#### Detailed Description and Justification

Project includes preliminary design of managed lanes along SR 400 between I-285 and McFarland Parkway. In this case, managed lanes means high occupancy toll lanes. Passenger vehicles not meeting an occupancy requirement use these lanes by paying a variable toll. Meanwhile, transit vehicles and passenger vehicles meeting the occupancy requirement can use the lanes for free. Two managed lanes in each direction (four total) are proposed between I-285 and Holcomb Bridge Road and one managed lane in each direction (two total) between Holcomb Bridge Road and McFarland Parkway. Managed lanes are designed to provide a reliable trip option for those that carpool, use a vanpool, take transit, or wish to pay to use the lane. Preliminary design will take approximately four years to complete and it is expected that plans will be completed by 2014.
