Network Year

2020

Corridor Length

6.8 miles

Detailed Description and Justification

This project is the SR 92 widening from 2 existing lanes to 6 lanes (3 lanes in each direction) from Brown Street in Douglas County to Nebo Road in Paulding County - approximately 7 miles in length. The Metro Arterial Connector (MAC) is a network of state highways approximately 180 miles in length encircling the Atlanta region. Roadways comprising the MAC (primarily SR 20 and SR 92) are proposed to have a minimum of four travel lanes along its entire length. At least 30 capacity projects are already planned along the MAC over the timeframe of the RTP. A study will be conducted to determine how these individual projects can be engineered and constructed in a holistic and logical manner to maximize the mobility, safety, accessibility and growth management benefits which would best serve multimodal needs (auto, truck, transit, bicycling, walking) and include land use policies, access management regulations, and ITS components to ensure network uniformity.
