Detailed Description and Justification

This project involves constructing mid-block crosswalks, pedestrian refuge islands and other pedestrian mobility and safety improvements along Cleveland Avenue between US 19/41 (Metropolitan Parkway) and Browns Mills Road. The exact locations of the improvements will be identified through a Roadway Safety Audit (RSA), which will include an analysis of pedestrian crash data, consultation with MARTA staff and interviews with community members and law enforcement officers. The corridor is served by MARTA bus route 95, one of the busiest in the system, as well as routes 172, 178, and 193. This project will help improve pedestrian mobility and access to transit and help increase pedestrian activity in the area. This project will incorporate several pedestrian safety projects identified in the locally-adopted Connect Atlanta Plan, including projects PA-014 and PA-015. Cleveland Avenue is on the Regional Strategic Transportation System and the project is located entirely within defined Equitable Target Areas. The project is being funded under the Last Mile Connectivity Program, a regional program defined in PLAN 2040 to improve pedestrian and bicyclist mobility, accessibility and safety along transit corridors, within employment and commercial centers, and in the vicinity of other major origins and destinations such as schools.
