The Heights at Clairmont # 1387
Final Report Due:	July 4, 2007		Comments Due By:	June 18, 2007

Practice 10: Use reclaimed water and integrated pest management on large landscaped areas. Integrated pest management involves controlling pests by introducing their natural enemies and cultivating disease and insect resistant grasses.

Practice 11: Use and require the use of Xeriscape™ landscaping. Xeriscaping™ is water conserving landscape methods and materials.

BEST HOUSING PRACTICES

Practice 1: Offer “life cycle” housing. Providing integrated housing for every part of the “life cycle”.

Practice 2: Achieve an average net residential density of six to seven units per acre without the appearance of crowding. Cluster housing to achieve open space.

Practice 3: Use cost-effective site development and construction practices. Small frontages and setbacks; rolled curbs or no curbs; shared driveways.

Practice 4: Design of energy-saving features. Natural shading and solar access.

Practice 5: Supply affordable single-family homes for moderate-income households.

Practice 6: Supply affordable multi-family and accessory housing for low-income households.

Practice 7: Tap government housing programs to broaden and deepen the housing/income mix.

Practice 8: Mix housing to the extent the market will bear.

LOCATION

Where is the proposed project located within the host-local government's boundaries?

The proposed development is located in northwestern DeKalb County. The proposed development is within the northwestern quadrant of the intersection of Interstate 85 and Clairmont Road, behind existing commercial and residential development with frontage along Clairmont Road.

Will the proposed project be located close to the host-local government's boundary with another local government? If yes, identify the other local government.

The proposed development is entirely within DeKalb County.

Will the proposed project be located close to land uses in other jurisdictions that would benefit, or be negatively impacted, by the project? Identify those land uses which would benefit and those which would be negatively affected and describe impacts.

To be determined during the review.

ECONOMY OF THE REGION

According to information on the review form or comments received from potentially affected governments:

What new taxes will be generated by the proposed project?

Estimated value of the development is \$86.9 million with an expected \$1,366,068 in annual local tax revenues.

How many short-term jobs will the development generate in the Region?

Preliminary Report:	June 4, 2007	DEVELOPMENT OF REGIONAL IMPACT REVIEW REPORT	Project:	The Heights at Clairmont # 1387
Final Report Due:	July 4, 2007		Comments Due By:	June 18, 2007

Short-term jobs will depend upon construction schedule.

Is the regional work force sufficient to fill the demand created by the proposed project?

Yes.

In what ways could the proposed development have a positive or negative impact on existing industry or business in the Region?

To be determined during the review.

NATURAL RESOURCES

Watershed Protection and Stream Buffers

The North Fork of Peachtree Creek runs along eastern side of the project property. While the 75-foot DeKalb County stream buffer is not shown, all new development on the property, except for any improvements to or replacement of the existing bridge over the stream, is more than 160 feet from the stream. Any unmapped streams that may be on the property will also be subject to the DeKalb County stream buffer ordinance. All state waters on the property will be subject to the 25-foot Erosion and Sedimentation Act buffers, which are administered by the Environmental Protection Division of Georgia DNR. Any work within these buffers will require a variance from Georgia EPD.

Stormwater / Water Quality

The project should adequately address the impacts of the proposed development on stormwater runoff and downstream water quality. During construction, the project should conform to the relevant state and federal erosion and sedimentation control requirements. After construction, water quality will be impacted due to polluted stormwater runoff. ARC has estimated the amount of pollutants produced after the construction of the entire proposed development, based on the submitted site plans. These estimates are based on some simplifying assumptions for typical pollutant loading factors (lbs/ac/yr). The loading factors are based on the results of regional storm water monitoring data from the Atlanta Region. Actual pollutant loadings will vary based on actual use and the amount of impervious surface in the final project design. The following table summarizes the results of the analysis:

:

Estimated Pounds of Pollutants Per Year

Land Use	Land Area (ac)	Total Phosphorus	Total Nitrogen	BOD	TSS	Zinc	Lead
Townhouse/Apartment	22.14	23.25	237.12	1483.38	13394.70	16.83	3.10
TOTAL	22.14	23.25	237.12	1483.38	13394.70	16.83	3.10

Total Impervious = 48%

In order to address post-construction stormwater runoff quality, the project should implement stormwater management controls (structural and/or nonstructural) as found in the Georgia Stormwater Management Manual (www.georgiastormwater.com) and meet the stormwater management quantity

Preliminary Report:	June 4, 2007	DEVELOPMENT OF REGIONAL IMPACT REVIEW REPORT	Project:	The Heights at Clairmont # 1387
Final Report Due:	July 4, 2007		Comments Due By:	June 18, 2007

and quality criteria outlined in the Manual and as required by Cobb County. Where possible, the project should utilize the stormwater better site design concepts included in the Manual.

