

Preliminary Project Funding Recommendations (2012 Solicitation Cycle)

Last Mile Connectivity Program
General Roadway Safety and Operations Program
Freight Safety and Operations Program

All information is subject to change and is being provided for review and comment. This package reflects preliminary recommendations made on October 1, 2012 by the Atlanta Regional Commission and the Georgia Department of Transportation for three programs funded in the region's PLAN 2040 transportation plan. Following a review by local governments to confirm detailed phasing cost and schedule data, and to reaffirm local financial commitments, recommendations will be finalized and incorporated into PLAN 2040 in December 2012.

Background on Funding Recommendations

- Last Mile Connectivity Program
- General Roadway Safety and Operations Program
- Freight Safety and Operations Program

Summary

The Atlanta Regional Commission (ARC) and the Georgia Department of Transportation (GDOT) are pleased to announce initial recommendations resulting from a six-month project solicitation process to fund locally identified priorities under three programs. The projects to be funded will address a wide array of mobility, safety and access issues encountered by motorists, pedestrians, freight distributors, bicyclists and transit users around the region. Many recommended projects address the needs of multiple system users, so the three programs are considered complementary in nature, not as stand-alone funding “silos”.

A total of 59 projects have already been scoped thoroughly enough to receive full funding for implementation totaling about \$89 million. Another 55 priority areas have been targeted for improvements, but a specific project has not yet been developed to address the particular circumstances at those locations. Over \$3 million of funds will be allocated to undertake scoping activities to identify specific project concepts which can be considered for implementation funding in a future solicitation.

Regional and State Planning Context

In July 2011, following a three-year community engagement process, the Atlanta region adopted PLAN 2040, which defines our long range vision for transportation. The regional plan was developed to complement the Statewide Strategic Transportation Plan approved by Governor Perdue in June 2010. It also conforms to all federal and state planning requirements.

PLAN 2040 includes major investments for maintaining our existing infrastructure, as well several large-scale new investments to improve mobility, such as new interchanges, managed lanes and transit lines. It defines several priority networks, along corridors and within activity centers where the need to move the greatest volume of people and goods is the highest. These networks receive first consideration for limited federal and state funding.

Programs to Support Local Priorities

The plan also includes several programs which provide financial resources for cities and counties to identify and prioritize mobility, safety and accessibility issues and to then develop cost-effective solutions which can be supported by citizens and local leaders. These planning activities are supported at various levels. A County Transportation Plan (CTP) program helps county and city governments understand movements between communities within the county and to/from adjacent counties. These plans form the building blocks of the regional plan. Similar programs exist to examine needs and identify solutions along major transportation corridors and within town centers and other significant employment areas.

All of these plans, regardless of whether the geography studied is the entire state, the region, a county, a city or a single transportation corridor, recognize that localized small-scale investments can also have significant impacts on the ability to drive, walk, bike or take transit safely and efficiently. Providing travel options, particularly for short trips, can also be a cost-effective way of addressing transportation challenges within a community. Improvements at the local level, such as adding a turn lane at a key congested intersection, building a sidewalk connecting a transit station with nearby office buildings, or installing bike lanes which allow school children to safely ride between their neighborhood and a nearby school, are all ways to reduce community level roadway congestion without expensive, disruptive and controversial major capacity projects.

Project Solicitation Process

In the spring of 2012, ARC announced a “solicitation” for small-scale projects which could be implemented by local governments to address mobility, safety and access needs identified through previous planning activities.

As agreed upon through extensive collaboration with local government staff and other stakeholders who participate regularly in the regional planning process, projects to be funded had to be consistent with the regional priority networks as described earlier. This restriction on eligibility would ensure that maximum regional impact could be achieved, even though the projects themselves were relatively small in scope. Beyond this basic regional “framework”, local governments within each county were vested with complete responsibility to work together to prioritize their own needs and suggest projects for funding consideration.

Prioritized requests were submitted for consideration to ARC in late May. After an extensive review process involving multiple meetings with GDOT and a reassessment of the region’s financial situation in light of new federal legislation signed into law on June 6, coupled with the failure of the Transportation Investment Act (TIA) referendum on July 31, an initial set of funding recommendations was developed. A field review of projects proposed to receive funding was conducted to ensure that each project conforms to the eligibility criteria and emphasis areas defined for the three programs.

Initial Recommendations

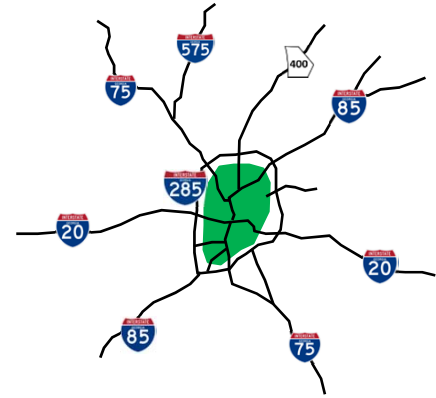

The following pages present preliminary project funding recommendations, organized by subregion. For each subregion, projects proposed to receive either full funding for implementation or scoping/engineering funds are identified. In addition, a few photo examples are provided which demonstrate the scope and variety of issues which will be addressed through these funding commitments.

