

REGIONAL REVIEW NOTIFICATION

Atlanta Regional Commission • 40 Courtland Street NE, Atlanta, Georgia 30303 • ph: 404.463.3100 • fax:404.463.3105 • www.atlantaregional.com

DATE: Sep 25 2007 **ARC REVIEW CODE:** P709251

TO: CEO Vernon Jones

ATTN TO: Kamen Swan White, Planner **FROM**: Charles Krautler, Director

NOTE: This is digital signature. Original o

The Atlanta Regional Commission (ARC) has received the following proposal and is initiating a regional review to seek comments from potentially impacted jurisdictions and agencies. The ARC requests your comments related to the proposal not addressed by the Commission's regional plans and policies.

<u>Name of Proposal:</u> Highland Park Gardens <u>Review Type:</u> Development of Regional Impact

Description: The proposed Highland Park Gardens is a mixed use development on 10.1 acres in DeKalb County. The proposed development will include 380 apartments and 25,000 square feet of retail. The proposed development is located along Chamblee– Tucker Road, south of Interstate 85 and west of Interstate 285.

Submitting Local Government: DeKalb County

Date Opened: Sep 25 2007

Deadline for Comments: Oct 9 2007

Earliest the Regional Review can be Completed: Oct 27 2007

THE FOLLOWING LOCAL GOVERNMENTS AND AGENCIES ARE RECEIVING NOTICE OF THIS REVIEW:

ARC LAND USE PLANNING
ARC DATA RESEARCH
GEORGIA DEPARTMENT OF NATURAL RESOURCES
DEKALB COUNTY
METRO ATLANTA RAPID TRANSIT AUTHORITY

ARC TRANSPORTATION PLANNING
ARC AGING DIVISION
GEORGIA DEPARTMENT OF TRANSPORTATION
DEKALB COUNTY SCHOOLS
CITY OF CHAMBLEF

ARC ENVIRONMENTAL PLANNING
GEORGIA DEPARTMENT OF COMMUNITY AFFAIRS
GEORGIA REGIONAL TRANSPORTATION AUTHORITY
CITY OF DORAVILLE
GWINNETT COUNTY

Attached is information concerning this review.

If you have any questions regarding this review, Please call Haley Fleming, Review Coordinator, at (404) 463-3311. If the ARC staff does not receive comments from you by Oct 9 2007, we will assume that your agency has no additional comments and we will close the review. Comments by email are strongly encouraged.

The ARC review website is located at: http://www.atlantaregional.com/landuse .

DEVELOPMENT OF REGIONAL IMPACT

DRI- REQUEST FOR COMMENTS

Instructions: The project described below has been submitted to this Regional Development Center for review as a Development of Regional Impact (DRI). A DRI is a development of sufficient project of sufficient scale or importance that it is likely to have impacts beyond the jurisdiction in which the project is actually located, such as adjoining cities or neighboring counties. We would like to consider your comments on this proposed development in our DRI review process. Therefore, please review the information about the project included on this form and give us your comments in the space provided. The completed form should be returned to the RDC on or before the specified return deadline.

before the specified return deadline		1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1

Preliminary Report:	September 25, 2007	DEVELOPMENT OF REGIONAL IMPACT	Project:	Highland Park Gardens #1532
Final Report Due:	October 24, 2007	<u>REVIEW REPORT</u>	Comments Due By:	October 9, 2007

PRELIMINARY REPORT SUMMARY

PROPOSED DEVELOPMENT:

The proposed Highland Park Gardens is a mixed use development on 10.1 acres in DeKalb County. The proposed development will include 380 apartments and 25,000 square feet of retail. The proposed development is located along Chamblee- Tucker Road, south of Interstate 85 and west of Interstate 285.

PROJECT PHASING:

The project is being proposed in one phase with a project build out date for 2009.

GENERAL

According to information on the review form or comments received from potentially affected governments:

Is the proposed project consistent with the host-local government's comprehensive plan? If not, identify inconsistencies.

The project site is currently zoned RM-100. The proposed zoning for the site is PC-2 (pedestrian community). Information submitted for the review states that the proposed development is consistent with DeKalb County's Future Development Map, which designates the site as suburban.

Is the proposed project consistent with any potentially affected local government's comprehensive plan? If not, identify inconsistencies.

This will be determined based on comments received from potentially impacted local governments.

