Network Year

2040

Corridor Length

3.5 miles

Detailed Description and Justification

This project will widen SR 42/US 23 from Lake Harbin Road to Anvil Block Road from 2 to 4 lanes and will facilitate better traffic flow in the heavily traveled corridor. The purpose of this project is to improve the safety and operation of SR 42 in Clayton County and also connect to the existing four lane section to the south with the existing four-lane section to the north. SR 42 in Clayton County is a major north-south route that runs from I-285 south to I-675 and the Henry County line. This project will establish a new vertical alignment since the current sight distance appears to be an issue. Enhanced connectivity will be provided for both pedestrian and vehicular traffic from surrounding neighborhoods and the commercial districts along SR 42. This project will provide safety, additional mobility, and operational benefits as well as provide the public with a safer driving environment.