HISTORIC RESOURCES

Will the proposed project be located near a national register site? If yes, identify site.

None have been identified.

In what ways could the proposed project create impacts that would damage the resource?

Not applicable.

In what ways could the proposed project have a positive influence on efforts to preserve or promote the historic resource?

Not applicable.

INFRASTRUCTURE

Transportation

To be determined during the review.

The development **DOES NOT PASS** the ARC's Air Quality Benchmark test.

Air Quality Impacts/Mitigation (based on ARC strategies)	Credits	Total
Where Residential is dominant, >15 units/ac w/in 1/4 mile of Bus Stop (CCT, MARTA, Other)	6%	6%
Bike/ped networks connecting to land uses within and adjoining the site	3%	3%
	4%	4%
Total Calculated ARC Air Quality Credits (15 % reduction required)		13%

What are the conclusions of this review? Is the transportation system (existing and planned) capable of accommodating these trips?

To be determined during the review.

INFRASTRUCTURE

Wastewater and Sewage

Wastewater is estimated at 0.155 MGD based on information submitted for the review.

Preliminary Report:	June 4, 2007	DEVELOPMENT OF REGIONAL IMPACT REVIEW REPORT	Project:	The Heights at Clairmont # 1387
Final Report Due:	July 4, 2007		Comments Due By:	June 18, 2007

Which facility will treat wastewater from the project?

R.M Clayton will provide wastewater treatment for the proposed development.

What is the current permitted capacity and average annual flow to this facility?

The capacity of R.M. Clayton Site is listed below:

PERMITTED CAPACITY MMF, MGD ¹	DESIGN CAPACITY MMF, MGD	2001 MMF, MGD	2008 MMF, MGD	2008 CAPACITY AVAILABLE +/-, MGD	PLANNED EXPANSION	REMARKS
No Flow Limit	122	99	120	2	None. Plan before EPD to permit plant at design capacity consistent with draft Chattahoochee River Model.	Existing Consent Decree with the U.S. EPA and Georgia EPD require CSO and SSO improvements throughout the City of Atlanta wastewater system by 2007 and 2014, respectively

MMF: Maximum Monthly Flow. Mgd: million of gallons per day.

¹ Source: Metropolitan North Georgia Water Planning District *SHORT-TERM WASTEWATER CAPACITY PLAN, August 2002.*

What other major developments will be served by the plant serving this project?

ARC has reviewed a number of major developments that will be served by this plant.

INFRASTRUCTURE

Water Supply and Treatment

How much water will the proposed project demand?

Water demand also is estimated at 0.178 MGD based on information submitted for the review.

How will the proposed project's demand for water impact the water supply or treatment facilities of the jurisdiction providing the service?

Information submitted with the review suggests that there is sufficient water supply capacity available for the proposed project.

INFRASTRUCTURE

Solid Waste

Preliminary Report:	June 4, 2007	DEVELOPMENT OF REGIONAL IMPACT REVIEW REPORT	Project:	The Heights at Clairmont # 1387
Final Report Due:	July 4, 2007		Comments Due By:	June 18, 2007

How much solid waste will be generated by the project? Where will this waste be disposed?

Information submitted with the review 489 tons of solid waste per year and the waste will be disposed of in DeKalb County.

Will the project create any unusual waste handling or disposal problems?

No.

Are there any provisions for recycling this project's solid waste.

None stated.

INFRASTRUCTURE

Other facilities

According to information gained in the review process, will there be any unusual intergovernmental impacts on:

- **Levels of governmental services?**
- **Administrative facilities?**
- **Schools?**
- **Libraries or cultural facilities?**
- **Fire, police, or EMS?**
- **Other government facilities?**
- **Other community services/resources (day care, health care, low income, non-English speaking, elderly, etc.)?**

To be determined during the review.

