Detailed Description and Justification

This project includes pedestrian mobility and safety improvements, vehicular turning improvements and improved access to transit. The project would be coordinated with the gateway improvements that will be constructed at this intersection later this year. There are currently matching funds within the 2011 SPLOST for the project. The project was identified in the 2011 SPLOST and the City of Marietta Transportation Improvement Plan based on the frequency of accidents (in which the top ten intersections were prioritized). It will also be included in an update to the County Transportation Plan which was recently initiated. The project is being funded under the Roadway Operations and Safety Program, a regional program defined in PLAN 2040 to make smaller-scale improvements along existing roadways which are the most critical for cross-jurisdictional travel. With the exception of certain systemwide programs with broad benefits across a defined geographic area, eligibility under this program is limited to facilities on the Regional Strategic Transportation System, with additional priority given to those also identified as a Regional Thoroughfare. Both US 41 and SR 120 are designated as Level 2 Regional Thoroughfares in the immediate vicinity of this intersection.
