Detailed Description and Justification

This project is next phase of the improvement of Sigman Road that will follow RO-014A. It will provide capacity improvements for Sigman Road to provide service to Rockdale General Hospital and the Georgia International Horse Park. The Metro Arterial Connector (MAC) is a network of state highways approximately 180 miles in length encircling the Atlanta region. Roadways comprising the MAC (primarily SR 20 and SR 92) are proposed to have a minimum of four travel lanes along its entire length. At least 30 capacity projects are already planned along the MAC over the timeframe of the RTP. A study will be conducted to determine how these individual projects can be engineered and constructed in a holistic and logical manner to maximize the multimodal mobility, safety, accessibility and growth management benefits of the project.