HOUSING

Will the proposed project create a demand for additional housing?

No, the proposed development will add 715 new residential units.

Will the proposed project provide housing opportunities close to existing employment centers?

Yes, once developed, this project will provide housing opportunities for existing employment centers.

Preliminary Report:	June 4, 2007	DEVELOPMENT OF REGIONAL IMPACT REVIEW REPORT	Project:	The Heights at Clairmont # 1387
Final Report Due:	July 4, 2007		Comments Due By:	June 18, 2007

Is there housing accessible to the project in all price ranges demanded?

The site proposed for the development is located in Census Tract 214.06. This tract had a 7.6 percent increase in number of housing units from 2000 to 2006 according to ARC’s Population and Housing Report. The report shows that 17 percent, respectively, of the housing units are single-family, compared to 69 percent for the region; thus indicating is a variety of multi-family housing options around the development area.

Is it likely or unlikely that potential employees of the proposed project will be able to find affordable* housing?

Likely, assuming the development is approved with multiple price ranges of housing.

* Defined as 30 percent of the income of a family making 80 percent of the median income of the Region – FY 2000 median income of \$51,649 for family of 4 in Georgia.

DRI #1387

DEVELOPMENT OF REGIONAL IMPACT Initial DRI Information

This form is to be completed by the city or county government to provide basic project information that will allow the RDC to determine if the project appears to meet or exceed applicable DRI thresholds. Refer to both the [Rules for the DRI Process](#) and the [DRI Tiers and Thresholds](#) for more information.

Local Government Information

Submitting Local Government:	DeKalb
Individual completing form:	Karmen Swan White
Telephone:	404-37102155
E-mail:	kswhite@co.dekalb.ga.us

*Note: The local government representative completing this form is responsible for the accuracy of the information contained herein. If a project is to be located in more than one jurisdiction and, in total, the project meets or exceeds a DRI threshold, the local government in which the largest portion of the project is to be located is responsible for initiating the DRI review process.

Proposed Project Information

Name of Proposed Project:	The Heights at Clairmont
Location (Street Address, GPS Coordinates, or Legal Land Lot Description):	Clairmont Road and I-85 Access Road
Brief Description of Project:	715 Apartment units

Development Type:

(not selected)	Hotels	Wastewater Treatment Facilities
Office	Mixed Use	Petroleum Storage Facilities
Commercial	Airports	Water Supply Intakes/Reservoirs
Wholesale & Distribution	Attractions & Recreational Facilities	Intermodal Terminals
Hospitals and Health Care Facilities	Post-Secondary Schools	Truck Stops
Housing	Waste Handling Facilities	Any other development types
Industrial	Quarries, Asphalt & Cement Plants	

If other development type, describe:

Project Size (# of units, floor area, etc.):	715 units		
Developer:	Fairfield Residential		
Mailing Address:	561 Cartecay Trace		
Address 2:			
	City:Ellijay State: GA Zip:30536		
Telephone:	706-635-8530		
Email:	scott_schlosser@ffres.com		
Is property owner different from developer/ applicant?	(not selected)	Yes	No
If yes, property owner:	Clairmont Lodge LLC		
Is the proposed project entirely located within your local government's jurisdiction?	(not selected)	Yes	No
If no, in what additional jurisdictions is the project located?			
Is the current proposal a continuation or expansion of a previous DRI?	(not selected)	Yes	No
If yes, provide the following information:	Project Name:		
	Project ID:		
The initial action being requested of the local government for this project:	Rezoning Variance Sewer Water Permit Other		
Is this project a phase or part of a larger overall project?	(not selected)	Yes	No
If yes, what percent of the overall project does this project/phase represent?			

Estimated Project Completion Dates:

This project/phase: 2011
Overall project: 2011

Email(s):	scott_schlosser@ffres.com

Additional Information Requested

Has the RDC identified any additional information required in order to proceed with the official regional review process? (If no, proceed to Economic Impacts.)	(not selected)	Yes	No
If yes, has that additional information been provided to your RDC and, if applicable, GRTA?	(not selected)	Yes	No

If no, the official review process can not start until this additional information is provided.