Will the proposed project impact the implementation of any local government's short-term work program? If so, how?

This will be determined based on comments received from potentially impacted local governments.

Will the proposed project generate population and/or employment increases in the Region? If yes, what would be the major infrastructure and facilities improvements needed to support the increase?

Yes, the proposed development would increase the need for services in the area for existing and future residents.

What other major development projects are planned near the proposed project?

Preliminary Report:	September 25, 2007	DEVELOPMENT OF REGIONAL IMPACT	Project:	Highland Park Gardens #1532
Final Report Due:	October 24, 2007	<u>REVIEW REPORT</u>	Comments Due By:	October 9, 2007

The ARC has reviewed other major development projects, known as Area Plan (1984 to 1991) or as a DRI (1991 to present), within a mile radius of the proposed project.

Year	Name	
1985	AMWEST NORTHCREST CENTER	

Will the proposed project displace housing units or community facilities? If yes, identify and give number of units, facilities, etc.

Information submitted for the review states that there currently a 124 apartments and is presumed to be 90% occupied.

Will the development cause a loss in jobs? If yes, how many?

No.

Is the proposed development consistent with regional plans and policies?

The proposed development meets many of ARC's Regional Development Policies, as well as the Atlanta Region Unified Growth Policy Map. The proposed development is located within the mega corridor along Interstate 85. Mega corridors are defined as the most intensely developed radial corridors in the region.

Preliminary Project: Highland Park September **DEVELOPMENT OF REGIONAL IMPACT** Report: 25, 2007 Gardens #1532 **REVIEW REPORT** October 9, 2007 Final Report October 24, Comments Due By: 2007 Due:

PRELIMINARY REPORT

Regional Development Plan Policies

- 1. Provide sustainable economic growth in all areas of the region.
- 2. Encourage new homes and jobs within existing developed areas of the region, focusing on principal transportation corridors, the Central Business District, activity centers, and town centers.
- 3. Increase opportunities for mixed use development, transit-oriented development, infill, and redevelopment.
- 4. At strategic regional locations, plan and retail industrial and freight land uses.
- 5. Design transportation infrastructure to protect the context of adjoining development and provide a sense of place appropriate for our communities.
- 6. Promote the reclamation of Brownfield development sites.
- 7. Protect the character and integrity of existing neighborhoods, while also meeting the needs of communities to grow.
- 8. Encourage a variety of homes styles, densities, and price ranges in locations that are accessible to jobs and services to ensure housing for individuals and families of all incomes and age groups.
- 9. Promote new communities that feature greenspace and neighborhood parks, pedestrian scale, support transportation options, and provide an appropriate mix of uses and housing types.
- 10. Promote sustainable and energy efficient development.
- 11. Protect environmentally-sensitive areas including wetlands, floodplains, small water supply watersheds, rivers and stream corridors.
- 12. Increase the amount, quality, and connectivity, and accessibility of greenspace.
- 13. Provide strategies to preserve and enhance historic resources
- 14. Through regional infrastructure planning, limit growth in undeveloped areas of the region
- 15. Assist local governments to adopt growth management strategies that make more efficient use of existing infrastructure.
- 16. Inform and involve the public in planning at regional, local, and neighborhood levels.
- 17. Coordinate local policies and regulations to support Regional Policies
- 18. Encourage the development of state and regional growth management policy.

BEST LAND USE PRACTICES

Practice 1: Keep vehicle miles of travel (VMT) below the area average. Infill developments are the best at accomplishing this. The more remote a development the more self contained it must be to stay below the area average VMT.

Practice 2: Contribute to the area's jobs-housing balance. Strive for a job-housing balance with a three to five mile area around a development site.

Practice 3: Mix land uses at the finest grain the market will bear and include civic uses in the mix.

Practice 4: Develop in clusters and keep the clusters small. This will result in more open space preservation.

Preliminary Report:	September 25, 2007	DEVELOPMENT OF REGIONAL IMPACT	Project:	Highland Park Gardens #1532
Final Report Due:	October 24, 2007	<u>REVIEW REPORT</u>	Comments Due By:	October 9, 2007

Practice 5: Place higher-density housing near commercial centers, transit lines and parks. This will enable more walking, biking and transit use.

Practice 6: Phase convenience shopping and recreational opportunities to keep pace with housing. These are valued amenities and translate into less external travel by residents if located conveniently to housing.

