

## Taking Bold Steps toward Focused Growth through Livable Centers

PLAN 2040 capitalizes on the region-wide momentum generated by over a decade of support for livable communities and tighter integration of transportation and land use planning. The Livable Centers Initiative (LCI) Program currently includes 91 study areas and has implemented 90 transportation projects within 56 of those communities. PLAN 2040 continues support for this successful program and provides \$320 million in funding to continue implementation of livable centers throughout the region.