Economic Development

Estimated Value at Build-Out:	\$86,900,000
Estimated annual local tax revenues (i.e., property tax, sales tax) likely to be generated by the proposed development:	\$1,366,068

Is the regional work force sufficient to fill the demand created by the proposed project?	(not selected)	Yes	No
Will this development displace any existing uses?	(not selected)	Yes	No
If yes, please describe (including number of units, square feet, etc): Clairmont			
Water Supply			
Name of water supply provider for this site:	DeKalb County - Scott Candler WTP		
What is the estimated water supply demand to be generated by the project, measured in Millions of Gallons Per Day (MGD)?	0.178		
Is sufficient water supply capacity available to serve the proposed project?	(not selected)	Yes	No
If no, describe any plans to expand the existing water supply capacity:			
Is a water line extension required to serve this project?	(not selected)	Yes	No
If yes, how much additional line (in miles) will be required? N/A Water is available at the site. See Supplemental Information for details.			
Wastewater Disposal			
Name of wastewater treatment provider for this site:	City of Atlanta - R.M. Clayton Plant		
What is the estimated sewage flow to be generated by the project, measured in Millions of Gallons Per Day (MGD)?	0.155		
Is sufficient wastewater treatment capacity available to serve this proposed project?	(not selected)	Yes	No
If no, describe any plans to expand existing wastewater treatment capacity:			
Is a sewer line extension required to serve this project?	(not selected)	Yes	No
If yes, how much additional line (in miles) will be required? Not Applicable. Sewer is available at the site. See Supplemental Information for details.			
Land Transportation			
How much traffic volume is expected to be generated by the proposed development, in peak hour vehicle trips per day? (If only an alternative measure of volume is available, please provide.)	411 p.m. peak hour trips, 4,448 24 hour 2-way trips		
Has a traffic study been performed to determine whether or not transportation or access improvements will be needed to serve this project?	(not selected)	Yes	No
Are transportation improvements needed to serve this project?	(not selected)	Yes	No
If yes, please describe below: All recommended transportation improvements are described in the required Traffic Study, as a supplement to this form.			

Solid Waste Disposal

How much solid waste is the project expected to generate annually (in tons)?	489 tons/yr.
Is sufficient landfill capacity available to serve this proposed project?	(not selected) Yes No
If no, describe any plans to expand existing landfill capacity:	
Will any hazardous waste be generated by the development?	(not selected) Yes No

If yes, please explain:

Stormwater Management

What percentage of the site is projected to be impervious surface once the proposed development has been constructed?	41%
Describe any measures proposed (such as buffers, detention or retention ponds, pervious parking areas) to mitigate the project's impacts on stormwater management: Site plan includes buffers and open space, and the development will incorporate water quality elements as required. See Supplemental Information for details.	

Environmental Quality

Is the development located within, or likely to affect any of the following:

1. Water supply watersheds?	(not selected) Yes No
2. Significant groundwater recharge areas?	(not selected) Yes No
3. Wetlands?	(not selected) Yes No
4. Protected mountains?	(not selected) Yes No
5. Protected river corridors?	(not selected) Yes No
6. Floodplains?	(not selected) Yes No
7. Historic resources?	(not selected) Yes No
8. Other environmentally sensitive resources?	(not selected) Yes No

If you answered yes to any question above, describe how the identified resource(s) may be affected:

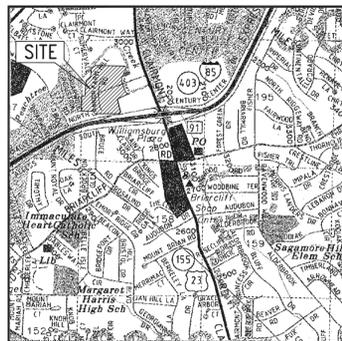

The site includes a stream and associated wetlands and areas of 100 yr. floodplain; however, no impacts are anticipated. See Supplemental Information for details.

LOCATION MAP

CALCULATIONS

PHASE 1:

GROSS SITE AREA: 9.28 ACRES
 NET SITE AREA: ±7.71 ACRES*
 YIELD: ±360 UNITS
 NET DENSITY: ±46.69 DU/AC.
 REQUIRED PARKING: ±720 SP.**
 PROVIDED PARKING: ±731 SP.