Practice 7: Make subdivisions into neighborhoods with well-defined centers and edges. This is traditional development.

Practice 8: Reserve school sites and donate them if necessary to attract new schools. This will result in neighborhood schools which provide a more supportive learning environment than larger ones.

Practice 9: Concentrate commercial development in compact centers or districts, rather than letting it spread out in strips.

Practice 10: Make shopping centers and business parks into all-purpose activity centers. Suburban shopping centers and their environs could be improved by mixing uses and designing them with the pedestrian amenities of downtowns.

Practice 11: Tame auto-oriented land uses, or at least separate them from pedestrian-oriented uses. Relegate "big box" stores to areas where they will do the least harm to the community fabric.

BEST TRANSPORTATION PRACTICES

Practice 1: Design the street network with multiple connections and relatively direct routes.

Practice 2: Space through-streets no more than a half mile apart, or the equivalent route density in a curvilinear network.

Practice 3: Use traffic-calming measures liberally. Use short streets, sharp curves, center islands, traffic circles, textured pavements, speed bumps and raised crosswalks.

Practice 4: Keep speeds on local streets down to 20 mph.

Practice 5: Keep speeds on arterials and collectors down to 35 mph (at least inside communities).

Practice 6: Keep all streets as narrow as possible and never more than four traffic lanes wide. Florida suggests access streets 18 feet, subcollectors 26 feet, and collectors from 28 feet to 36 feet depending on lanes and parking. Practice 7: Align streets to give buildings energy-efficient orientations. Allow building sites to benefit from sun

angles, natural shading and prevailing breezes.

Practice 8: Avoid using traffic signals wherever possible and always space them for good traffic progression.

Practice 9: Provide networks for pedestrians and bicyclists as good as the network for motorists.

Practice 10: Provide pedestrians and bicyclists with shortcuts and alternatives to travel along high-volume streets.

Practice 11: Incorporate transit-oriented design features.

Practice 12: Establish TDM programs for local employees. Ridesharing, modified work hours, telecommuting and others.

BEST ENVIRONMENTAL PRACTICES

Practice 1: Use a systems approach to environmental planning. Shift from development orientation to basins or ecosystems planning.

Practice 2: Channel development into areas that are already disturbed.

Practice 3: Preserve patches of high-quality habitat, as large and circular as possible, feathered at the edges and connected by wildlife corridors. Stream corridors offer great potential.

Practice 4: Design around significant wetlands.

Practice 5: Establish upland buffers around all retained wetlands and natural water bodies.

Practice 6: Preserve significant uplands, too.

Practice 7: Restore and enhance ecological functions damaged by prior site activities.

Practice 8: Detain runoff with open, natural drainage systems. The more natural the system the more valuable it will be for wildlife and water quality.

Practice 9: Design man-made lakes and stormwater ponds for maximum environmental value. Recreation, stormwater management, wildlife habitat and others.

Preliminary Report:	September 25, 2007	DEVELOPMENT OF REGIONAL IMPACT	Project:	Highland Park Gardens #1532
Final Report Due:	October 24, 2007	<u>REVIEW REPORT</u>	Comments Due By:	October 9, 2007

Practice 10: Use reclaimed water and integrated pest management on large landscaped areas. Integrated pest management involves controlling pests by introducing their natural enemies and cultivating disease and insect resistant grasses.

Practice 11: Use and require the use of XeriscapeTM landscaping. XeriscapingTM is water conserving landscape methods and materials.

BEST HOUSING PRACTICES

Practice 1: Offer "life cycle" housing. Providing integrated housing for every part of the "life cycle".

Practice 2: Achieve an average net residential density of six to seven units per acre without the appearance of crowding. Cluster housing to achieve open space.

Practice 3: Use cost-effective site development and construction practices. Small frontages and setbacks; rolled curbs or no curbs; shared driveways.

Practice 4: Design of energy-saving features. Natural shading and solar access.

Practice 5: Supply affordable single-family homes for moderate-income households.

Practice 6: Supply affordable multi-family and accessory housing for low-income households.

Practice 7: Tap government housing programs to broaden and deepen the housing/income mix.

Practice 8: Mix housing to the extent the market will bear.

LOCATION

Where is the proposed project located within the host-local government's boundaries?

The proposed development is located in east DeKalb County, south of Interstate 85 and west of Interstate 285.

