Detailed Description and Justification

The Section 5310 program provides assistance in meeting the transportation needs of elderly and disabled persons where public transportation services are unavailable, insufficient or inappropriate. The program ensures that efforts are made in the planning and design of these facilities and services to guarantee their accessibility and effectiveness for elderly citizens and people with disabilities, and it guarantees that all federal programs offering assistance to public transportation contain provisions to implement these policies. The program requires coordination with other federally assisted programs and services in order to make the most efficient use of Federal resources. Funding is allocated to the State by a formula based on the number of elderly persons and persons with disabilities according to the latest available U.S. census data.