* (EXCLUDES LIMITS OF DISTURBANCE)
 ** (2 SPACES/UNIT REQUIRED BY DEKALB COUNTY)

PHASE 2:

GROSS SITE AREA: 12.86 ACRES
 NET SITE AREA: ±6.64 ACRES*
 YIELD: ±355 UNITS
 NET DENSITY: ±53.46 DU/AC.
 REQUIRED PARKING: ±710 SP.**
 PROVIDED PARKING: ±728 SP.

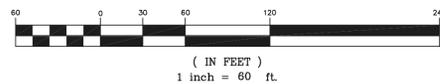

* (EXCLUDES LIMITS OF DISTURBANCE)
 ** (2 SPACES/UNIT REQUIRED BY DEKALB COUNTY)

OVERALL:

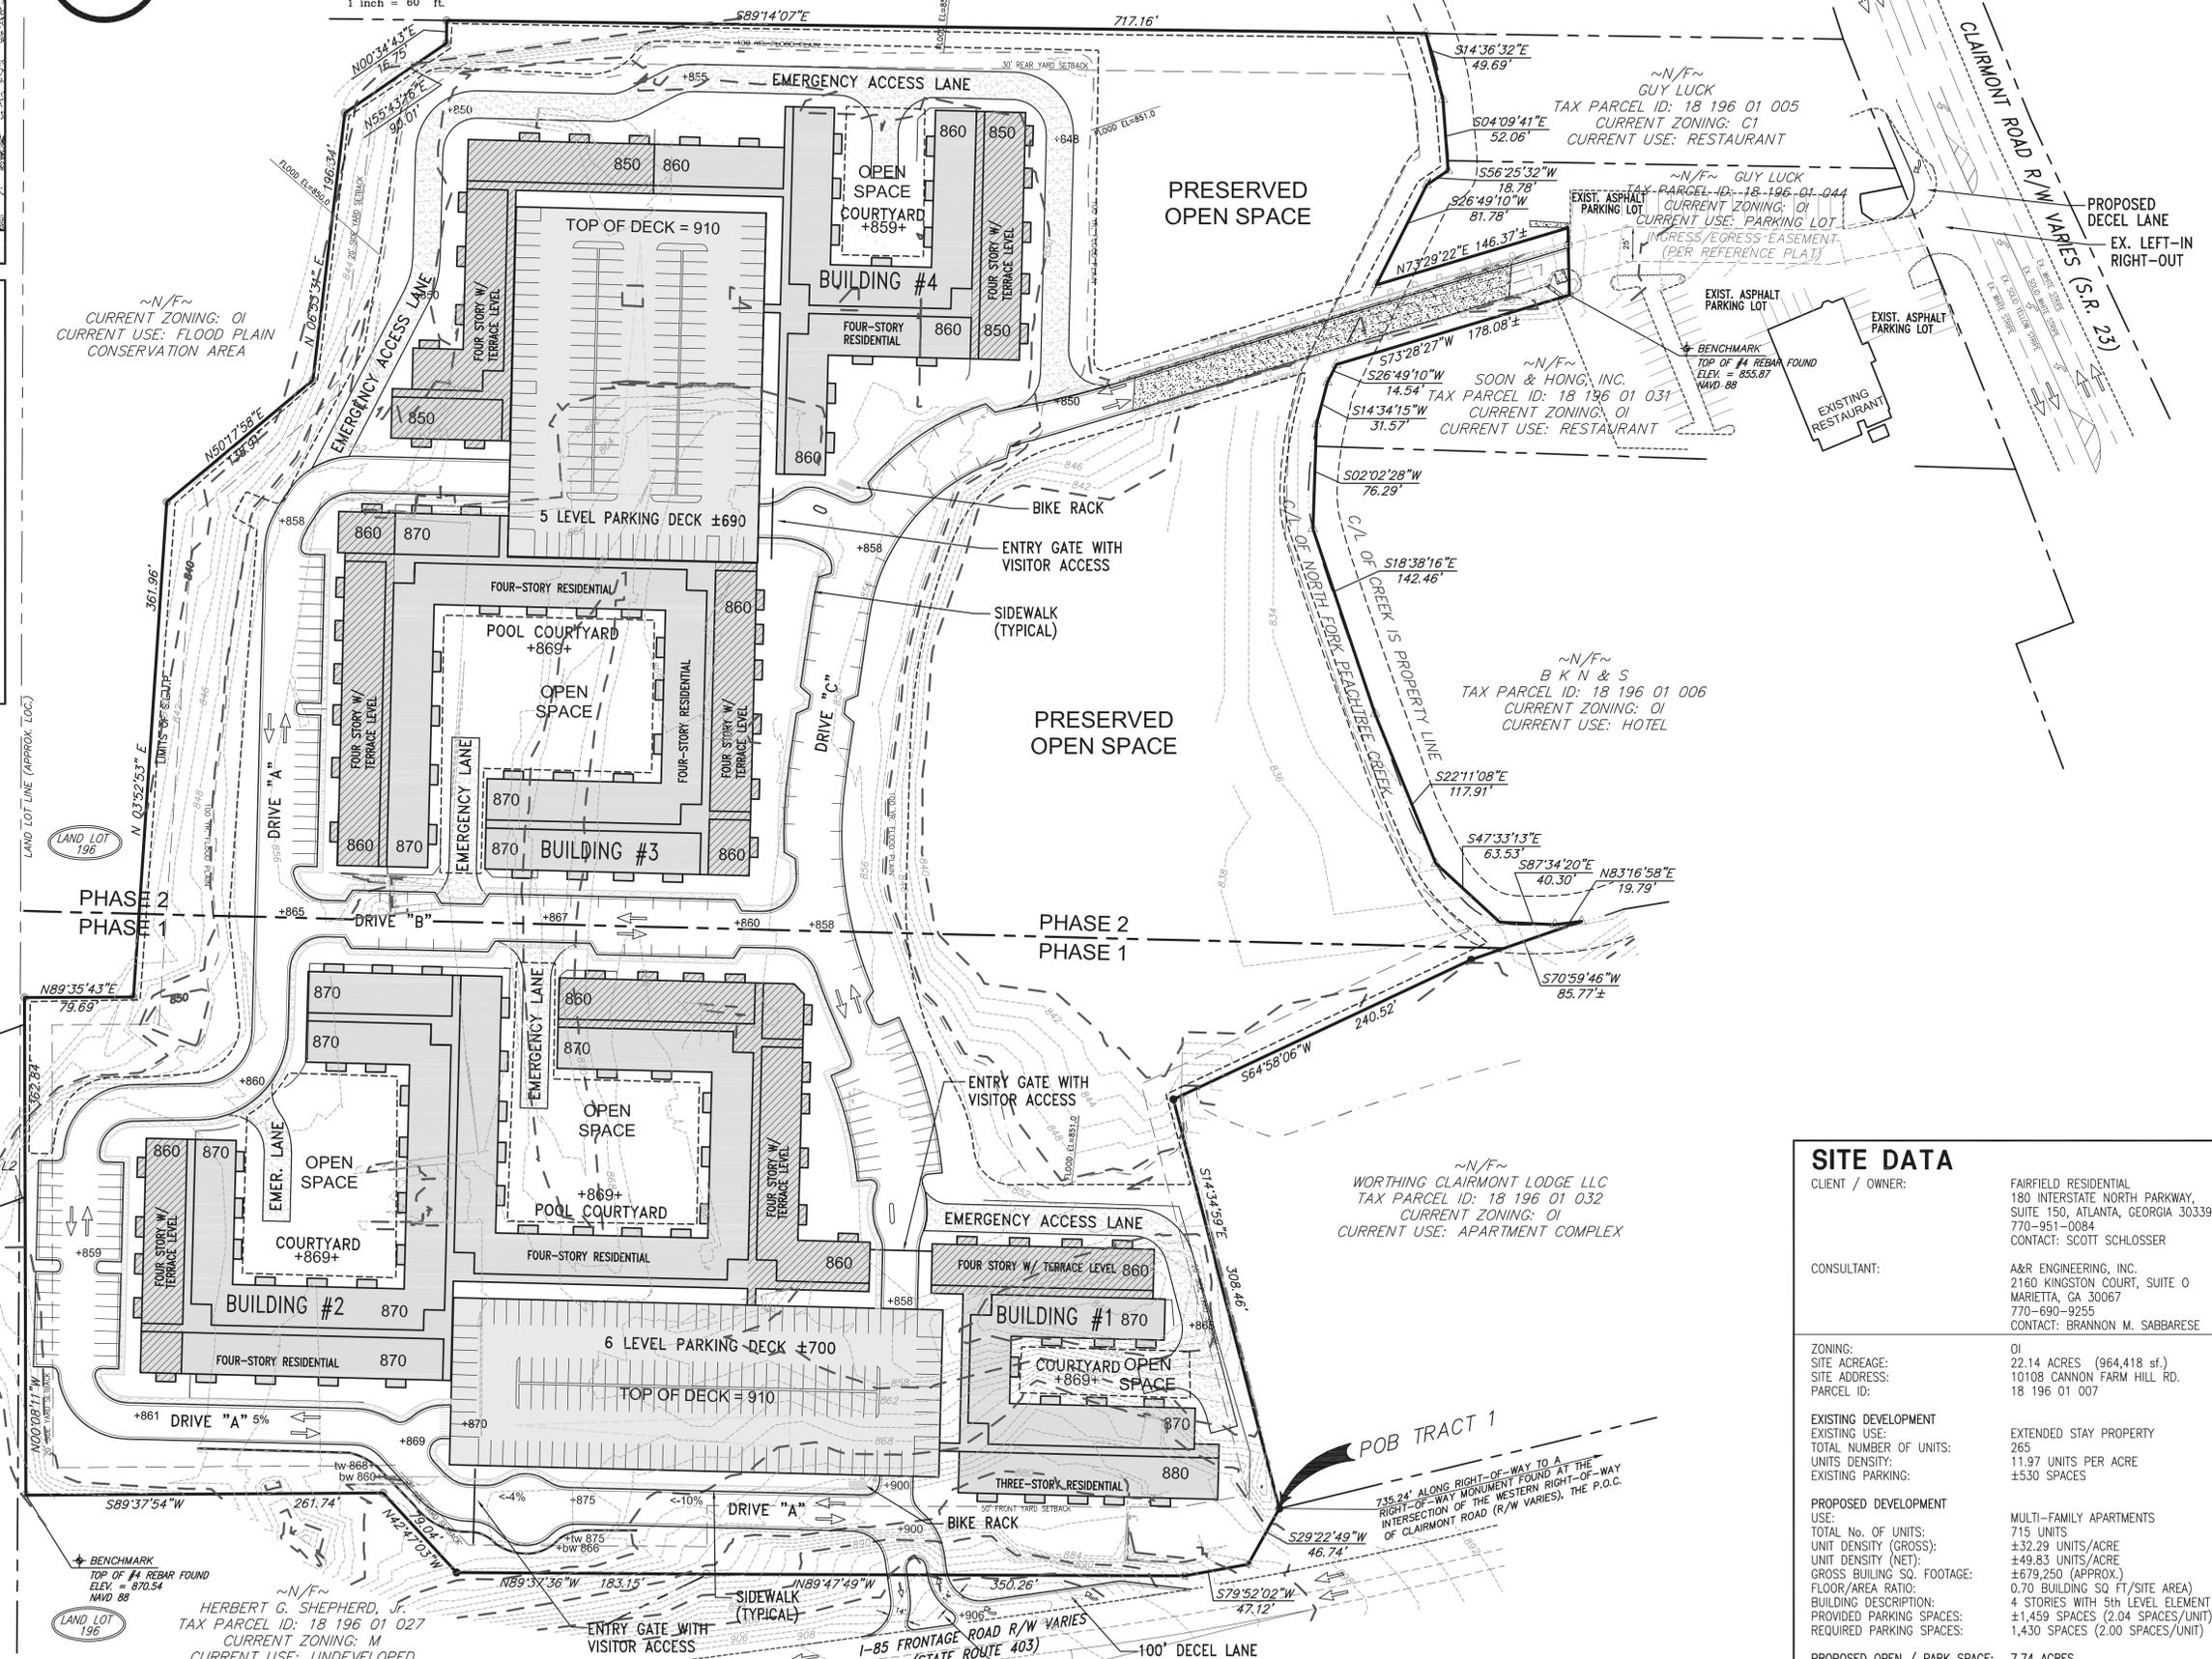

NET SITE AREA: ±14.35 ACRES*
 YIELD: ±715 UNITS
 AVERAGE UNIT SIZE: ±950 S.F.
 NET DENSITY: ±49.83 DU/AC.
 * (EXCLUDES LIMITS OF DISTURBANCE)
