Detailed Description and Justification

Construction of a new overpass over I-75 approximately 1200 feet north of the existing overpass at Chastain Road over I-75. The new overpass will connect Frey Road to Townpark Lane with a signalized intersection at Busbee Drive. The project will provide improved ingress to I-75 northbound by providing access to the existing northbound on-ramp via a new lane from Busbee Drive which will allow access to I-75 without the current need to merge with traffic on Chastain Road. The project will also provide improved egress from I-75 southbound by providing access to Frey Road via a new lane from the existing off-ramp to Frey Road without the current need to merge with traffic on Chastain Road. Three new traffic signals and three signal modifications will be included as part of this phase.