Finalizing Recommendations

Sponsors will review this information and provide feedback to ARC and GDOT through November 2. The recommendations will then be finalized and projects added to the short-range element of PLAN 2040, known as the Transportation Improvement Program (TIP), in December 2012. During the review period, city, county and state agencies will verify proposed funding amounts and schedules, reconfirm commitments from local policy leaders on any funding match requirements, develop concise explanations of the need, purpose and scope of each project, and prepare an online map of the projects so that citizens can more easily learn what work will occur in and around their communities.

Preliminary Project Funding Recommendations – Central Subregion

- Last Mile Connectivity Program
- General Roadway Safety and Operations Program
- Freight Safety and Operations Program

All information is subject to change and is being provided for review and comment. This fact sheet reflects preliminary recommendations made on October 1, 2012 by the Atlanta Regional Commission and the Georgia Department of Transportation. Following a review by local governments to confirm detailed phasing cost and schedule data, and to reaffirm local financial commitments, recommendations will be finalized and incorporated into the region’s Transportation Improvement Program in December 2012.

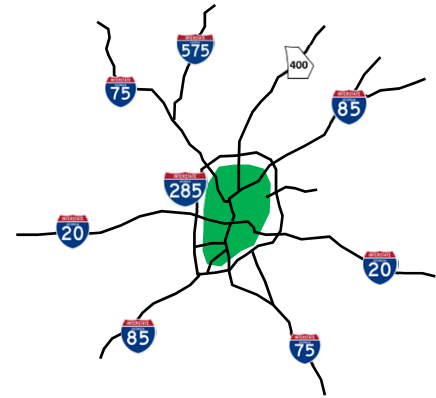

RECOMMENDED FOR FULL IMPLEMENTATION FUNDING

These projects have relatively well developed concepts, budgets and schedules and are ready to move quickly into design and engineering. Full funding is allocated to complete the project as proposed.

Project Number	Project Name	Sponsor	Federal Funds Committed
004	Moores Mill Road between Bolton Road and Adams Drive in City of Atlanta - Multimodal Roadway Extension and Transit Layover Facility	City of Atlanta	\$ 2,000,000
007	Cleveland Avenue between US 19/41 (Metropolitan Parkway) and Browns Mill Road in City of Atlanta - Pedestrian Safety Improvements	City of Atlanta	\$ 1,000,000
008	Campbellton Road between Greenbriar Parkway and US 29 (Lee Street) in City of Atlanta - Pedestrian Safety Improvements	City of Atlanta	\$ 1,000,000
009	Boulevard between US 78/278 (Ponce de Leon Avenue) and SR 154 (Memorial Drive) in City of Atlanta - Pedestrian Safety Improvements	City of Atlanta	\$ 1,000,000
010	Cycle Atlanta: Phase 1.0 - Bicycle Facility Installation	City of Atlanta	\$ 2,000,000
011	Midtown Atlanta Regional Activity Center - Pedestrian Safety Improvements	City of Atlanta / Midtown Alliance	\$ 1,421,600
016	US 19 (Spring Street) between Peachtree Street and 17th Street in City of Atlanta - Pedestrian Safety Improvements	City of Atlanta / Midtown Alliance	\$ 1,948,000
017	US 23 (Moreland Avenue) at Arkwright Place in City of Atlanta - Multimodal Intersection Improvements	City of Atlanta	\$ 1,000,000
019	SR 154 (Memorial Drive) between US 23 (Moreland Avenue) and SR 155 (Candler Road) in City of Atlanta - Multimodal Safety Improvements	City of Atlanta	\$ 2,000,000
062	Key Road and Constitution Road at Entrenchment Creek in DeKalb County - Bridge Replacements	DeKalb County	\$ 1,292,000
102	Road Sign Replacement Program in City of East Point	City of East Point	\$ 480,000
103	Resurfacing of Cleveland Avenue, Sylvan Road, Virginia Avenue, and Norman Berry Drive in City of East Point	City of East Point	\$ 1,920,000
167	Bicycle and Pedestrian Access to Transit Improvements at Multiple Locations in Vicinity of MARTA Rail Stations	MARTA	\$ 820,000
183A	Prioritized Signal Upgrade Program - Phase 1 (includes 10 corridors throughout the region - see separate list)	Georgia DOT	\$ 15,460,000
183B	Prioritized Signal Upgrade Program - Phase 2 (project list under development)	Georgia DOT	\$ 11,600,000
184A	Prioritized Signal Retiming Program - Phase 1 (includes 85 corridors and nearly 1,500 intersections throughout the region - see separate list)	Georgia DOT	\$ 5,888,000
184B	Prioritized Signal Retiming Program - Phase 2 (project list under development)	Georgia DOT	\$ 4,000,000
185	Atlanta Traffic Control Center	City of Atlanta	\$ 400,000

Preliminary Project Funding Recommendations – Central Subregion

- Last Mile Connectivity Program
- General Roadway Safety and Operations Program
- Freight Safety and Operations Program

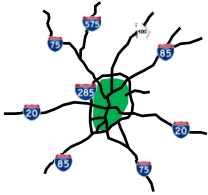

All information is subject to change and is being provided for review and comment. This fact sheet reflects preliminary recommendations made on October 1, 2012 by the Atlanta Regional Commission and the Georgia Department of Transportation. Following a review by local governments to confirm detailed phasing cost and schedule data, and to reaffirm local financial commitments, recommendations will be finalized and incorporated into the region’s Transportation Improvement Program in December 2012.