Will the proposed project be located close to the host-local government's boundary with another local government? If yes, identify the other local government.

The proposed development is entirely within DeKalb County.

Will the proposed project be located close to land uses in other jurisdictions that would benefit, or be negatively impacted, by the project? Identify those land uses which would benefit and those which would be negatively affected and describe impacts.

To be determined during the review.

ECONOMY OF THE REGION

According to information on the review form or comments received from potentially affected governments:

What new taxes will be generated by the proposed project?

Estimated value of the development is \$53,000,000 with an expected \$833,180 in annual local tax revenues.

How many short-term jobs will the development generate in the Region?

Preliminary Report:	September 25, 2007	DEVELOPMENT OF REGIONAL IMPACT	Project:	Highland Park Gardens #1532
Final Report Due:	October 24, 2007	<u>REVIEW REPORT</u>	Comments Due By:	October 9, 2007

Short-term jobs will depend upon construction schedule.

Is the regional work force sufficient to fill the demand created by the proposed project?

Yes.

In what ways could the proposed development have a positive or negative impact on existing industry or business in the Region?

To be determined during the review.

NATURAL RESOURCES

Stream Buffers and Watershed Protection

A tributary to the North Fork of Peachtree Creek is shown on the property, a portion of which appears to have been piped in the past. The 75-foot buffer required under the DeKalb County's Buffer Ordinance is shown on the open section of the stream on the property. However, a portion of a new emergency access road is shown as intruding into the 75-foot buffer, which will require approval from DeKalb County, including a variance if necessary. The 25-foot State Erosion and Sedimentation Act buffer is not shown along the stream. This buffer needs to be shown on all state waters on the property, as they are all subject to the State Erosion and Sedimentation Act buffer requirements, which are administered by the Environmental Protection Division of Georgia DNR.

The property is in the Peachtree Creek watershed and therefore is in the Chattahoochee River Basin. Peachtree Creek enters the Chattahoochee downstream of the water intakes in the Atlanta Region; therefore it is not in any water supply watershed in the Atlanta Region

Stormwater / Water Quality

The project should adequately address the impacts of the proposed development on stormwater runoff and downstream water quality. During construction, the project should conform to the relevant state and federal erosion and sedimentation control requirements. After construction, water quality will be impacted due to polluted stormwater runoff. ARC has estimated the amount of pollutants produced after construction of the proposed development. These are based on some simplifying assumptions for typical pollutant loading factors (lbs/ac/yr) from typical land uses in the Atlanta Region. The loading factors are based on regional storm water monitoring data from the Atlanta Region with impervious areas based on estimated averages for land uses in the Atlanta Region. If actual impervious percentages are higher or lower than the estimate, the pollutant loads will differ accordingly. The following table summarizes the results of the analysis:

Estimated Pounds of Pollutants Per Year

Land Use	Land Area (ac)	Total Phosphorus	Total Nitrogen	BOD	TSS	Zinc	Lead
Townhouse/Apartment	10.13	10.64	108.49	678.71	6128.65	7.70	1.42
TOTAL	10.13	10.64	108.49	678.71	6128.65	7.70	1.42

Preliminary Report:	September 25, 2007	DEVELOPMENT OF REGIONAL IMPACT	Project:	Highland Park Gardens #1532
Final Report Due:	October 24, 2007	<u>REVIEW REPORT</u>	Comments Due By:	October 9, 2007

Total Impervious = 48%

If on-site detention is used, the project should implement stormwater management controls (structural and/or nonstructural) as found in the Georgia Stormwater Management Manual (www.georgiastormwater.com) and meet the stormwater management quantity and quality criteria outlined in the Manual. Where possible, the project should utilize the stormwater better site design concepts included in the Manual.

HISTORIC RESOURCES

Will the proposed project be located near a national register site? If yes, identify site.

None have been identified.

In what ways could the proposed project create impacts that would damage the resource?

Not applicable.

In what ways could the proposed project have a positive influence on efforts to preserve or promote the historic resource?

Not applicable.

INFRASTRUCTURE Transportation

To be determined during the review.

The development **PASSES** the ARC's Air Quality Benchmark test.

