Network Year

2020

Corridor Length

1.6 miles

Detailed Description and Justification

The proposed project would construct a new location segment of the Newnan Bypass from Turkey Creek Road to SR 16. This project will be coordinated with the SR 16 widening that begins just before the I-85 overpass to its intersection with US 29/27 Alt. (CW-034). The bypass would typically be a rural cross-section containing four 12-foot lanes, 10 foot shoulders (6'-6" paved), and a 44-foot depressed median where it begins at Turkey Creek Road. The bypass would transition to an urban cross-section containing four 12-foot lanes, a 20-foot wide raised grass median, and 10-foot rural shoulders (6'-6" paved) on the outside after crossing the Central of Georgia Railway. The intersections with both Turkey Creek Road and SR 16 would be signalized. At these intersections the cross-section would have curb and gutter to reduce right-of-way impacts and sidewalks to facilitate pedestrian travel. All necessary turn lanes would be provided at the intersections.

| Phase Status & Funding Information | | Status | FISCAL YEAR | TOTAL PHASE COST | BREAKDOWN OF TOTAL PHASE COST BY FUNDING SOURCE | | | |
|------------------------------------|---------------------------------------|--------|-------------|------------------|---|----------|---------|---------------|