RECOMMENDED FOR SCOPING / ENGINEERING ONLY

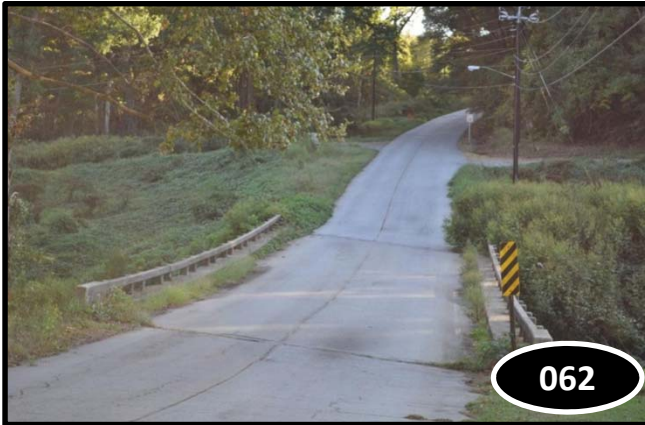

These projects do not yet have well developed concepts, budgets and/or schedules. Funding is being allocated to advance projects to a point where they can be considered for implementation funding in a future solicitation process.

Project Number	Project Name	Sponsor	Scoping Year	Federal Funds Committed
012	Martin Luther King, Jr. Drive between Spring Street and Capitol Avenue in City of Atlanta - Two-Way Conversion	City of Atlanta	2013	\$ 80,000
013	Mitchell Street between Spring Street and Washington Avenue in City of Atlanta - Two-Way Conversion	City of Atlanta	2013	\$ 80,000
014	Marietta Boulevard at Thomas Street and Marietta Road at Thomas Street in City of Atlanta - Freight Access Intersection Improvements	City of Atlanta	2013	\$ 80,000
018	SR 237 (Piedmont Road) between Sidney Marcus Boulevard and Garson Drive in City of Atlanta - Pedestrian Safety Improvements	City of Atlanta	2013	\$ 80,000
072	South Columbia Drive from SR 10 (East College Avenue) to SR 154 (Memorial Drive) - Multiuse Path	City of Decatur / DeKalb County	2013	\$ 60,000
098	Railroad Crossing Safety Improvements in City of College Park	City of College Park	2013	\$ 60,000
100	Development of Roadway Resurfacing Prioritization Program in City of College Park	City of College Park	2013	\$ 40,000

Sample Projects Recommended for Central Subregion

All information is subject to change and is being provided for review and comment. This fact sheet reflects preliminary recommendations made on October 1, 2012 by the Atlanta Regional Commission and the Georgia Department of Transportation. Following a review by local governments to confirm detailed phasing cost and schedule data, and to reaffirm local financial commitments, recommendations will be finalized and incorporated into the region's Transportation Improvement Program in December 2012.

This bridge on Key Road in DeKalb will be replaced, providing an alternate route for truck traffic.

Improvements will be made at the congested intersection of Moreland Ave. and Arkwright Pl. in Atlanta.

The feasibility of converting MLK Dr. in Atlanta to two-way operations will be examined.

Scoping and engineering work will be done at the busy trucking intersection of Marietta Blvd. and Thomas St.

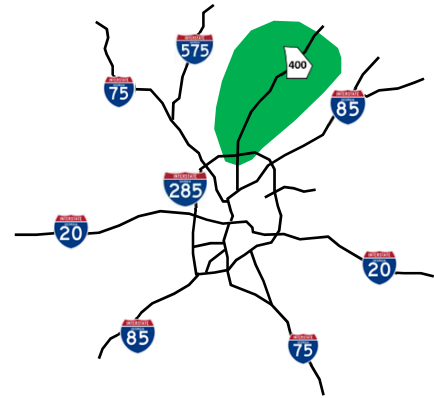

Pedestrian safety improvements will be scoped and engineered along Piedmont Rd. near the Lindbergh MARTA station in Atlanta.

Several streets will be repaved in East Point, including Cleveland Ave.

Preliminary Project Funding Recommendations – North Subregion

- Last Mile Connectivity Program
- General Roadway Safety and Operations Program
- Freight Safety and Operations Program

All information is subject to change and is being provided for review and comment. This fact sheet reflects preliminary recommendations made on October 1, 2012 by the Atlanta Regional Commission and the Georgia Department of Transportation. Following a review by local governments to confirm detailed phasing cost and schedule data, and to reaffirm local financial commitments, recommendations will be finalized and incorporated into the region’s Transportation Improvement Program in December 2012.

