Detailed Description and Justification

This project includes planning, design and construction for approximately 4.5 miles of 10' asphalt and/or concrete multi-use trail beginning at the entrance of Turner Lake Park at the intersection of Turner Lake Road and Clark Street, in the City of Covington. Within the park existing trails and the boardwalk will be repaired and enhanced. The new section of trail will be approximately 4.5 miles of 10' wide asphalt and/or concrete. It will depart from Turner Lake Park and continue across a small tributary, west along the sewer easement parallel to Turkey Creek, and on to the Yellow River. A pedestrian bridge across the Yellow River (approximately 100') is part of this project and will connect the trail to the Newton County Educational Complex located on Brown Bridge Road and adjacent to the Yellow River. Landscape, sign and lighting enhancements for the park entrance are also part of this project. Section 2 of the Yellow River Trail will continue from the High School to the historic mill town of Porterdale. The trail will terminate at the historic depot, currently being restored to serve as a trailhead and community center.
