- * Indicates a change that is statistically significant at the 90% confidence level.
- † Indicates a 'controlled estimate' for which statistical significance cannot be tested.

Superdistricts are planning units built by the Atlanta Regional Commission from groups of Census tracts to allow consistent comparisons at a sub-county geography over time. Superdistricts are useful for looking at local conditions when counties are too coarse a geography but tracts too fine. Moreover, Superdistrict boundaries remain constant even as census tracts split and cities annex or de-annex territory.