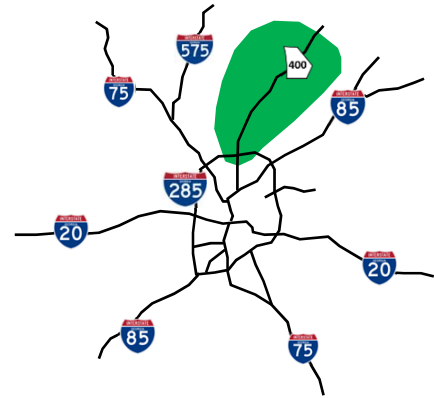

RECOMMENDED FOR FULL IMPLEMENTATION FUNDING

These projects have relatively well developed concepts, budgets and schedules and are ready to move quickly into design and engineering. Full funding is allocated to complete the project as proposed.

Project Number	Project Name	Sponsor	Federal Funds Committed
063	Chamblee Dunwoody Road from Cambridge Drive to Valley View Road in City of Dunwoody - Bike Lanes	City of Dunwoody	\$ 640,000
066	Bicycle Plan in Perimeter Activity Center	Perimeter CIDs	\$ 80,000
082	Traffic Signal Cabinet Upgrades at 20 Locations in Forsyth County	Forsyth County	\$ 320,000
084	SR 9 (Alpharetta Highway) at Bethany Bend in City of Milton - Intersection Concept Study	City of Milton	\$ 60,000
085	ITS System Expansion Along Kimball Bridge Road, Abbots Bridge Road, McGinnis Ferry Road and Sargent Road in City of Johns Creek	City of Johns Creek	\$ 804,000
086	SR 9 (Roswell Road) from Atlanta City Limits to Abernathy Road in City of Sandy Springs - ITS System Expansion	City of Sandy Springs	\$ 1,320,000
087	Big Creek Parkway Planning Study in City of Roswell	City of Roswell / North Fulton CID	\$ 280,000
089	ITS Upgrades within Perimeter Activity Center	Perimeter CIDs	\$ 800,000
094	Multimodal Connections Study Between Old Alabama Road and State Bridge Road in City of Johns Creek	City of Johns Creek	\$ 200,000
095	Bicycle, Pedestrian, and Trail Plan in City of Sandy Springs	City of Sandy Springs	\$ 80,000
183A	Prioritized Signal Upgrade Program - Phase 1 (includes 10 corridors throughout the region - see separate list)	Georgia DOT	\$ 15,460,000
183B	Prioritized Signal Upgrade Program - Phase 2 (project list under development)	Georgia DOT	\$ 11,600,000
184A	Prioritized Signal Retiming Program - Phase 1 (includes 85 corridors and nearly 1,500 intersections throughout the region - see separate list)	Georgia DOT	\$ 5,888,000
184B	Prioritized Signal Retiming Program - Phase 2 (project list under development)	Georgia DOT	\$ 4,000,000

Preliminary Project Funding Recommendations – North Subregion

- Last Mile Connectivity Program
- General Roadway Safety and Operations Program
- Freight Safety and Operations Program

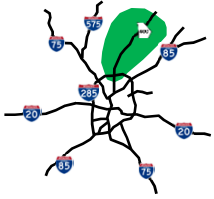

All information is subject to change and is being provided for review and comment. This fact sheet reflects preliminary recommendations made on October 1, 2012 by the Atlanta Regional Commission and the Georgia Department of Transportation. Following a review by local governments to confirm detailed phasing cost and schedule data, and to reaffirm local financial commitments, recommendations will be finalized and incorporated into the region’s Transportation Improvement Program in December 2012.

RECOMMENDED FOR SCOPING / ENGINEERING ONLY

These projects do not yet have well developed concepts, budgets and/or schedules. Funding is being allocated to advance projects to a point where they can be considered for implementation funding in a future solicitation process.

Project Number	Project Name	Sponsor	Scoping Year	Federal Funds Committed
088	North Point Parkway from Mansell Road to Haynes Bridge Road in City of Alpharetta - Bicycle Lanes	City of Alpharetta	2013	\$ 60,000
090	SR 9 (Roswell Road) at Glenridge Drive in City of Sandy Springs - Intersection Improvements	City of Sandy Springs	2013	\$ 60,000
097	SR 141 (Medlock Bridge Road) from State Bridge Road to Wilson Road - Pedestrian Facilities	City of Johns Creek	2013	\$ 80,000

Sample Projects Recommended for North Subregion

All information is subject to change and is being provided for review and comment. Following a review by local governments to confirm detailed phasing cost and schedule data, and to reaffirm local financial commitments, recommendations will be finalized and incorporated into the region's Transportation Improvement Program in December 2012.

084

Options to improve safety will be developed for the intersection of SR 9 and Bethany Bend in Milton.

066

A plan to improve biking conditions within Perimeter Center will be prepared.

087

An extension of Big Creek Parkway to connect Mansell Rd. and Holcomb Bridge Rd. in Roswell will be studied.

085

ITS will be implemented along six corridors in Johns Creek, including this section of Abbotts Bridge Rd.

090

Scoping and engineering will be done to improve safety and operations at the intersection of Roswell Rd. and Glenridge Dr. in Sandy Springs.

