

## Keeping Goods Moving

The Atlanta Regional Freight Mobility Plan and Atlanta Strategic Truck Route Master Plan identified truck routing and operations needs and identified a regional truck route network. PLAN 2040 includes a new Freight Operations and Safety funding program geared towards improving freight mobility in and through the Atlanta region via this network. The program is funded in the FY 2012-2017 TIP at \$75 million in partnership with GDOT. Projects to be funded out of this program will be identified in 2012.
