## Detailed Description and Justification

Provides funding of the Atlanta Regional Commission's successful program geared toward the implementation of projects identified in LCI studies and that have been pre-qualified. This lump sum will be used for Project Management, Preliminary Engineering, Right of Way and/or Construction as determined by ARC's Land Use staff through a competitive evaluation process. This line item provides for phasing of investments that would link land-use and transportation, and fulfill transportation safety, accessibility and mobility requirements.