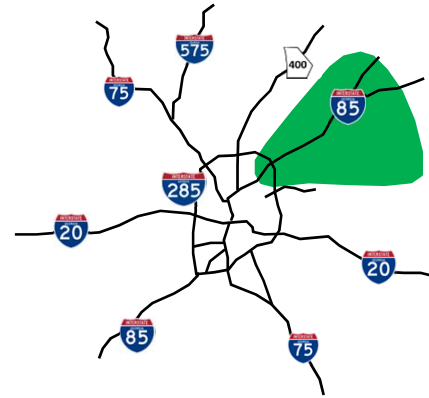

082

Twenty traffic signal cabinets in Forsyth County will be upgraded.

Preliminary Project Funding Recommendations – NE Subregion

151	East Lake Road from SR 155 to John Elliott Road in Henry County - Pedestrian Facilities in Vicinity of East Lake Elementary School, Union Grove Middle School and Union Grove High School	Henry County	2013	\$ 60,000
153	SR 81 at Mill Road in Henry County - Intersection Improvements	Henry County	2013	\$ 60,000
157	Panola Road at Scarborough Road in Henry County - Intersection Improvements	Henry County	2013	\$ 40,000
159	East Atlanta Road at Rex Road in Henry County - Intersection Improvements	Henry County	2013	\$ 40,000
161	East Atlanta Road at Thurman Road in Henry County - Intersection Improvements	Henry County	2013	\$ 40,000
162	SR 138 at Moseley Road in Henry County - Intersection Improvements	Henry County	2013	\$ 60,000
163	US 23 / SR 42 at Locust Grove Griffin Road in City of Locust Grove - Intersection Improvements	Henry County / City of Locust Grove	2013	\$ 60,000
164	SR 20 at McGarity Road / Lawrenceville Street / Fairview Drive in City of McDonough - Intersection Improvements	Henry County / City of McDonough	2013	\$ 60,000

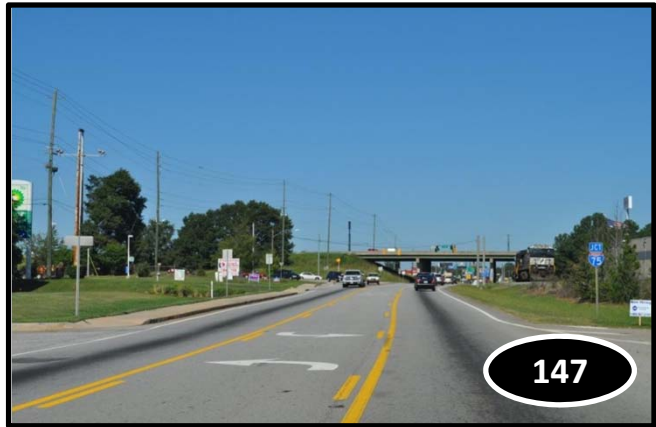

Sample Projects Recommended for Southeast Subregion

All information is subject to change and is being provided for review and comment. This fact sheet reflects preliminary recommendations made on October 1, 2012 by the Atlanta Regional Commission and the Georgia Department of Transportation. Following a review by local governments to confirm detailed phasing cost and schedule data, and to reaffirm local financial commitments, recommendations will be finalized and incorporated into the region's Transportation Improvement Program in December 2012.

Pedestrian improvements around several schools in Morrow will be defined.

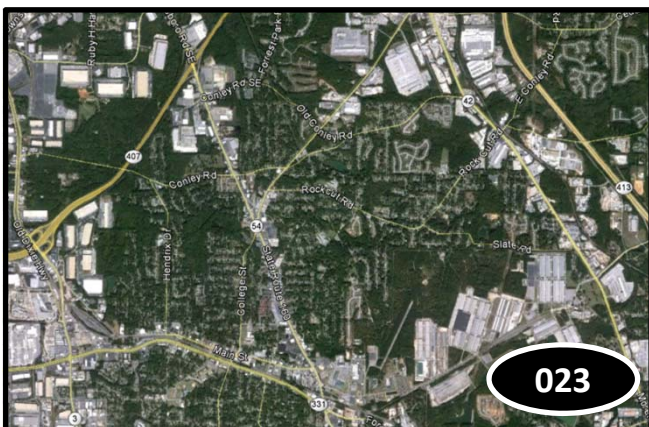

The feasibility of adding a northbound auxiliary lane to SR 155 near I-75 in Henry County will be determined.

Pedestrian improvements along US 19/41 (Tara Blvd.) in Clayton County will be engineered.

Safety improvements at the intersection of US 23 / SR 42 and Locust Grove Griffin Road will be engineered.

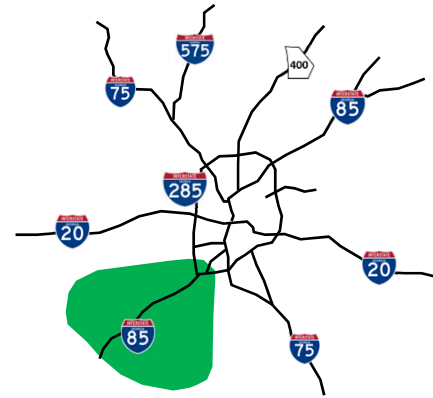

The feasibility of creating a continuous east/west corridor along Conley Rd. in Clayton County will be determined.

