Detailed Description and Justification

The project consists of improving pedestrian access along Glenwood Road by adding new sidewalks or improving existing sidewalks along the corridor. Wheelchair ramps at driveways and intersections will be added; ramps will be ADA compliant to the maximum extent feasible. The proposed typical section will be an urban shoulder, including a 5-foot sidewalk with a 2-foot stamped concrete buffer. It is expected that a majority of the existing curb will be replaced. Retaining walls will also be used at a number of locations along the project length to minimize property impacts.
