Detailed Description and Justification

This project involves installing/constructing pedestrian safety improvements at several intersections adjacent to existing heavy rail stations and regional local and express bus stops. This project includes the addition of new traffic signals at seven intersections as well as rectangular rapid flash beacons (RRFBs) at five intersections. These signals are necessary to provide safe opportunities for pedestrian crossings of the Strategic Regional Throughfare Network and the Regional Strategic Transportation System corridors within Midtown. These locations were identified for improvements in the Blueprint Midtown plan. To increase the visibility of pedestrian crossings in Midtown, approximately 140 intersections will be restriped in the Midtown core. The existing striping is in poor condition and many intersections were never re-striping after resurfacing and construction projects. The project is being funded under the Last Mile Connectivity Program, a regional program defined in PLAN 2040 to improve pedestrian and bicyclist mobility, accessibility and safety along transit corridors, within employment and commercial centers, and in the vicinity of other major origins and destinations such as schools.