The intersection of Jodeco Rd. and Blackhall Rd. will be signalized.

Preliminary Project Funding Recommendations – SW Subregion

- Last Mile Connectivity Program
- General Roadway Safety and Operations Program
- Freight Safety and Operations Program

All information is subject to change and is being provided for review and comment. This fact sheet reflects preliminary recommendations made on October 1, 2012 by the Atlanta Regional Commission and the Georgia Department of Transportation. Following a review by local governments to confirm detailed phasing cost and schedule data, and to reaffirm local financial commitments, recommendations will be finalized and incorporated into the region’s Transportation Improvement Program in December 2012.

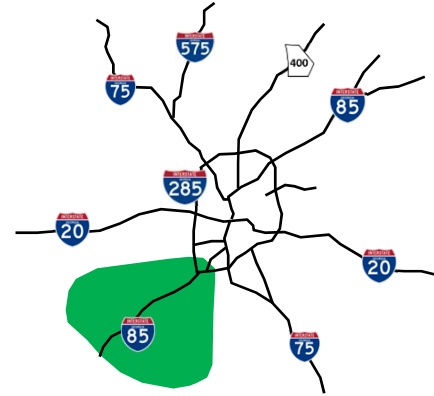

RECOMMENDED FOR FULL IMPLEMENTATION FUNDING

These projects have relatively well developed concepts, budgets and schedules and are ready to move quickly into design and engineering. Full funding is allocated to complete the project as proposed.

Project Number	Project Name	Sponsor	Federal Funds Committed
026	Valley Hill Road at Flint River in Clayton County - Bridge Replacement	Clayton County	\$ 1,600,000
061	SR 16 at Pylant Street and Dead Oak Creek Bridge on Pylant Street in City of Senoia - Intersection Improvements and Bridge Replacement	City of Senoia	\$ 1,600,000
080	Roadway Resurfacing on SR 85 Connector, Brooks Woolsey Road and Ebenezer Road in Fayette County	Fayette County / Town of Brooks	\$ 745,600
107	SR 279 (Old National Highway) from Flat Shoals Road to Sullivan Road in Fulton County - Pedestrian Facilities (Incremental Funding for Existing Project FS-195)	Fulton County	\$ 1,832,000
108	Buffington Road from Royal South Parkway to US 29 (Roosevelt Highway) in Fulton County - Roadway Operational Improvements (Incremental Funding for Existing Project FS-AR-BP087B)	Fulton County	\$ 800,000
183A	Prioritized Signal Upgrade Program - Phase 1 (includes 10 corridors throughout the region - see separate list)	Georgia DOT	\$ 15,460,000
183B	Prioritized Signal Upgrade Program - Phase 2 (project list under development)	Georgia DOT	\$ 11,600,000
184A	Prioritized Signal Retiming Program - Phase 1 (includes 85 corridors and nearly 1,500 intersections throughout the region - see separate list)	Georgia DOT	\$ 5,888,000
184B	Prioritized Signal Retiming Program - Phase 2 (project list under development)	Georgia DOT	\$ 4,000,000

Preliminary Project Funding Recommendations – SW Subregion

- Last Mile Connectivity Program
- General Roadway Safety and Operations Program
- Freight Safety and Operations Program

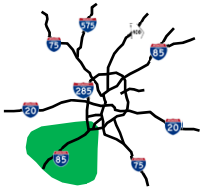

All information is subject to change and is being provided for review and comment. This fact sheet reflects preliminary recommendations made on October 1, 2012 by the Atlanta Regional Commission and the Georgia Department of Transportation. Following a review by local governments to confirm detailed phasing cost and schedule data, and to reaffirm local financial commitments, recommendations will be finalized and incorporated into the region’s Transportation Improvement Program in December 2012.

RECOMMENDED FOR SCOPING / ENGINEERING ONLY

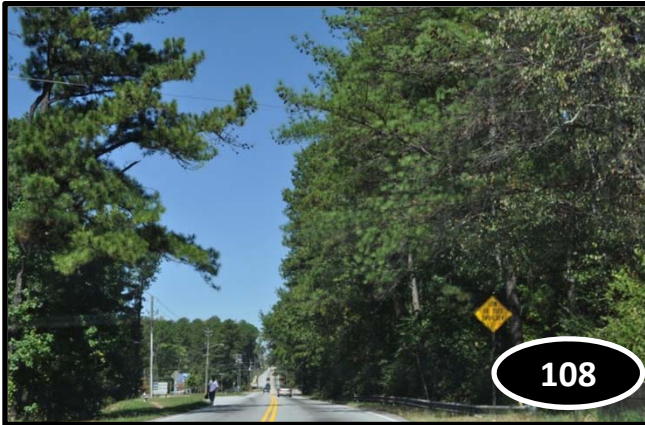

These projects do not yet have well developed concepts, budgets and/or schedules. Funding is being allocated to advance projects to a point where they can be considered for implementation funding in a future solicitation process.