Air Quality Impacts/Mitigation (based		
on ARC strategies)	Credits	Total
Where Residential is dominant, >15		
units/ac	6%	6%
Where Residential is dominant, 10% Retail		
or 10% Office	4%	4%
w/in 1/4 mile of Bus Stop (CCT, MARTA,		
Other)	3%	3%
Bike/ped networks that meet Mixed Use or		
Density target and connect to adjoining uses	5%	5%
Total Calculated ARC Air Quality		
Credits (15 % reduction required)		18%

What are the conclusions of this review? Is the transportation system (existing and planned) capable of accommodating these trips?

To be determined upon completion of review.

Preliminary Report:	September 25, 2007	DEVELOPMENT OF REGIONAL IMPACT	Project:	Highland Park Gardens #1532
Final Report Due:	October 24, 2007	<u>REVIEW REPORT</u>	Comments Due By:	October 9, 2007

INFRASTRUCTURE

Wastewater and Sewage

Wastewater is estimated at 0.083 MGD based on information submitted for the review.

Which facility will treat wastewater from the project?

Information submitted for the review state that the R.L Sutton plant will provide wastewater treatment for the proposed development.

What is the current permitted capacity and average annual flow to this facility?

The capacity of R.L Sutton Site is listed below:

PERMITTED CAPACITY MMF, MGD 1	DESIGN CAPACITY MMF, MGD	2001 MMF, MGD	2008 MMF, MGD	2008 CAPACITY AVAILABLE +/-, MGD	PLANNED EXPANSION	REMARKS
No flow limit	40	35	47	-7	Expansion of facilities to 60 mgd under construction; permit at 50 mgd must be secured.	

MMF: Maximum Monthly Flow. Mgd: million of gallons per day.

What other major developments will be served by the plant serving this project?

ARC has reviewed a number of major developments that will be served by this plant.

INFRASTRUCTURE

Water Supply and Treatment

How much water will the proposed project demand?

Water demand also is estimated at 0.095MGD based on information submitted for the review.

How will the proposed project's demand for water impact the water supply or treatment facilities of the jurisdiction providing the service?

₁ Source: Metropolitan North Georgia Water Planning District **SHORT-TERM WASTEWATER CAPACITY PLAN**, August 2002.

Preliminary Report:	September 25, 2007	DEVELOPMENT OF REGIONAL IMPACT	Project:	Highland Park Gardens #1532
Final Report Due:	October 24, 2007	<u>REVIEW REPORT</u>	Comments Due By:	October 9, 2007

Information submitted with the review suggests that there is sufficient water supply capacity available for the proposed project.

INFRASTRUCTURE

Solid Waste

How much solid waste will be generated by the project? Where will this waste be disposed?

Information submitted with the review 374 tons of solid waste per year and the waste will be disposed of in DeKalb County.

Will the project create any unusual waste handling or disposal problems?

No.

Are there any provisions for recycling this project's solid waste.

None stated.

INFRASTRUCTURE

Other facilities

According to information gained in the review process, will there be any unusual intergovernmental impacts on:

- · Levels of governmental services?
- · Administrative facilities?
- · Schools?
- · Libraries or cultural facilities?
- Fire, police, or EMS?
- Other government facilities?
- Other community services/resources (day care, health care, low income, non-English speaking, elderly, etc.)?

To be determined during the review.

HOUSING

Will the proposed project create a demand for additional housing?

Preliminary Report:	September 25, 2007	DEVELOPMENT OF REGIONAL IMPACT	Project:	Highland Park Gardens #1532
Final Report Due:	October 24, 2007	<u>REVIEW REPORT</u>	Comments Due By:	October 9, 2007

No, the proposed development will add 380 new residential units.

Will the proposed project provide housing opportunities close to existing employment centers?

Yes, once developed, this project will provide housing opportunities for existing employment centers as well as providing opportunities for individuals to live and work within close proximity to one another.

Is there housing accessible to the project in all price ranges demanded?

The site proposed for the development is located in Census Tract 217.05. This tract had a 0.7 percent increase in number of housing units from 2000 to 2006 according to ARC's Population and Housing Report. The report shows that 30 percent, respectively, of the housing units are single-family, compared to 69 percent for the region; thus indicating is a variety of multi-family housing options around the development area.

Is it likely or unlikely that potential employees of the proposed project will be able to find affordable* housing?

Likely, assuming the development is approved with multiple price ranges of housing.

* Defined as 30 percent of the income of a family making 80 percent of the median income of the Region – FY 2000 median income of \$51,649 for family of 4 in Georgia.
