Description, Purpose and Benefits
 The unified transit communications project entails the upgrade and / or replacement of the 30 year old telephone and public address systems including switching the system from a copper based system to a digital based system. This will improve the quality of information available to patrons at stations and on the trains. Total TIA funding committed to the project is \$27,200,000, with additional funds from other MARTA revenue sources likely to complement this investment.