Project Number	Project Name	Sponsor	Scoping Year	Federal Funds Committed
024	Pedestrian Facilities at Multiple Locations in the Vicinity of Riverdale High School in Clayton County	City of Riverdale / Clayton County	2013	\$ 60,000
028	SR 139 (Riverdale Road) in Clayton County from Forest Parkway to SR 85 in Clayton County - Pedestrian Facilities	Clayton County	2013	\$ 80,000
031	Pedestrian Facilities on Lovejoy Road, Lovejoy Drive, Talmadge Road, and Hastings Bridge Road in City of Lovejoy	City of Lovejoy	2013	\$ 40,000
032	Pedestrian Facilities at Multiple Locations in Vicinity of G.W. Northcutt Elementary School in City of College Park	City of College Park	2013	\$ 40,000
079	Pedestrian Facilities and Roadway Operational Improvements at Numerous Locations in Vicinity of Starrs Mill School Complex in Fayette County	Fayette County / City of Peachtree City	2013	\$ 60,000
105	US 29 (Roosevelt Highway) at Gresham Street and Highpoint Road in City of Union City - Intersection, Pedestrian and Transit Access Improvements	City of Union City	2013	\$ 40,000

Sample Projects Recommended for Southwest Subregion

All information is subject to change and is being provided for review and comment. This fact sheet reflects preliminary recommendations made on October 1, 2012 by the Atlanta Regional Commission and the Georgia Department of Transportation. Following a review by local governments to confirm detailed phasing cost and schedule data, and to reaffirm local financial commitments, recommendations will be finalized and incorporated into the region's Transportation Improvement Program in December 2012.

Truck operations and pedestrian safety improvements will be made on Buffington Rd. in southern Fulton County.

This bridge on Pylant St. and the nearby intersection with SR 16 in Senoia will be upgraded.

Three roads in Fayette County will be resurfaced, including SR 85C through Brooks.

Safer walking routes to Riverdale High/Middle Schools in Clayton County will be scoped and engineered.

The bridge on Valley Hill Rd. at the Flint River in Clayton County will be replaced.

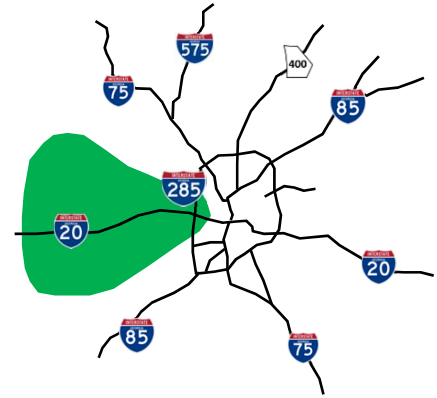

Improved pedestrian access to MARTA services along US 29 in Union City will be engineered.

Preliminary Project Funding Recommendations – West Subregion

- Last Mile Connectivity Program
- General Roadway Safety and Operations Program
- Freight Safety and Operations Program

All information is subject to change and is being provided for review and comment. This fact sheet reflects preliminary recommendations made on October 1, 2012 by the Atlanta Regional Commission and the Georgia Department of Transportation. Following a review by local governments to confirm detailed phasing cost and schedule data, and to reaffirm local financial commitments, recommendations will be finalized and incorporated into the region’s Transportation Improvement Program in December 2012.

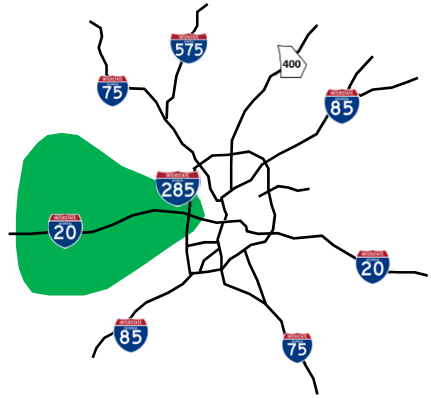

RECOMMENDED FOR FULL IMPLEMENTATION FUNDING

These projects have relatively well developed concepts, budgets and schedules and are ready to move quickly into design and engineering. Full funding is allocated to complete the project as proposed.

Project Number	Project Name	Sponsor	Federal Funds Committed
074	SR 5 (Bill Arp Road) from Rose Avenue / Bright Star Connector to Central Church Road - Roadway Operational Improvements	Douglas County	\$ 696,000
075	I-20 at SR 5 (Bill Arp Road) and Bright Star Road in City of Douglasville - Interchange Alternatives Analysis	City of Douglasville	\$ 320,000
076	SR 6 (Thornton Road) from I-20 in Douglas County to Garrett Road in Cobb County - Truck Navigation and Safety Improvements	Douglas County / Cobb County	\$ 1,476,000
077	Maxham Road from SR 6 (Thornton Road) to Tree Terrace Parkway in Douglas County - Roadway Operational Improvements	Douglas County	\$ 1,056,000
078	ITS System Expansion on SR 92 (Fairburn Road), US 78 (Bankhead Street / Broad Street) and Chapel Hill Road in Douglas County	Douglas County	\$ 560,000
106	Butner Road at Stonewall Tell Road in Fulton County - Intersection Improvements (Incremental Funding for Existing Project FS-208)	Fulton County	\$ 925,280
109	New Hope Road from SR 166 (Campbellton Road) to Versailles Road in Fulton County - Pedestrian Facilities (Incremental Funding for Existing Project FS-217)	Fulton County	\$ 1,000,000
183A	Prioritized Signal Upgrade Program - Phase 1 (includes 10 corridors throughout the region - see separate list)	Georgia DOT	\$ 15,460,000

These projects do not yet have well developed concepts, budgets and/or schedules. Funding is being allocated to advance projects to a point where they can be considered for implementation funding in a future solicitation process.

Project Number	Project Name	Sponsor	Scoping Year	Federal Funds Committed
015	SR 139 (Martin Luther King, Jr. Drive) between I-285 and Linkwood Road - Pedestrian Safety Improvements	City of Atlanta	2013	\$ 80,000
037	Oglesby Road at Brownsville Road in City of Powder Springs - Intersection Improvements	City of Powder Springs	2013	\$ 40,000
047	Powder Springs Road at Deer Creek Drive, Flint Hill Road and Pine Grove Drive in City of Powder Springs - Intersection Improvements	City of Powder Springs / Cobb County	2013	\$ 60,000
050	Marietta Street at Brownsville Road in City of Powder Springs - Roundabout	City of Powder Springs	2013	\$ 40,000
052	Powder Spring Dallas Road at Florence Road in City of Powder Springs - Roundabout	City of Powder Springs / Cobb County	2013	\$ 40,000
173	US 278 (Jimmy Lee Smith Parkway) at SR 92 (Hiram Douglasville Road) in Paulding County - Intersection Improvements	Paulding County	2013	\$ 80,000

Sample Projects Recommended for West Subregion

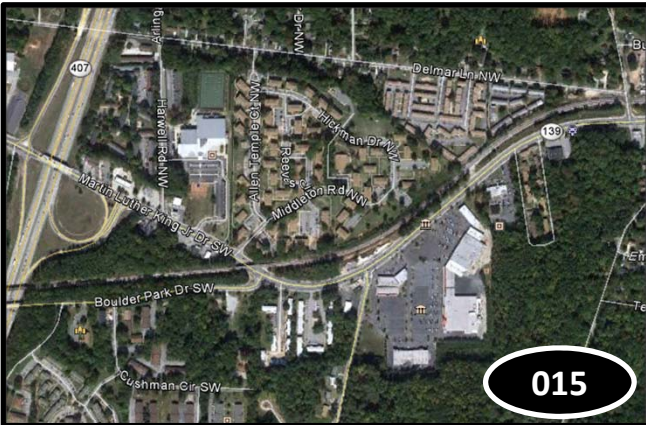

All information is subject to change and is being provided for review and comment. This fact sheet reflects preliminary recommendations made on October 1, 2012 by the Atlanta Regional Commission and the Georgia Department of Transportation. Following a review by local governments to confirm detailed phasing cost and schedule data, and to reaffirm local financial commitments, recommendations will be finalized and incorporated into the region's Transportation Improvement Program in December 2012.

Short-term improvements at the intersection of US 278 and SR 92 in Paulding County will be engineered.

Safety and operational improvements will be made on SR 5 in Douglas County

Pedestrian crossing safety improvements will be scoped along a section of MLK Drive in western Atlanta.

Truck operational improvements will be made on SR 6 in Douglas and Cobb Counties.

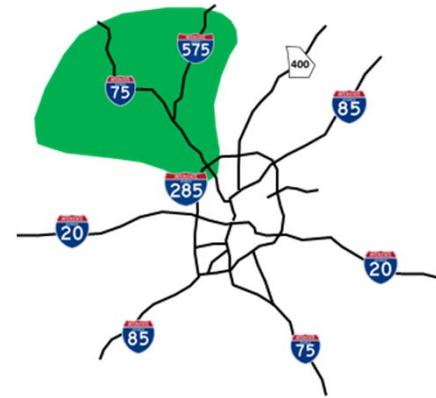

Sidewalks and a roundabout will be built at the intersection of SR 166 and New Hope Rd. in southern Fulton County.

The feasibility of a roundabout will be determined at the intersection of Marietta St. and Brownsville Rd. in Powder Springs.

Preliminary Project Funding Recommendations – NW Subregion

- Last Mile Connectivity Program
- General Roadway Safety and Operations Program
- Freight Safety and Operations Program

All information is subject to change and is being provided for review and comment. 049

Intersection safety and transit access improvements will be made around US 41 and Roswell St. in Roswell.

033

Five at-grade railroad crossings in Kennesaw will be upgraded.

003

Geometric improvements will be undertaken on Glade Rd. in Bartow County.

021

Sidewalk gaps will be eliminated on Canton Road in Woodstock.

034

Bike lanes and other improvements will be built on Powers Ferry Rd. in the Cumberland area.

035

Opportunities to provide biking connections between new housing for KSU students and the campus will be studied.
